Introduction	ix
1 More Than One Sun	1
<i>Bob Argyle</i>	
2 Why Observe Double Stars?	17
<i>Bob Argyle</i>	
3 The Observation of Binocular Double Stars ...	25
<i>Mike Ropelewski</i>	
4 The Scale of Binary Systems	35
<i>Bob Argyle</i>	
5 Multiple Stars and Planets	39
<i>Bob Argyle</i>	
6 Is the Sun a Double Star?	47
<i>Bob Argyle</i>	
7 The Orbital Elements of a Visual Binary Star ..	53
<i>Andreas Alzner</i>	
8 Orbit Computation	63
<i>Andreas Alzner</i>	
9 Some Famous Double Stars	73
<i>Bob Argyle</i>	
10 The Resolution of a Telescope	85
<i>Bob Argyle</i>	
11 Reflecting Telescopes and Double-Star Astronomy	97
<i>Christopher Taylor</i>	
12 Simple Techniques of Measurement	137
<i>Tom Teague</i>	

13	The Double-Image Micrometer	159
	<i>Andreas Alzner</i>	
14	The Diffraction Grating Micrometer	169
	<i>Andreas Maurer</i>	
15	The Filar Micrometer	183
	<i>Bob Argyle</i>	
16	The CCD Camera	199
	<i>Doug West</i>	
17	Speckle Interferometry for the Amateur	209
	<i>Nils Turner</i>	
18	Lunar Occultations	231
	<i>Graham Appleby</i>	
19	What the Amateur can Contribute	241
	<i>Bob Argyle</i>	
20	Some Active Amateur Double Star Observers .249	
	<i>Bob Argyle</i>	
21	An Observing Session	265
	<i>Bob Argyle</i>	
22	Some Useful Formulae	273
	<i>Michael Greaney</i>	
23	Star Atlases and Software	291
	<i>Owen Brazell</i>	
24	Catalogues	301
	<i>Bob Argyle</i>	
25	Publication of Results	309
	<i>Bob Argyle</i>	
	Appendix: Some Useful URL Addresses	313
	Brief Biographies	317
