| <b>Preface to the Second Edition</b> .....   | VII |
| <b>Preface to the First Edition</b> .....  | IX  |
| <b>1 Nonlinear Regression Model and Parameter Estimation</b> ...   | 1   |
| 1.1 Examples .....   | 1   |
| 1.1.1 Pasture Regrowth: Estimating a Growth Curve .....  | 1   |
| 1.1.2 Radioimmunological Assay of Cortisol: Estimating a<br>Calibration Curve .....  | 2   |
| 1.1.3 Antibodies Anticoronavirus Assayed by an ELISA<br>Test: Comparing Several Response Curves .....                                      | 6   |
| 1.1.4 Comparison of Immature and Mature Goat Ovocytes:<br>Comparing Parameters .....   | 8   |
| 1.1.5 Isomerization: More than One Independent Variable ...  | 9   |
| 1.2 The Parametric Nonlinear Regression Model .....  | 10  |
| 1.3 Estimation .....   | 11  |
| 1.4 Applications .....   | 13  |
| 1.4.1 Pasture Regrowth: Parameter Estimation and Graph<br>of Observed and Adjusted Response Values .....                                   | 13  |
| 1.4.2 Cortisol Assay: Parameter Estimation and Graph of<br>Observed and Adjusted Response Values .....                                     | 13  |
| 1.4.3 ELISA Test: Parameter Estimation and Graph of<br>Observed and Adjusted Curves for May and June .....                                 | 14  |
| 1.4.4 Ovocytes: Parameter Estimation and Graph of<br>Observed and Adjusted Volume of Mature and<br>Immature Ovocytes in Propane-Diol ..... | 15  |
| 1.4.5 Isomerization: Parameter Estimation and Graph of<br>Adjusted versus Observed Values .....  | 16  |
| 1.5 Conclusion and References .....  | 17  |
| 1.6 Using <b>nls2</b> .....  | 18  |

|          |  |    |
|----------|--|----|
| <b>2</b> | <b>Accuracy of Estimators, Confidence Intervals and Tests</b> . . . .                          | 29 |
| 2.1      | Examples . . . . .   | 29 |
| 2.2      | Problem Formulation . . . . .  | 30 |
| 2.3      | Solutions . . . . .  | 30 |
| 2.3.1    | Classical Asymptotic Results . . . . .   | 30 |
| 2.3.2    | Asymptotic Confidence Intervals for $\lambda$ . . . . .  | 32 |
| 2.3.3    | Asymptotic Tests of $\lambda = \lambda_0$ against $\lambda \neq \lambda_0$ . . . . .           | 33 |
| 2.3.4    | Asymptotic Tests of $\Lambda\theta = L_0$ against $\Lambda\theta \neq L_0$ . . . . .           | 34 |
| 2.3.5    | Bootstrap Estimations . . . . .  | 35 |
| 2.4      | Applications . . . . .   | 38 |
| 2.4.1    | Pasture Regrowth: Calculation of a Confidence Interval for the Maximum Yield . . . . .         | 38 |
| 2.4.2    | Cortisol Assay: Estimation of the Accuracy of the Estimated Dose $\hat{D}$ . . . . .           | 39 |
| 2.4.3    | ELISA Test: Comparison of Curves . . . . .   | 40 |
| 2.4.4    | Ovocytes: Calculation of Confidence Regions . . . . .  | 42 |
| 2.4.5    | Isomerization: An Awkward Example . . . . .  | 43 |
| 2.4.6    | Pasture Regrowth: Calculation of a Confidence Interval for $\lambda = \exp \theta_3$ . . . . . | 47 |
| 2.5      | Conclusion . . . . .   | 49 |
| 2.6      | Using <b>nls2</b> . . . . .  | 49 |
| <b>3</b> | <b>Variance Estimation</b> . . . . .   | 61 |
| 3.1      | Examples . . . . .   | 61 |
| 3.1.1    | Growth of Winter Wheat Tillers: Few Replications . . . . .                                     | 61 |
| 3.1.2    | Solubility of Peptides in Trichloacetic Acid Solutions: No Replications . . . . .              | 63 |
| 3.2      | Parametric Modeling of the Variance . . . . .  | 65 |
| 3.3      | Estimation . . . . .   | 66 |
| 3.3.1    | Maximum Likelihood Estimation . . . . .  | 66 |
| 3.3.2    | Quasi-Likelihood Estimation . . . . .  | 67 |
| 3.3.3    | Three-Step Estimation . . . . .  | 69 |
| 3.4      | Tests and Confidence Regions . . . . .   | 69 |
| 3.4.1    | The Wald Test . . . . .  | 69 |
| 3.4.2    | The Likelihood Ratio Test . . . . .  | 70 |
| 3.4.3    | Bootstrap Estimations . . . . .  | 71 |
| 3.4.4    | Links Between Testing Procedures and Confidence Region Computations . . . . .                  | 72 |
| 3.4.5    | Confidence Regions . . . . .   | 73 |
| 3.5      | Applications . . . . .   | 74 |
| 3.5.1    | Growth of Winter Wheat Tillers . . . . .   | 74 |
| 3.5.2    | Solubility of Peptides in Trichloacetic Acid Solutions . . . . .                               | 78 |
| 3.6      | Using <b>nls2</b> . . . . .  | 83 |

