<b>1. Overview of Enterprise Application Integration.....</b>	<b>1</b>
1.1 Problems to Solve .....	1
1.2 Application Integration: Semantic Level and System Level .....	6
1.3 Different Sorts of Middleware .....	12
1.4 Middleware and e-Business Architectures .....	41
1.5 Object-oriented Modelling for Constructing Architectures.....	45
1.6 Conclusion .....	47
<b>2. RPC-based Middleware .....</b>	<b>49</b>
2.1 The Client–Server Model .....	49
2.2 Client–Server and Procedure Call .....	50
2.3 Principles of the Remote Procedure Call Architecture .....	52
2.4 Concept of Contract Between Client and Server .....	54
2.5 Structure of Communication .....	57
2.6 The Standard .....	62
<b>3. CORBA: Standard Object-based Middleware.....</b>	<b>73</b>
3.1 Introduction.....	73
3.2 The CORBA Conceptual Model .....	76
3.3 The CORBA Architecture .....	81
3.4 The CORBA 2.0 Standard .....	87
3.5 Object Services .....	90
3.6 The CORBA 3.0 Standard .....	92
<b>4. OLE/COM: Object-based Middleware from Microsoft .....</b>	<b>95</b>
4.1 Introduction.....	95
4.2 The COM Object Model .....	96
4.3 OLE2 .....	109
4.4 The DCOM Model .....	112
4.5 Microsoft Transaction Server (MTS) .....	114

<b>5. Comparison Between CORBA and OLE/COM .....</b>	<b>117</b>
5.1 Introduction.....	117
5.2 Code Reuse: Inheritance and Aggregation .....	119
5.3 Composite Document Handling: OLE2 (COM) and OpenDoc (CORBA) .....	121
5.4 Bridge Between CORBA and DCOM .....	123
5.5 Summary Table .....	125
 <b>6. Java RMI and Java Beans .....</b>	 <b>127</b>
6.1 The Java Language .....	127
6.2 Distributed Processing According to Java .....	129
6.3 Internet: Downloading and Execution of Applets .....	131
6.4 Remote Method Call: Java RMI .....	135
6.5 Component-based Software: Java Beans and ActiveX .....	141
 <b>7. Message-based Middleware .....</b>	 <b>147</b>
7.1 Introduction.....	147
7.2 Principal Functions.....	148
7.3 Evaluation of the Principal Products .....	155
 <b>8. Introduction to the Internet .....</b>	 <b>161</b>
8.1 The Network of Networks .....	161
8.2 Definition of the Principal Terms.....	162
8.3 The World Wide Web .....	165
 <b>9. e-Business Architectures.....</b>	 <b>177</b>
9.1 Information Publication on the Web .....	177
9.2 Interaction with an Enterprise Server .....	182
9.3 Transactions with an Application Server.....	186
9.4 Integrating the Application Server with the Back-office .....	190
9.5 B2B Example: Marketplaces .....	206
 <b>10. Conclusion.....</b>	 <b>209</b>
10.1 Choose Your Middleware .....	210
10.2 The Complete Approach: From Business Needs to Middleware Infrastructure.....	213
 <b>Appendix A: Introduction to Object Technology.....</b>	 <b>215</b>
A.1 The Concept of an Object .....	215
A.2 Principal Characteristics of Object Technology .....	217

<b>Appendix B: MethodF™: A Method for Object-oriented Analysis and Design</b> .....	<b>231</b>
B.1 Introduction.....	231
B.2 Specification Phase .....	234
B.3 Analysis Phase .....	241
B.4 Design Phase .....	256
B.5 Implementation Phase .....	263
B.6 Summary of MethodF's Principal Steps .....	269
<b>Appendix C: Glossary</b> .....	<b>271</b>
<b>Bibliography/Cybography</b> .....	<b>277</b>
<b>Index</b> .....	<b>279</b>
