

Contents

1. Scalar Derivatives in Euclidean Spaces	1
1.1 Scalar Derivatives of Mappings in Euclidean Spaces	1
1.1.1 Some Basic Results Concerning Skew-Adjoint Operators	2
1.1.2 The Scalar Derivative and its Fundamental Properties	3
1.1.3 Case $n = 2$. The Relation of the Scalar Derivative with the Complex Derivative	7
1.1.4 Miscellanea Concerning Scalar Differentiability	9
1.1.5 Characterization of Monotonicity by Scalar Derivatives	12
1.2 Computational Formulae for the Scalar Derivative	15
1.2.1 Scalar Derivatives and Directional Derivatives	15
1.2.2 Applications	20
1.3 Monotonicity, Scalar Differentiability, and Conformity	24
1.3.1 The Coefficient of Conformity and the Conformal Derivative	25
1.3.2 Monotone Vector Fields and Expansive Maps	27
2. Asymptotic Derivatives and Asymptotic Scalar Derivatives	31
2.1 Asymptotic Differentiability in Banach Spaces	31
2.2 Hyers–Ulam Stability and Asymptotic Derivatives	34
2.3 Asymptotic Differentiability Along a Convex Cone in a Banach Space	45
2.4 Asymptotic Differentiability in Locally Convex Spaces	49
2.5 The Asymptotic Scalar Differentiability	64
2.6 Some Applications	71

3.	Scalar Derivatives in Hilbert Spaces	79
3.1	Calculus	79
3.1.1	Introduction	79
3.1.2	Some Basic Results Concerning Skew-Adjoint Operators	80
3.1.3	Scalar Derivatives and Scalar Differentiability	81
3.1.4	Characterization of Monotone Mappings by Using Scalar Derivatives	83
3.1.5	Computational Formulae for the Scalar Derivatives	86
3.2	Inversions	90
3.3	Fixed Point Theorems Generated by Krasnoselskii's Fixed Point Theorem	93
3.4	Surjectivity Theorems	94
3.5	Variational Inequalities and Complementarity Problems	97
3.6	Duality in Nonlinear Complementarity Theory	103
3.6.1	Preliminaries	104
3.6.2	Complementarity Problem	104
3.6.3	Exceptional Family of Elements	104
3.6.4	Infinitesimal Exceptional Family of Elements	106
3.6.5	A Duality and Main Results	107
3.7	Duality of Implicit Complementarity Problems	112
3.7.1	Implicit Complementarity Problem	112
3.7.2	Exceptional Family of Elements for an Ordered Pair of Mappings	113
3.7.3	Infinitesimal Exceptional Family of Elements for an Ordered Pair of Mappings	114
3.7.4	A Duality and Main Results	115
3.8	Duality of Multivalued Complementarity Problems	119
3.8.1	Preliminaries	120
3.8.2	Approachable and Approximable Mappings	121
3.8.3	Complementarity Problem	122
3.8.4	Inversions of Set-Valued Mappings	122
3.8.5	Exceptional Family of Elements	123
3.8.6	Infinitesimal Exceptional Family of Elements	125
3.8.7	A Duality and Main results	127
3.9	The Asymptotic Browder–Hartman–Stampacchia Condition and Interior Bands of ε -Solutions for Nonlinear Complementarity Problems	132

3.9.1	Preliminaries	134
3.9.2	The Browder–Hartman–Stampacchia Condition	135
3.9.3	The asymptotic Browder–Hartman–Stampacchia condition	138
3.9.4	Infinitesimal Interior-Point- ε -Exceptional Families	142
3.9.5	Results Related to Properties (a) and (b) of the Interior Band Mapping \mathcal{U}	143
3.9.6	Comments	149
3.10	REFE-Acceptable Mappings and a Necessary and Sufficient Condition for the Nonexistence of Regular Exceptional Families of Elements	149
3.10.1	REFE-Acceptable Mappings	149
3.10.2	Mappings Without Regular Exceptional Family of Elements. A necessary and Sufficient Condition	157
4.	Scalar Derivatives in Banach Spaces	161
4.1	Preliminaries	161
4.2	Semi-inner Products	162
4.3	Inversions	163
4.4	Scalar Derivatives	165
4.5	Fixed Point Theorems in Banach Spaces	166
4.5.1	A Fixed Point Index for α -condensing Mappings	166
4.5.2	An Altman-type Fixed Point Theorem	168
4.5.3	Integral Equations	171
4.5.4	Applications of Krasnoselskii-Type Fixed Point Theorems	172
4.5.5	Applications of Altman-Type Fixed Point Theorems	175
5.	Monotone Vector Fields on Riemannian Manifolds and Scalar Derivatives	179
5.1	Geodesic Monotone Vector Fields	180
5.1.1	Geodesic Monotone Vector Fields and Convex Functionals	181
5.1.2	Geodesic Monotone Vector Fields and the First Variation of the Length of a Geodesic	182
5.1.3	Closed Geodesics and Geodesic Monotone Vector Fields	184
5.1.4	The Geodesic Monotonicity of Position Vector Fields	185
5.1.5	Geodesic Scalar Derivative	189
5.1.6	Geodesic Monotone Vector Fields on \mathbb{S}^n	192
5.1.7	Geodesic Monotone Vector Fields on \mathbb{H}^n	197

5.2	Killing Monotone Vector Fields	200
5.2.1	Expansive One-Parameter Transformation Groups	200
5.2.2	Geodesic Scalar Derivatives and Conformity	206
5.3	Projection Maps on Hadamard Manifolds	207
5.3.1	Some Basic Consequences of the Comparison Theorems	208
5.3.2	The Complementary Vector Field of a Map	214
5.3.3	Projection maps generating monotone vector fields	214
5.4	Nonexpansive Maps	219
5.4.1	Some Other Consequences of the Comparison Theorems	219
5.4.2	Nonexpansive Maps Generating Monotone Vector Fields	222
5.5	Zeros of Monotone Vector Fields	222
5.6	Homeomorphisms and Monotone Vector Fields	223
5.6.1	Preliminary Results	224
5.6.2	Homeomorphisms of Hadamard Manifolds	227
