## Contents

|          |  |    |
|----------|--|----|
| <b>1</b> | <b>Basics</b> .....                        | 1  |
| 1.1      | Introduction .....                         | 2  |
| 1.2      | Variance and Covariance .....              | 7  |
| 1.3      | Partitioning Variation .....               | 8  |
| 1.4      | Contrasts .....                            | 11 |
| 1.5      | Randomization, Layouts, and Designs .....  | 16 |
| 1.6      | Replication: True and Technical .....      | 23 |
| 1.7      | Exercises .....                            | 27 |
| 1.8      | Technical Notes .....                      | 37 |
| 1.9      | Miscellanea .....                          | 40 |
| <b>2</b> | <b>Completely Randomized Designs</b> ..... | 43 |
| 2.1      | Introduction .....                         | 43 |
| 2.1.1    | A Oneway CRD Model .....                   | 44 |
| 2.1.2    | CRD and the Two-sample $t$ -test .....     | 44 |
| 2.1.3    | CRD Anova .....                            | 46 |
| 2.2      | Model and Distribution Assumptions .....   | 48 |
| 2.3      | Expected Squares and $F$ -tests .....      | 51 |
| 2.4      | Estimating Contrasts .....                 | 53 |
| 2.5      | Deeper into Factorials .....               | 54 |
| 2.5.1    | Investigating Interactions .....           | 54 |
| 2.5.2    | Higher-Order Factorials .....              | 59 |
| 2.6      | Adjusting for Covariates .....             | 62 |
| 2.7      | Exercises .....                            | 70 |
| 2.8      | Technical Notes .....                      | 79 |
| 2.9      | Miscellanea .....                          | 85 |
| <b>3</b> | <b>Complete Block Designs</b> .....        | 91 |
| 3.1      | Introduction .....                         | 91 |
| 3.1.1    | An RCB Model .....                         | 92 |
| 3.1.2    | RCB and the Paired $t$ -test .....         | 94 |
| 3.1.3    | The RCB Anova .....                        | 96 |

|          |   |            |
|----------|---|------------|
| 3.2      | Model and Distribution Assumptions                  | 98         |
| 3.3      | Expected Squares and $F$ -tests                     | 101        |
| 3.4      | Estimating Contrasts                                | 104        |
| 3.5      | Modeling the Interaction                            | 108        |
| 3.6      | Variations on a Theme                               | 112        |
| 3.6.1    | Replicating the Experiment                          | 112        |
| 3.6.2    | Crossed Blocks                                      | 115        |
| 3.6.3    | Latin Squares                                       | 117        |
| 3.7      | Exercises   | 123        |
| 3.8      | Technical Notes                                     | 135        |
| 3.9      | Miscellanea   | 140        |
| <b>4</b> | <b>Interlude: Assessing the Effects of Blocking</b> | <b>145</b> |
| 4.1      | Introduction  | 145        |
| 4.2      | Model and Distribution Assumptions                  | 146        |
| 4.3      | Expected Squares and $F$ -tests                     | 147        |
| 4.4      | Estimating Contrasts                                | 149        |
| 4.5      | Modeling the Interaction                            | 153        |
| 4.6      | Reconciliation                                      | 157        |
| 4.7      | Exercises   | 159        |
| 4.8      | Technical Notes                                     | 164        |
| 4.9      | Miscellanea   | 166        |
| <b>5</b> | <b>Split Plot Designs</b>                           | <b>171</b> |
| 5.1      | Introduction  | 171        |
| 5.1.1    | A Split Plot Model                                  | 171        |
| 5.1.2    | Dissecting the Split Plot                           | 173        |
| 5.2      | CRD on the Whole Plots                              | 175        |
| 5.2.1    | Model and Distribution Assumptions                  | 175        |
| 5.2.2    | Expected Squares and $F$ -tests                     | 177        |
| 5.2.3    | Estimating Contrasts                                | 179        |
| 5.3      | RCB on the Whole Plots                              | 185        |
| 5.3.1    | Model and Distribution Assumptions                  | 185        |
| 5.3.2    | Expected Squares and $F$ -tests                     | 188        |
| 5.3.3    | Estimating Contrasts                                | 191        |
| 5.4      | Estimating Effects                                  | 194        |
| 5.5      | Splitting Twice                                     | 196        |
| 5.6      | Variations on a Theme                               | 207        |
| 5.6.1    | Strip Plots   | 207        |
| 5.6.2    | Crossover Designs                                   | 211        |
| 5.6.3    | Repeated Measures                                   | 216        |
| 5.7      | Exercises   | 218        |
| 5.8      | Technical Notes                                     | 234        |
| 5.9      | Miscellanea   | 238        |

**6 Confounding in Blocks** ..... 243

6.1 Introduction ..... 243

6.2 Balanced Incomplete Block Designs ..... 248

6.2.1 Model and Distribution Assumptions ..... 250

6.2.2 Estimating Contrasts ..... 252

6.3 Fractional Factorial Designs ..... 254

6.4 Variations on a Theme ..... 262

6.5 Exercises ..... 272

6.6 Miscellanea ..... 286

**A Designs Illustrated** ..... 289

**References** ..... 293

**Author Index** ..... 299

**Subject Index** ..... 301
