## Part I Cones, monoids, and triangulations

---

|          |   |     |
|----------|---|-----|
| <b>1</b> | <b>Polytopes, cones, and complexes</b>              | 3   |
| 1.A      | Polyhedra and their faces                           | 3   |
| 1.B      | Finite generation of cones                          | 10  |
| 1.C      | Finite generation of polyhedra                      | 15  |
| 1.D      | Polyhedral complexes                                | 21  |
| 1.E      | Subdivisions and triangulations                     | 25  |
| 1.F      | Regular subdivisions                                | 31  |
| 1.G      | Rationality and integrality                         | 39  |
|          | Exercises   | 44  |
|          | Notes   | 47  |
| <b>2</b> | <b>Affine monoids and their Hilbert bases</b>       | 49  |
| 2.A      | Affine monoids                                      | 49  |
| 2.B      | Normal affine monoids                               | 58  |
| 2.C      | Generating normal affine monoids                    | 67  |
| 2.D      | Normality and unimodular covering                   | 77  |
|          | Exercises   | 85  |
|          | Notes   | 88  |
| <b>3</b> | <b>Multiples of lattice polytopes</b>               | 91  |
| 3.A      | Knudsen–Mumford triangulations                      | 91  |
| 3.B      | Unimodular triangulations of multiples of polytopes | 97  |
| 3.C      | Unimodular covers of multiples of polytopes         | 103 |
|          | Exercises   | 117 |
|          | Notes   | 119 |

---

**Part II Affine monoid algebras**

---

|   |     |
|---|-----|
| <b>4 Monoid algebras</b>                                    | 123 |
| 4.A Graded rings  | 123 |
| 4.B Monoid algebras   | 129 |
| 4.C Representations of monoid algebras                      | 133 |
| 4.D Monomial prime and radical ideals                       | 137 |
| 4.E Normality   | 140 |
| 4.F Divisorial ideals and the class group                   | 145 |
| 4.G The Picard group and seminormality                      | 153 |
| Exercises   | 160 |
| Notes   | 162 |
| <b>5 Isomorphisms and automorphisms</b>                     | 165 |
| 5.A Linear algebraic groups                                 | 165 |
| 5.B Invariants of diagonalizable groups                     | 172 |
| 5.C The isomorphism theorem                                 | 175 |
| 5.D Automorphisms   | 183 |
| Exercises   | 195 |
| Notes   | 198 |
| <b>6 Homological properties and Hilbert functions</b>       | 199 |
| 6.A Cohen–Macaulay rings                                    | 199 |
| 6.B Graded homological algebra                              | 206 |
| 6.C The canonical module                                    | 213 |
| 6.D Hilbert functions                                       | 218 |
| 6.E Applications to enumerative combinatorics               | 227 |
| 6.F Divisorial linear algebra                               | 237 |
| Exercises   | 246 |
| Notes   | 248 |
| <b>7 Gröbner bases, triangulations, and Koszul algebras</b> | 251 |
| 7.A Gröbner bases and initial ideals                        | 251 |
| 7.B Initial ideals of toric ideals                          | 256 |
| 7.C Toric ideals and triangulations                         | 267 |
| 7.D Multiples of lattice polytopes                          | 276 |
| Exercises   | 281 |
| Notes   | 282 |

---

**Part III K-theory**

---

|  |     |
|--|-----|
| <b>8 Projective modules over monoid rings</b> .....                  | 287 |
| 8.A Projective modules .....   | 287 |
| 8.B The main theorem and the plan of the proof .....                 | 289 |
| 8.C Projective modules over polynomial rings .....                   | 292 |
| 8.D Reduction to the interior .....                                  | 297 |
| 8.E Graded “Weierstrass preparation” .....                           | 298 |
| 8.F Pyramidal descent .....  | 299 |
| 8.G How to shrink a polytope .....                                   | 305 |
| 8.H Converse results .....   | 307 |
| 8.I Generalizations .....  | 309 |
| Exercises .....  | 321 |
| Notes .....  | 324 |
| <b>9 Bass–Whitehead groups of monoid rings</b> .....                 | 327 |
| 9.A The functors $K_1$ and $K_2$ .....                               | 327 |
| 9.B The nontriviality of $SK_1(R[M])$ .....                          | 333 |
| 9.C Further results: a survey .....                                  | 345 |
| Exercises .....  | 351 |
| Notes .....  | 353 |
| <b>10 Varieties</b> .....  | 355 |
| 10.A Vector bundles, coherent sheaves, and Grothendieck groups ..... | 356 |
| 10.B Toric varieties .....   | 364 |
| 10.C Chow groups of toric varieties .....                            | 375 |
| 10.D Intersection theory .....                                       | 380 |
| 10.E Chow cohomology of toric varieties .....                        | 393 |
| 10.F Toric varieties with huge Grothendieck group .....              | 404 |
| 10.G The equivariant Serre problem for abelian groups .....          | 413 |
| Exercises .....  | 425 |
| <b>References</b> .....  | 429 |
| <b>Notation</b> .....  | 445 |
| <b>Index</b> .....   | 451 |
