

# Contents

Contributing Authors	ix
Preface	xvii
PART I THEMES AND ISSUES	
1	
Emergent Risks in Critical Infrastructures <i>Scott Dynes</i>	3
2	
Cyberspace Policy for Critical Infrastructures <i>Dorsey Wilkin, Richard Raines, Paul Williams and Kenneth Hopkinson</i>	17
PART II INFRASTRUCTURE SECURITY	
3	
Security Assessment of a Turbo-Gas Power Plant <i>Marcelo Masera, Igor Nai Fovino and Rafal Leszczyna</i>	31
4	
Detecting Cyber Attacks on Nuclear Power Plants <i>Julian Rrushi and Roy Campbell</i>	41
PART III CONTROL SYSTEMS SECURITY	
5	
Applying Trusted Network Technology to Process Control Systems <i>Hamed Okhravi and David Nicol</i>	57
6	
Towards a Taxonomy of Attacks Against Energy Control Systems <i>Terry Fleury, Himanshu Khurana and Von Welch</i>	71

7	Attribution of Cyber Attacks on Process Control Systems <i>Jeffrey Hunker, Robert Hutchinson and Jonathan Margulies</i>	87
8	Modeling and Detecting Anomalies in SCADA Systems <i>Nils Svendsen and Stephen Wolthusen</i>	101
9	Assessing the Integrity of Field Devices in Modbus Networks <i>Ryan Shayto, Brian Porter, Rodrigo Chandia, Mauricio Papa and Sujeet Sheno</i>	115
10	Designing Security-Hardened Microkernels for Field Devices <i>Jeffrey Hieb and James Graham</i>	129
11	Combating Memory Corruption Attacks on SCADA Devices <i>Carlo Bellettini and Julian Rrushi</i>	141
12	Mitigating Accidents in Oil and Gas Production Facilities <i>Stig Johnsen</i>	157
PART IV SECURITY STRATEGIES		
13	Automated Assessment of Compliance with Security Best Practices <i>Zahid Anwar and Roy Campbell</i>	173
14	Collaborative Access Control for Critical Infrastructures <i>Amine Baina, Anas Abou El Kalam, Yves Deswarte and Mohamed Kaaniche</i>	189
PART V INFRASTRUCTURE INTERDEPENDENCIES		
15	Modeling Dependencies in Critical Infrastructures <i>Albert Nieuwenhuijs, Eric Luijff and Marieke Klaver</i>	205
16	Metrics for Quantifying Interdependencies <i>Emiliano Casalicchio and Emanuele Galli</i>	215

17  
An Integrated Approach for Simulating Interdependencies 229  
*Roberto Setola, Sandro Bologna, Emiliano Casalicchio  
and Vincenzo Masucci*

PART VI INFRASTRUCTURE MODELING AND SIMULATION

18  
Simulation of Advanced Train Control Systems 243  
*Paul Craven and Paul Oman*

19  
An Integrated Methodology for Critical Infrastructure Modeling 257  
and Simulation  
*William Tolone, Seok-Won Lee, Wei-Ning Xiang, Joshua  
Blackwell, Cody Yeager, Andrew Schumpert and Wray Johnson*

20  
Using 3D Models and Discrete Simulations in Infrastructure 269  
Security Applications  
*Pierluigi Assogna, Glauco Bertocchi, Alberto Paoluzzi, Michele  
Vicentino, Giorgio Scorzelli and Roberto Zollo*
