Part I

1	Introduction	3
1.1	A Beginning	3
1.2	What is Engineering?.....	4
1.3	What is Ethics?.....	5
1.4	What is the Issue?.....	6
1.5	Traditional Ethical Viewpoints.....	8
1.6	Other Professions: Medicine and Business.....	9
1.7	Outline of an Aspirational Engineering Ethics	11
1.8	Practical Outcomes	13
	References.....	13
2	What is the Issue?	15
2.1	Introduction	15
2.2	Military Technology	16
2.2.1	“Just” War	16
2.2.2	International Conventions and Treaties.....	17
2.2.3	Cluster Munitions and Nuclear Weapons.....	20
2.3	Water	21
2.4	Engineering for the Promotion of Peace and Prosperity.....	24
2.5	The Scale of Modern Engineering Activity.....	26
	References.....	27
3	Traditional Ethical Viewpoints	29
3.1	Introduction	29
3.2	Consequentialism	31
3.3	Contractualism.....	33
3.4	Kantian Duty	36
3.5	Virtue Ethics.....	38
	References.....	41

4 Ethics in Medicine and Business..... 43

4.1 Ethics in Medicine..... 43

4.2 Philosophical Medical Ethics 47

4.3 Ethics in Business..... 50

4.4 Philosophical Business Ethics 53

References..... 57

5 Reflection 59

5.1 On War 59

5.2 On Hunger and Thirst..... 62

5.3 Responsibility and Aspiration 63

References..... 65

Part II

6 Outline of an Aspirational Engineering Ethics 69

6.1 Introduction 69

6.2 The Priority of People 71

6.3 Continuity and Coherence: the *Practice* of Engineering 74

6.4 Continuity and Coherence: the Life of the Individual Engineer 78

6.5 *I, I-Thou* and *I-You*: Self Care, Proximate Care,
and Care Beyond Proximity 80

References..... 85

7 Practical Outcomes..... 87

7.1 Overview of Analysis..... 87

7.2 Engineering Education 90

7.3 Engineering Institutions..... 93

7.4 Industry and Work Practices..... 96

7.5 Positioning Engineering in the Public
and Intellectual Mainstreams 98

7.6 An Aspirational Role for Engineering in International
Political Initiatives..... 101

7.7 An Aspirational Engineering Ethical Ethos Across Cultures 104

7.8 Final Suggestions..... 106

References..... 107
