1 Ear	1	Clinical Aspects of Diseases of the External Ear	49
Applied Anatomy and Physiology	1	Congenital Anomalies	49
Embryology	1	Reconstructive Operations on the Auricle	49
Basic Anatomy	1	Inflammations of the External Ear	50
External Ear	2	Nonspecific Inflammation	50
Middle Ear and Pneumatic System	3	Specific Forms of Inflammation of the	
Inner Ear, Peripheral Hearing, and Balance		External Ear	51
Organs	8	Chronic Inflammation	53
Central Connections of the Organ of Corti ..	11	Otomycosis and Eczema	53
Central Connections of the Organ of the		Trauma	54
Balance Mechanism	11	Wax and Foreign Bodies	55
Facial Nerve	13	Tumors	56
Physiology and Pathophysiology of Hearing		Benign Tumors	56
and Balance	14	Precancerous and Malignant Tumors	56
Physiology of Hearing: Middle and Internal Ear.	14	Clinical Aspects of Diseases of the Middle	
Physiology of Hearing: Retrocochlear		and Internal Ear	58
Analysis of Acoustic Information	17	Disorders of Ventilation and Drainage of the	
Pathophysiologic Basis of Hearing Disorders ..	17	Middle Ear Spaces	58
Physiology of the Balance System	18	Nonspecific Inflammation of the Middle Ear	
Pathophysiologic Basis of Functional Vestibular		and Mastoid	61
Disorders	20	Specific Types of Inflammation of the Middle Ear	
Methods of Investigation	21	and Mastoid	64
Inspection, Palpation, Otoscopy, Microscopy ..	21	Otogenic Infective Complications	76
Inspection of the External Ear	21	Specific Diseases of the Middle Ear and	
Diagnostic Imaging	24	Mastoid Process	81
Conventional Radiography	24	Noninflammatory Diseases of the	
Computed Tomography	24	Labyrinthine Capsule	81
Angiography	24	Trauma of the Middle and Inner Ear	84
Magnetic Resonance Imaging	26	Tumors of the Middle and Internal Ear,	
Functional Assessment of the Eustachian Tube ..	26	Vestibulocochlear Nerve, and Facial Nerve	89
Qualitative Assessment of Tubal Function	26	Congenital Anomalies of the Middle and	
Hearing Investigations	27	Internal Ear	94
Testing Hearing without an Audiometer	27	Clinical Aspects of Cochleovestibular Disorders	95
Audiometry: Fundamental Physical and		Toxic Damage to the Hearing and	
Acoustic Concepts	27	Balance Apparatus	95
Pure-tone Audiometry	27	Ototoxic Drugs	95
Speech Audiometry	32	Ototoxic Occupational Toxins	96
Objective Hearing Tests	35	Inflammatory Lesions of the Hearing and	
Hearing Tests in Infants and Young Children ..	40	Balance Apparatus	96
Vestibular Function Tests	41	Immunologic Diseases of the Inner Ear	97
Case History	41	Trauma	97
Vestibulospinal Reflexes	42	Vestibular Disorders	97
Spontaneous and Provoked Nystagmus	42	Hearing Disorders	101
Experimental Tests of the Vestibular System ..	45		
Investigation of the Facial Nerve	47		

Clinical Aspects of Central Hearing Disorders	104	Facial Neuralgias	171
Rehabilitation of Hearing Disorders with Hearing Aids	106	Principles of Surgery of the Paranasal Sinuses	171
Pediatric Hearing Disorders (Pediatric Audiology)	107	Rhinosinusitis in Children	180
Clinical Aspects of Disorders of the Facial Nerve	111	Fungal Diseases of the Paranasal Sinuses	182
Synopsis of Ear Symptoms	114	Pathophysiologic Relationship between the Sinuses and the Rest of the Body	184
		Mucoceles and Cysts	184
		Complications of Sinus Infections	186
2 Nose, Nasal Sinuses, and Face	116	Epistaxis	191
Applied Anatomy and Physiology	116	Diseases of the Septum	197
Basic Anatomy	116	Trauma to the Nose, Paranasal Sinuses, and Facial Skeleton	201
External Nose	116	Trauma of the Middle Third of the Face and the Sinuses	203
Nasal Cavity	117	Congenital Anomalies and Deformities of the Nose	210
Paranasal Sinuses	120	Congenital Anomalies of the Nose	210
Basic Physiology and Pathophysiology	124	Disorders of Shape of the External Nose	212
The Nose as an Olfactory Organ	124	Basic Plastic Reconstruction Procedures in the Head and Neck	215
The Nose as a Respiratory Organ	126	Tumors of the Nose and Sinuses	218
The Nasal Mucosa as a Protective Organ	127	Benign Tumors	218
The Nose as a Reflex Organ	127	Malignant Tumors of the External Nose	222