|          |  |     |
|----------|--|-----|
| <b>4</b> | <b>Diagnostics of Model Misspecification</b> .....   | 93  |
| 4.1      | Problem Formulation .....  | 93  |
| 4.2      | Diagnostics of Model Misspecifications with Graphics .....                                       | 94  |
| 4.2.1    | Pasture Regrowth Example: Estimation Using a Concave-Shaped Curve and Plot for Diagnostics ..... | 95  |
| 4.2.2    | Isomerization Example: Graphics for Diagnostic .....   | 95  |
| 4.2.3    | Peptides Example: Graphics for Diagnostic .....  | 97  |
| 4.2.4    | Cortisol Assay Example: How to Choose the Variance Function Using Replications .....             | 99  |
| 4.2.5    | Trajectory of Roots of Maize: How to Detect Correlations in Errors .....                         | 103 |
| 4.2.6    | What Can We Say About the Experimental Design? ...   | 107 |
| 4.3      | Diagnostics of Model Misspecifications with Tests .....  | 110 |
| 4.3.1    | RIA of Cortisol: Comparison of Nested Models .....   | 110 |
| 4.3.2    | Tests Using Replications .....   | 110 |
| 4.3.3    | Cortisol Assay Example: Misspecification Tests Using Replications .....                          | 112 |
| 4.3.4    | Ovocytes Example: Graphics of Residuals and Misspecification Tests Using Replications .....      | 112 |
| 4.4      | Numerical Troubles During the Estimation Process: Peptides Example .....                         | 114 |
| 4.5      | Peptides Example: Concluded .....  | 118 |
| 4.6      | Using <b>nls2</b> .....  | 119 |
| <b>5</b> | <b>Calibration and Prediction</b> .....  | 135 |
| 5.1      | Examples .....   | 135 |
| 5.2      | Problem Formulation .....  | 137 |
| 5.3      | Confidence Intervals .....   | 137 |
| 5.3.1    | Prediction of a Response .....   | 137 |
| 5.3.2    | Calibration with Constant Variances .....  | 139 |
| 5.3.3    | Calibration with Nonconstant Variances .....   | 141 |
| 5.4      | Applications .....   | 142 |
| 5.4.1    | Pasture Regrowth Example: Prediction of the Yield at Time $x_0 = 50$ .....                       | 142 |
| 5.4.2    | Cortisol Assay Example .....   | 143 |
| 5.4.3    | Nasturtium Assay Example .....   | 144 |
| 5.5      | References .....   | 145 |
| 5.6      | Using <b>nls2</b> .....  | 145 |
| <b>6</b> | <b>Binomial Nonlinear Models</b> .....   | 153 |
| 6.1      | Examples .....   | 153 |
| 6.1.1    | Assay of an Insecticide with a Synergist: A Binomial Nonlinear Model .....                       | 153 |
| 6.1.2    | Vaso-Constriction in the Skin of the Digits: The Case of Binary Response Data .....              | 155 |

|          |   |            |
|----------|---|------------|
| 6.1.3    | Mortality of Confused Flour Beetles: The Choice of a Link Function in a Binomial Linear Model . . . . .                       | 156        |
| 6.1.4    | Mortality of Confused Flour Beetles 2: Survival Analysis Using a Binomial Nonlinear Model . . . . .                           | 158        |
| 6.1.5    | Germination of Orobranche: Overdispersion . . . . .   | 159        |
| 6.2      | The Parametric Binomial Nonlinear Model . . . . .   | 160        |
| 6.3      | Overdispersion, Underdispersion . . . . .   | 161        |
| 6.4      | Estimation . . . . .  | 162        |
| 6.4.1    | Case of Binomial Nonlinear Models . . . . .   | 162        |
| 6.4.2    | Case of Overdispersion or Underdispersion . . . . .   | 164        |
| 6.5      | Tests and Confidence Regions . . . . .  | 165        |
| 6.6      | Applications . . . . .  | 167        |
| 6.6.1    | Assay of an Insecticide with a Synergist: Estimating the Parameters . . . . .   | 167        |
| 6.6.2    | Vaso-Constriction in the Skin of the Digits: Estimation and Test of Nested Models . . . . .                                   | 171        |
| 6.6.3    | Mortality of Confused Flour Beetles: Estimating the Link Function and Calculating Confidence Intervals for the LD90 . . . . . | 172        |
| 6.6.4    | Mortality of Confused Flour Beetles 2: Comparison of Curves and Confidence Intervals for the ED50 . . . . .                   | 174        |
| 6.6.5    | Germination of Orobranche: Estimating Overdispersion Using the Quasi-Likelihood Estimation Method . . . . .                   | 177        |
| 6.7      | Using <b>nls2</b> . . . . .   | 180        |
| <b>7</b> | <b>Multinomial and Poisson Nonlinear Models</b> . . . . .   | <b>199</b> |
| 7.1      | Multinomial Model . . . . .   | 199        |
| 7.1.1    | Pneumoconiosis among Coal Miners: An Example of Multicategory Response Data . . . . .   | 200        |
| 7.1.2    | A Cheese Tasting Experiment . . . . .   | 200        |
| 7.1.3    | The Parametric Multinomial Model . . . . .  | 201        |
| 7.1.4    | Estimation in the Multinomial Model . . . . .   | 204        |
| 7.1.5    | Tests and Confidence Intervals . . . . .  | 206        |
| 7.1.6    | Pneumoconiosis among Coal Miners: The Multinomial Logit Model . . . . .   | 208        |
| 7.1.7    | Cheese Tasting Example: Model Based on Cumulative Probabilities . . . . .   | 210        |
| 7.1.8    | Using <b>nls2</b> . . . . .   | 213        |
| 7.2      | Poisson Model . . . . .   | 221        |
| 7.2.1    | The Parametric Poisson Model . . . . .  | 222        |
| 7.2.2    | Estimation in the Poisson Model . . . . .   | 222        |
| 7.2.3    | Cortisol Assay Example: The Poisson Nonlinear Model . . . . .   | 223        |
| 7.2.4    | Using <b>nls2</b> . . . . .   | 225        |
