Introduction: The Multi-Layered Transitions of Knowledge Production and University Education in Science and Mathematics	1
Paola Valero, Ole Ravn Christensen, and Ole Skovsmose	
Part I Changes in Teaching and Learning	
1 From Assenting to Asserting	17
John Mason	
2 A Reflective Science Education Practice	41
Kathrine Krageskov Eriksen	
3 The Development of a New Laboratory Course in Chemistry	63
Rie Troelsen	
4 Assessment and Contract-Like Relationships in Undergraduate Mathematics Education	85
Niels Grønbæk, Morten Misfeldt, and Carl Winsløw	
Part II Changes in Academic Cultures	
5 Cultural Models of Physics	109
Cathrine Hasse	
6 The Gap Between University and the Workplace	133
Wolff-Michael Roth	
7 The Culture of Mathematics and the Mathematical Culture	157
Leone Burton [‡]	

8	Becoming a Teaching Scholar	175
	Søren Kruse, Kirsten Nielsen, and Rie Troelsen	
Part III Changes in Structures and Organisations		
9	Conceptions of Universities as Organizations and Change in Science and Mathematics Education	197
	John A Bowden	
10	Reforming University Studies	223
	Sebastian Horst and Kjeld Bagger Laursen	
11	The Role and Means for Tertiary Didactics in a Faculty of Science	241
	Camilla Rump and Carl Winsløw	
12	Problem-Based and Project-Based Learning	261
	Anette Kolmos	
Part IV Changes in Views of Science and Mathematics		
13	From Anomaly to Paralogy	283
	Ole Ravn Christensen and Tom Børsen	
14	Modernities, Sciences, and Democracy	301
	Sandra Harding	
15	Towards a Critical Professionalism in University Science and Mathematics Education	325
	Ole Skovsmose	
	Name Index	347
	Subject Index	351
