

# Contents

<b>Preface</b> . . . . .	<b>v</b>
<b>Contributors</b> . . . . .	<b>xiii</b>
<b>1 Disulfide Bond Mapping by Cyanation-induced Cleavage and Mass Spectrometry</b> . . . . .	<b>1</b>
Jiang Wu	
<b>2 Detection of Post-translational Modifications by Fluorescent Staining of Two-Dimensional Gels</b> . . . . .	<b>21</b>
Archana M. Jacob and Chris W. Turck	
<b>3 Identification of Protein Phosphorylation Sites by Advanced LC-ESI-MS/MS Methods</b> . . . . .	<b>33</b>
Christoph Weise and Christof Lenz	
<b>4 Analysis of Tyrosine-<i>O</i>-Sulfation</b> . . . . .	<b>47</b>
Jens R. Bundgaard, Jette W. Sen, Anders H. Johnsen, and Jens F. Rehfeld	
<b>5 <math>\alpha</math>-Amidated Peptides: <i>Approaches for Analysis</i></b> . . . . .	<b>67</b>
Gregory P. Mueller and William J. Driscoll	
<b>6 <math>\gamma</math>-Glutamate and <math>\beta</math>-Hydroxyaspartate in Proteins</b> . . . . .	<b>85</b>
Francis J. Castellino, Victoria A. Ploplis, and Li Zhang	
<b>7 Lysine Hydroxylation and Cross-linking of Collagen</b> . . . . .	<b>95</b>
Mitsuo Yamauchi and Masashi Shiiba	
<b>8 Mass Spectrometric Determination of Protein Ubiquitination</b> . . . . .	<b>109</b>
Carol E. Parker, Maria R. E. Warren, Viorel Mocanu, Susanna F. Greer, and Christoph H. Borchers	

<b>9</b>	<b>Analysis of Sumoylation</b> . . . . .	<b>131</b>
	Andrea Pichler	
<b>10</b>	<b>Detection and Analysis of Protein ISGylation</b> . . . . .	<b>139</b>
	Tomoharu Takeuchi and Hideyoshi Yokosawa	
<b>11</b>	<b>Analysis of Methylation, Acetylation, and Other Modifications in Bacterial Ribosomal Proteins</b> . . . . .	<b>151</b>
	Randy J. Arnold, William Running, and James P. Reilly	
<b>12</b>	<b>Analysis of S-Acylation of Proteins</b> . . . . .	<b>163</b>
	Michael Veit, Evgeni Ponimaskin, and Michael F. G. Schmidt	
<b>13</b>	<b>Metabolic Labeling and Structural Analysis of Glycosylphosphatidylinositols from Parasitic Protozoa</b> . . . . .	<b>183</b>
	Nahid Azzouz, Peter Gerold, and Ralph T. Schwarz	
<b>14</b>	<b>2-Dimensional Electrophoresis: <i>Detection of Glycosylation and Influence on Spot Pattern</i></b> . . . . .	<b>199</b>
	Klemens Löster and Christoph Kannicht	
<b>15</b>	<b>Carbohydrate Composition Analysis of Glycoproteins by HPLC Using Highly Fluorescent Anthranilic Acid (AA) Tag</b> . . .	<b>215</b>
	George N. Saddic, Shirish T. Dhume, and Kalyan R. Anumula	
<b>16</b>	<b>Enzymatical Hydrolysis of N-Glycans from Glycoproteins and Fluorescent Labeling by 2-Aminobenzamide (2-AB)</b> . . . . .	<b>231</b>
	Rolf Nuck	
<b>17</b>	<b>Separation of N-Glycans by HPLC</b> . . . . .	<b>239</b>
	Martin Gohlke and Véronique Blanchard	
<b>18</b>	<b>Enzymatic Sequence Analysis of N-Glycans by Exoglycosidase Cleavage and Mass Spectrometry—detection of Lewis X Structures</b> . . . . .	<b>255</b>
	Christoph Kannicht, Detlef Grunow, and Lothar Lucka	
<b>19</b>	<b>Immunochemical Methods for the Rapid Screening of the O-Glycosidically Linked N-Acetylglucosamine Modification of Proteins</b> . . . . .	<b>267</b>
	Michael Ahrend, Angela Käberich, Marie-Therese Fergen, and Brigitte Schmitz	
<b>20</b>	<b>Analysis of O-Glycosylation</b> . . . . .	<b>281</b>
	Juan J. Calvete and Libia Sanz	

<b>21</b>	<b>Characterization of Site-specific <i>N</i>-Glycosylation</b> . . . . .	<b>293</b>
	Katalin F. Medzihradzky	
<b>22</b>	<b>Monitoring Glycosylation of Therapeutic Glycoproteins for Consistency by HPLC Using Highly Fluorescent Anthranilic Acid (AA) Tag</b> . . . . .	<b>317</b>
	Shirish T. Dhume, George N. Saddic, and Kalyan R. Anumula	
<b>23</b>	<b>Comparability and Monitoring Immunogenic <i>N</i>-linked Oligosaccharides from Recombinant Monoclonal Antibodies from Two Different Cell Lines using HPLC with Fluorescence Detection and Mass Spectrometry</b> . . . . .	<b>333</b>
	Bruce R. Kilgore, Adam W. Lucka, Rekha Patel, Bruce A. Andrien, Jr., and Shirish T. Dhume	
<b>24</b>	<b>Mass Spectrometry and HPLC with Fluorescent Detection-Based Orthogonal Approaches to Characterize <i>N</i>-linked Oligosaccharides of Recombinant Monoclonal Antibodies</b> . . . . .	<b>347</b>
	Adam W. Lucka, Bruce R. Kilgore, Rekha Patel, Bruce A. Andrien, Jr., and Shirish T. Dhume	
<b>25</b>	<b>Web-based Computational Tools for the Prediction and Analysis of Post-translational Modifications of Proteins</b> . . . . .	<b>363</b>
	Vladimir A. Ivanisenko, Dmitry A. Afonnikov, and Nikolay A. Kolchanov	
	<b>Index</b> . . . . .	<b>385</b>
