Contents

1 Introduction 1
1.1 Manufacturing Systems 1
1.2 The Manufacturing Process 3
1.3 Computing Technologies 4
1.4 About This Book 9
References 11

2 Metaheuristic Optimization in Certain and Uncertain Environments 13
2.1 Introduction 13
2.2 Metaheuristic Approaches to Optimization 13
2.2.1 Genetic Algorithms 14
2.2.2 Simulated Annealing 22
2.2.3 Tabu Search 26
2.2.4 Differential Evolution (DE) 27
2.2.5 Particle Swarm Optimization (PSO) 32
2.2.6 Other Methods 34
2.3 Hybrid Approaches to Optimization 36
2.4 Applications for Manufacturing Planning and Operation 38
2.4.1 Logistic Optimization Using Hybrid Tabu Search 39
2.4.2 Sequencing Planning for a Mixed-model Assembly Line Using SA 48
2.4.3 General Scheduling Considering Human–Machine Cooperation 53
2.5 Optimization under Uncertainty 60
2.5.1 A GA to Derive an Insensitive Solution against Uncertain Parameters 60
2.5.2 Flexible Logistic Network Design Optimization 65
2.6 Chapter Summary 71
References 72

3 Multi-objective Optimization Through Soft Computing Approaches 77
3.1 Introduction 77
3.2 Multi-objective Metaheuristic Methods 79
3.2.1 Aggregating Function Approaches 80
3.2.2 Population-oriented Approaches 80
3.2.3 Pareto-based Approaches 82
3.3 Multi-objective Optimization in Terms of Soft Computing 87
3.3.1 Value Function Modeling Using Artificial Neural Networks 88
3.3.2 Hybrid GA for Solving MIP under Multi-objectives 91
3.3.3 MOON^{2R} and MOON^2 95
3.4 Applications of MOSC for Manufacturing Optimization 105
3.4.1 Multi-objective Site Location of Waste Disposal Facilities 106
3.4.2 Multi-objective Scheduling of Flow Shop 108
3.4.3 Artificial Product Design 112
3.5 Chapter Summary 121
References 122

4 Cellular Neural Networks in Intelligent Sensing and Diagnosis 125
4.1 The Cellular Neural Network as an Associative Memory 125
4.2 Design Method of CNN 128
4.2.1 A Method Using Singular Value Decomposition 128
4.2.2 Multi-output Function Design 131
4.2.3 Un-uniform Neighborhood 135
4.2.4 Multi-memory Tables for CNN 140
4.3 Applications in Intelligent Sensing and Diagnosis 143
4.3.1 Liver Disease Diagnosis 143
4.3.2 Abnormal Car Sound Detection 147
4.3.3 Pattern Classification 152
4.4 Chapter Summary 155
References 156

5 The Wavelet Transform in Signal and Image Processing . . . 159
5.1 Introduction to Wavelet Transforms 159
5.2 The Continuous Wavelet Transform 160
5.2.1 The Conventional Continuous Wavelet Transform 160
5.2.2 The New Wavelet: The RI-Spline Wavelet 162
5.2.3 Fast Algorithms in the Frequency Domain 167
5.2.4 Creating a Novel Real Signal Mother Wavelet 173
5.3 Translation Invariance Complex Discrete Wavelet Transforms . 180
5.3.1 Traditional Discrete Wavelet Transforms 180

5.3.2 RI-spline Wavelet for Complex Discrete Wavelet Transforms . . . 182
5.3.3 Coherent Dual-tree Algorithm . . . 185
5.3.4 2-D Complex Discrete Wavelet Transforms . . . 189
5.4 Applications in Signal and Image Processing . . . 194
5.4.1 Fractal Analysis Using the Fast Continuous Wavelet Transform . . . 194
5.4.2 Knocking Detection Using Wavelet Instantaneous Correlation . . . 200
5.4.3 De-noising by Complex Discrete Wavelet Transforms . . . 205
5.4.4 Image Processing and Direction Selection . . . 212
5.5 Chapter Summary . . . 217
References . . . 219

6 Integration of Information Systems . . . 221
6.1 Introduction . . . 221
6.2 Enterprise Systems . . . 224
6.3 MES Systems . . . 224
6.4 Integration Layers . . . 225
6.5 Integration Technologies . . . 225
6.5.1 Database Integration . . . 225
6.5.2 Remote Procedure Calls . . . 226
6.5.3 OPC . . . 227
6.5.4 Publish and Subscribe . . . 227
6.5.5 Web Services . . . 228
6.6 Multi-agent Systems . . . 229
6.6.1 FIPA: A Standard for Agent Systems . . . 230
6.7 Applications of Multi-agent Systems in Manufacturing . . . 232
6.7.1 Multi-agent System Example . . . 232
6.8 Standard Reference Models . . . 236
6.8.1 ISO TC184 . . . 236
6.9 IEC/ISO 62264 . . . 237
6.10 Formal Languages . . . 240
6.10.1 EXPRESS . . . 240
6.10.2 Ontology Languages . . . 240
6.10.3 OWL . . . 241
6.10.4 Matchmaking Agents Revisited . . . 242
6.11 Upper Ontologies . . . 243
6.11.1 ISO 15926 . . . 244
6.11.2 Connectivity and Composition . . . 244
6.11.3 Physical Quantities . . . 246
6.12 Time-reasoning . . . 249
6.13 Chapter Summary . . . 250
References . . . 251

7 Summary . . . 253

A Introduction to IDEF0 . . . 259
References . . . 261

B The Basis of Optimization Under a Single Objective . . . 263
B.1 Introduction . . . 263
B.2 Linear Programming and Some Remarks on Its Advances . . . 264
B.3 Non-linear Programs . . . 269
References . . . 275

C The Basis of Optimization Under Multiple Objectives . . . 277
C.1 Binary Relations and Preference Order . . . 277
C.2 Traditional Methods . . . 279
C.2.1 Multi-objective Analysis . . . 279
C.2.2 Prior Articulation Methods of MOP . . . 281
C.2.3 Some Interactive Methods of MOP . . . 283
C.3 Worth Assessment and the Analytic Hierarchical Process . . . 290
C.3.1 Worth Assessment . . . 290
C.3.2 The Analytic Hierarchy Process (AHP) . . . 291
References . . . 294

D The Basis of Neural Networks . . . 297
D.1 The Back Propagation Network . . . 297
D.2 The Radial-basis Function Network . . . 299
References . . . 301

E The Level Partition Algorithm of ISM . . . 303
References . . . 305

Index . . . 307
