List of Tables	XV
List of Figures	XIX

Part I Data, Questions and Methods

1 Health services research on access to care	3
1.1 Access to elective care	3
1.2 Wait lists	3
1.3 Waiting times	4
1.4 Studies of waiting times	4
1.5 Factors associated with waiting times	5
1.6 Types of data	6
1.6.1 Prospective registries	7
1.6.2 Operating room records	7
1.6.3 Wait-list counts	7
1.7 Types of questions	7
1.7.1 What is the variation in time spent waiting for elective surgery?	8
1.7.2 What is the probability of undergoing surgery within a certain time?	8
1.7.3 Does priority affect chances of admission for surgery?	8
1.7.4 Does registration period affect waiting times?	8
1.7.5 Does the type of procedure affect waiting times?	9
1.7.6 Does wait-list size at registration affect time to surgery?	9
1.7.7 What is the relation between emergency referrals and elective admission within the target time?	9
1.7.8 What proportion of patients have late surgery after registration on wait lists of different sizes?	10
1.7.9 What is the effect of delays in scheduling an operation?	10
1.7.10 Do longer delays contribute to preoperative mortality among patients with less urgent need for surgery?	10
1.7.11 What is the risk of unplanned emergency surgery among patients waiting for surgery?	11

1.7.12	What is the relation between length of the wait list and chances of death while on the wait list?	12
1.7.13	What is the relation between length of the wait list and chances of unplanned emergency surgery?	12
1.7.14	What is the risk of death associated with delayed surgical treatment?	12
1.7.15	What is the survival benefit of coronary artery bypass grafting?	12
1.8	Types of inferences	13
1.9	Statistical challenges	13
1.9.1	Incomplete observations	13
1.9.2	Truncated samples	15
1.9.3	Correlated observations	15
1.9.4	Intermediate events	15
1.9.5	Competing risks	16
2	Waiting-time data used in this book	17
2.1	Patient progress through surgical care	17
2.2	Access to coronary artery bypass grafting surgery	18
2.2.1	Capturing events in surgical cardiac care	18
2.2.2	Other data sources	20
2.2.3	Analytical data set	20
2.2.4	Patient population	22
2.3	Access to elective vascular surgery	24
2.3.1	Data sources	24
2.3.2	Patient population	24
2.3.3	Priority groups	27
2.4	Access to elective cholecystectomy	27
2.4.1	Data sources	27
2.4.2	Patient population	28
3	Waits and outcomes: What should be reported?	31
3.1	Introduction	31
3.2	Descriptive statistics	31
3.2.1	Notation	31
3.2.2	Proportions and odds	32
3.2.3	Hazard and rates	33
3.2.4	Probabilities of access	36
3.2.5	Cumulative incidence functions	39
3.2.6	Conditional probability functions	44
3.3	Methods of comparison	47
3.3.1	Notation	47
3.3.2	Comparison of proportions and odds	47
3.3.3	Comparison of hazard and event rates	49
3.3.4	Comparison of probabilities of access	50
3.3.5	Comparison of cumulative incidence functions	51
3.3.6	Comparison of conditional probability functions	53

3.4	Regression models	54
3.4.1	Notation	54
3.4.2	Logistic regression	54
3.4.3	Cox regression	57
3.4.4	Poisson log-linear regression	60
3.4.5	Discrete-time regression	61
3.4.6	Regression for pseudovalues of cumulative incidence functions	65

Part II Waiting-time Studies

4	Overview of waiting times and other variables	71
4.1	Introduction	71
4.2	Elective vascular surgery	71
4.2.1	Waiting times	71
4.2.2	Confounders	71
4.2.3	Wait-list size	72
4.3	Elective cholecystectomy	72
4.3.1	Waiting times	72
4.3.2	Confounders	72
4.4	Elective coronary artery bypass surgery	72
4.4.1	Waiting times	72
4.4.2	Waiting outcomes	73
4.4.3	Confounders	73
4.4.4	Wait-list size	73
5	Variation and access probabilities	75
5.1	Introduction	75
5.2	What is the variation in time spent waiting for elective surgery?	75
5.3	What is the probability of undergoing surgery within a certain time?	82
5.3.1	Elective vascular surgery	82
5.3.2	Elective coronary artery bypass grafting	85
6	Factors influencing waiting times	87
6.1	Introduction	87
6.2	Does priority affect chances of admission for surgery?	87
6.2.1	Elective vascular surgery	87
6.2.2	Elective coronary artery bypass grafting	91
6.3	Does registration period affect waiting times?	94
6.4	Does the type of procedure affect waiting times?	100
6.5	Does wait-list size at registration affect time to surgery?	102
6.5.1	Elective vascular surgery	102
6.5.2	Elective coronary artery bypass grafting	106

7	Surgery after target access time	111
7.1	Introduction	111
7.2	What proportion of patients have late surgery after registration on wait lists of different sizes?	111
7.3	What is the relation between weekly number of emergency referrals and elective admissions within the target time?	114
8	Adverse events while waiting	117
8.1	Introduction	117
8.2	Do longer delays for coronary artery bypass grafting contribute to preoperative mortality among patients with less urgent need for surgery?	117
8.3	What is the risk of unplanned emergency surgery among patients waiting for surgery?	124
8.3.1	Elective cholecystectomy	124
8.3.2	Elective coronary artery bypass grafting	128
8.4	What is the relation between length of the wait list at registration for coronary artery bypass grafting and chances of death while on the wait list?	132
8.5	What is the relation between length of the wait list at registration for coronary artery bypass grafting and chances of unplanned emergency surgery?	136
8.6	What is the risk of death associated with delayed surgical treatment of coronary artery disease?	139
9	Intermediate events	141
9.1	Introduction	141
9.2	What is the effect of delays in scheduling an operation?	141
9.3	What is the effect of registration period in the presence of delays?	149
10	Survival benefit of coronary artery bypass grafting	153
10.1	Introduction	153
10.2	What is the survival benefit of coronary artery bypass grafting?	153

Part III Appendices

A	Data dictionaries	165
A.1	Data dictionary for coronary artery bypass grafting inpatients	165
A.2	Data dictionary for vascular	167
A.3	Data dictionary for cholecystectomy	169
B	SAS code	171
B.1	DATA steps	171
B.1.1	Preparing data set on access to vascular surgery	171
B.1.2	Preparing data set on access to coronary artery bypass grafting surgery	176
B.1.3	Preparing data set on access to cholecystectomy surgery	181
B.2	Estimating summary measures	183
B.2.1	Macro to estimate proportion by group	183
B.2.2	Macro to estimate event rates by group	184
B.3	Creating new variables and reformatting records	187
B.3.1	DATA step for estimating wait-list size	187

B.3.2	DATA step for creating patient by week data for access to surgery	189
B.3.3	DATA step for creating patient by week data for on-time surgery	190
B.3.4	DATA step for expansion to pseudovalues data	191
C	Matlab code	193
C.1	Estimating the cumulative incidence function	193
C.2	Estimating the conditional probability function	195
C.3	Comparing conditional probability functions in two groups	197
