

# Contents

<b>Preface</b> .....	ix
<b>Introduction</b> .....	xi
<b>1 Preliminaries</b> .....	1
1.1 Partition of Unity .....	1
1.2 Ekeland's Variational Principle .....	2
1.3 Sobolev Spaces and Embedding Theorems .....	4
1.4 Differentiable Functionals .....	8
1.5 The Topological Degree .....	14
1.6 The Global Flow .....	17
1.7 The Local Flow .....	20
1.8 The (PS) Condition .....	33
1.9 Lax–Milgram Theorem and Weak Solutions .....	36
<b>2 Schechter–Tintarev Linking</b> .....	41
2.1 Schechter–Tintarev Linking .....	41
2.2 Sign-Changing Critical Points via Linking .....	47
2.3 Jumping Dirichlet Equations .....	62
2.4 Oscillating Dirichlet Equations .....	72
2.5 Double Resonant Cases .....	78
<b>3 Sign-Changing Saddle Point</b> .....	81
3.1 Rabinowitz's Saddle Points .....	81
3.2 Sign-Changing Saddle Points .....	82
3.3 Schrödinger Equations with Potential Well .....	94
3.4 Flow-Invariant Sets .....	103
3.5 Sign-Changing Homoclinic-Type Solutions .....	112
<b>4 On a Brezis–Nirenberg Theorem</b> .....	121
4.1 Introduction .....	121
4.2 Generalized Brezis–Nirenberg Theorems .....	121

4.3	Schrödinger Equations .....	131
<b>5</b>	<b>Even Functionals</b> .....	141
5.1	Introduction .....	141
5.2	An Abstract Theorem .....	141
5.3	A Classical Superlinear Problem .....	155
5.4	Composition Convergence Lemmas .....	158
5.5	Improved Hardy–Poincaré Inequalities .....	162
5.6	Equations with Critical Hardy Constant .....	166
5.7	Critical Sobolev–Hardy Exponent Cases .....	168
<b>6</b>	<b>Parameter Dependence</b> .....	177
6.1	Bounded Sign-Changing (PS)-Sequences .....	177
6.2	Bounded (PS) Sequences via Symmetry .....	199
6.3	Positive and Negative Solutions .....	207
6.4	Subcritical Schrödinger Equation .....	212
6.5	Critical Cases .....	220
<b>7</b>	<b>On a Bartsch–Chang–Wang–Weth Theory</b> .....	229
7.1	Some Basic Results on Morse Theory .....	229
7.2	Critical Groups of Sign-Changing Critical Points .....	234
7.3	Sign-Changing Solutions of Mountain Pass Type .....	243
7.4	Nodal Domains .....	249
7.5	Sign-Changing Solutions with Least Energy .....	252
	<b>References</b> .....	263
	<b>Index</b> .....	277
