

Contents

Introduction	1
0.1 Terminology	2
0.2 Examples	3
PART 1 The Context	9
1 Ways of Thinking about Engineering Design	11
1.1 Disasters and Failures	11
1.2 Engineering Excellence	15
1.3 New Innovations	15
1.4 Improving Engineering Design	17
1.5 Systematic Approaches to Engineering Design	18
1.6 Systematic Design in Practice	20
1.7 <i>Tips for Management</i>	22
2 The Project Context	23
2.1 Engineering Projects	23
2.2 Engineering Design in the Project Context	23
2.3 The Effect of Influences	29
2.4 Influences at the Macroeconomic Level	31
2.5 Influences at the Microeconomic Level	34
2.6 Influences at the Corporate Level	39
2.7 <i>Design Context Checklist and Work Sheet</i>	43
2.8 <i>Tips for Management</i>	51
PART 2 Task, Team and Tools	53
3 Profiling the Project	55
3.1 Influences at the Project Level	55
3.2 Design Task	55
3.3 Design Team	58
3.4 Design Tools and Techniques	62
3.5 Design Team Output	67

3.6	<i>Project Profile Checklist and Work Sheet</i>	76
3.7	<i>Tips for Management</i>	80
4	Managing the Design Team	83
4.1	Influences at the Personal Level	83
4.2	Knowledge, Skills, and Attitude	84
4.3	Motivation	85
4.4	Relationships	87
4.5	Personal Output	87
4.6	<i>Personnel Profile Checklist and Work Sheet</i>	88
4.7	<i>Tips for Management</i>	92
PART 3	The Project	93
5	Project Proposal: Getting the Job	95
5.1	Proposals and Briefs	95
5.2	Preparing a Proposal	96
5.3	Negotiations	100
5.4	Debriefing	101
5.5	<i>Project Proposal Checklist and Work Sheet</i>	101
5.6	<i>Tips for Management</i>	102
6	Design Specification: Clarification of the Task	107
6.1	Problem Statement and Design Specification	107
6.2	Defining the Problem	108
6.3	Project Planning	109
6.4	Demands and Wishes	110
6.5	Design Specification	111
6.6	<i>Design Specification Checklist and Work Sheet</i>	114
6.7	<i>Tips for Management</i>	115
7	Feasible Concept: Conceptual Design	119
7.1	Divergent and Convergent Thinking	119
7.2	Generating Ideas	122
7.3	Selecting and Evaluating Concepts	126
7.4	Estimating Costs	127
7.5	Presenting the Final Concept	130
7.6	<i>Conceptual Design Checklist and Work Sheet</i>	133
7.7	<i>Tips for Management</i>	140
8	Developed Concept: Embodiment Design	141
8.1	Abstract Concept to Developed Design	141
8.2	Overall Guidelines for Embodiment Design	149

8.3	Specific Guidelines for Embodiment Design	154
8.4	General Guidelines for Embodiment Design	159
8.5	<i>Embodiment Design Checklist and Work Sheet</i>	169
8.6	<i>Tips for Management</i>	176
9	Final Design: Detail Design for Manufacture	177
9.1	The Importance of Detail Design	177
9.2	The Design Manager and Detail Design	178
9.3	Quality Assurance	178
9.4	Interaction of Shape, Materials, and Manufacture	180
9.5	Manufacturing Drawings and Information	189
9.6	Standard Components	190
9.7	Assembly	190
9.8	Testing and Commissioning	191
9.9	<i>Detail Design Checklist and Work Sheet</i>	197
9.10	<i>Tips for Management</i>	204
10	Users and Customers: Design Feedback	205
10.1	Expectations	205
10.2	Use and Abuse	206
10.3	Maintenance	208
10.4	Litigation	208
10.5	<i>Design Quality Assessment Work Sheet</i>	211
10.6	<i>Tips for Management</i>	212
11	Standards and Codes	217
11.1	General Issues	217
11.2	Basic Definitions	218
11.3	Safety Standards	220
11.4	Some Reference Articles on Safety Standards	221
11.5	Some Reference Articles on International Standards	221
11.6	ISO 9000 International Standards for Quality Management	222
11.7	National Standards for Engineering Design Management	222
11.8	<i>Tips for Management</i>	223
11.9	<i>Contact Information and URLs for Standards and Codes</i>	223
12	Engineering Design Process: Review and Analysis	233
12.1	Summary	233
12.2	Forensic Analysis of Engineering Design Issues	235
12.3	Analysis of the Engineering Design Process	236
