

# Contents

Introduction by <i>Reuben Hersh</i> .....	vii
About the Authors.....	xvii
<b>Chapter 1</b>	
A Socratic Dialogue on Mathematics .....	1
<i>Alfréd Rényi</i>	
<b>Chapter 2</b>	
“Introduction” to <i>Filosofia e matematica</i> .....	17
<i>Carlo Cellucci</i>	
<b>Chapter 3</b>	
On Proof and Progress in Mathematics .....	37
<i>William P. Thurston</i>	
<b>Chapter 4</b>	
The Informal Logic of Mathematical Proof .....	56
<i>Andrew Aberdein</i>	
<b>Chapter 5</b>	
Philosophical Problems of Mathematics in the Light of Evolutionary Epistemology.....	71
<i>Yehuda Rav</i>	
<b>Chapter 6</b>	
Towards a Semiotics of Mathematics .....	97
<i>Brian Rotman</i>	
<b>Chapter 7</b>	
Computers and the Sociology of Mathematical Proof.....	128
<i>Donald MacKenzie</i>	

<b>Chapter 8</b>	
From G.H.H. and Littlewood to XML and Maple: Changing Needs and Expectations in Mathematical Knowledge Management.....	147
<i>Terry Stanway</i>	
<b>Chapter 9</b>	
Do <i>Real</i> Numbers Really Move? Language, Thought, and Gesture: The Embodied Cognitive Foundations of Mathematics .....	160
<i>Rafael Núñez</i>	
<b>Chapter 10</b>	
Does Mathematics Need a Philosophy? .....	182
<i>William Timothy Gowers</i>	
<b>Chapter 11</b>	
How and Why Mathematics Is Unique as a Social Practice .....	201
<i>Jody Azzouni</i>	
<b>Chapter 12</b>	
The Pernicious Influence of Mathematics upon Philosophy.....	220
<i>Gian-Carlo Rota</i>	
<b>Chapter 13</b>	
The Pernicious Influence of Mathematics on Science.....	231
<i>Jack Schwartz</i>	
<b>Chapter 14</b>	
What Is Philosophy of Mathematics Looking for? .....	236
<i>Alfonso C. Ávila del Palacio</i>	
<b>Chapter 15</b>	
Concepts and the Mangle of Practice Constructing Quaternions.....	250
<i>Andrew Pickering</i>	
<b>Chapter 16</b>	
Mathematics as Objective Knowledge and as Human Practice.....	289
<i>Eduard Glas</i>	
<b>Chapter 17</b>	
The Locus of Mathematical Reality: An Anthropological Footnote .....	304
<i>Leslie A. White</i>	
<b>Chapter 18</b>	
Inner Vision, Outer Truth.....	320
<i>Reuben Hersh</i>
