Preface to the English Edition		$\mathbf{v}$
Preface		vii
1	Introduction	1
<b>2</b>	Cutoff and Other Special Smooth Functions on $\mathbb{R}^n$	13
3	Algebras and Points	<b>21</b>
4	Smooth Manifolds (Algebraic Definition)	37
<b>5</b>	Charts and Atlases	<b>53</b>
6	Smooth Maps	65
7	Equivalence of Coordinate and Algebraic Definitions	77
8	Spectra and Ghosts	85
9	The Differential Calculus as a Part of Commutative Algebra	95
10	Smooth Bundles	143
11	Vector Bundles and Projective Modules	161

Afterword	
Appendix A. M. Vinogradov Observability Principle, Set Theory and the "Foundations of Mathematics"	209
References	217
Index	<b>219</b>