Influence of the Nose on Speech	128	Malignant Tumors of the Nasal Cavity and Nasal Sinuses	225
Function of the Nasal Sinuses	128	Principles of Management of Malignant Tumors of the Nose and Paranasal Sinuses	226
Methods of Examining the Nose, Paranasal Sinuses, and Face	129		
External Inspection and Palpation	129	3 Mouth and Pharynx	228
Anterior Rhinoscopy	129	Applied Anatomy and Physiology	228
Posterior Rhinoscopy	131	Basic Anatomy	228
Nasal Endoscopy	132	Oral Cavity	228
Assessment of Nasal Patency	135	Nasopharynx, Oropharynx, and Hypopharynx	231
Olfactometry	136	Lymphoepithelial System of the Pharynx	233
Diagnostic Imaging of the Nose and Sinuses	136	Physiologic and Pathophysiologic Principles	235
Lavage of the Sinuses	138	Eating, Preparation of Food, and Swallowing	235
Specific Diagnostic Methods	140	Taste	237
Dermatologic Principles for the Otolaryngologist	140	Function of the Tonsils	237
Skin Type	140	Formation of Sound and Speech	239
Types of Lesion	141	Methods of Investigation	239
Basics of Topical Dermatologic Therapy	141	Inspection, Palpation, and Examination with the Mirror	239
Clinical Aspects of Diseases of the Nose, Sinuses, and Face	144	Endoscopy	241
Inflammatory Diseases of the Nose and Paranasal Sinuses	145	Imaging Studies	241
Inflammations Confined Mainly to the External Nose	145	Examination of the Saliva	242
Acute and Chronic Inflammations Localized Mainly in the Nasal Cavity	149	Gustometry	242
Local Conservative Treatment in the Upper Respiratory and Digestive Tracts	158	Specific Diagnostic Procedures	243
Acute and Chronic Rhinosinusitis	159	Clinical Aspects of Diseases of the Mouth and Pharynx	243
Rhinogenous Headache	170	Hyperplasia of the Lymphoepithelial Organs	243

Dysphagia	245	5 Voice, Speech, and Language	330
Inflammatory Diseases	247	Voice	330
Labial and Oral Mucosa	247	Voice Production	330
Tongue	256	Glottal Sound Generation	330
Pharyngeal Lymphatic Ring (Waldeyer Ring)	260	Body-cover Model	330
Other Pharyngeal Inflammations	273	Source-filter Theory	331
Other Pharyngeal Diseases	276	Voice Diagnosis	332
Basic Conservative Treatment of the Mucosa	277	Functional Voice Disorders	334
Trauma in the Mouth and Pharynx	277	Speech	336
Neurogenic Disorders	279	Language	338
Hypopharyngeal Diverticulum (Zenker Diverticulum)	279	6 Tracheobronchial Tree	344
Anomalies of the Mouth and Pharynx	280	Applied Anatomy and Physiology	344
Tumors of the Mouth and Pharynx	282	Basic Anatomy	344
Benign Tumors of the Oral Cavity, Including the Tongue and Oropharynx	282	Basic Physiology	344
Malignant Tumors of the Oral Cavity, Including Lip, Tongue, and Oropharynx	282	Methods of Investigation	345
Benign Tumors of the Nasopharynx	288	Tracheobronchoscopy	345
Malignant Tumors of the Nasopharynx	289	Clinical Aspects	347
Tumors of the Hypopharynx	290	Stenoses	347
Obstructive Sleep-related Breathing Disorders	290	Tracheotomy, Cricothyrotomy, and Intubation	351
4 Larynx and Hypopharynx	293	Foreign Bodies and Trauma	357
Larynx—Applied Anatomy and Physiology	293	Infections	358
Basic Anatomy and Physiology	293	Congenital and Hereditary Anomalies	358
Embryology	293	Tumors	359
Anatomy	293	Benign Tracheal Tumors	359
Physiology	296	Malignant Tracheal Tumors	359
Methods of Examination	297	7 Esophagus	361
Inspection	297	Applied Anatomy	361
Palpation	297	Physiology and Pathophysiology	362
Laryngoscopy	298	Investigation Methods	362
Indirect Laryngoscopy	298	Clinical Examination	362
Flexible Nasendoscopy	298	Diagnostic Imaging	362
Rigid Endoscopy of the Larynx	299	Esophagoscopy	363
Microlaryngoscopy	299	Manometry	364
Diagnostic Imaging	300	Clinical Aspects	365
Stroboscopy	300	Trauma	365
Other Special Techniques	301	Esophageal Diverticulum	368
Clinical Aspects	301	Inflammations	370
Congenital Anomalies	301	Motility Disorders	370
Organic Functional Disorders	302	Esophageal Involvement in Diseases of Neighboring Organs	372
Trauma	308	Congenital Anomalies and Fistulas	372
Inflammation	313	Tumors of the Esophagus	373
Tumors	318	Benign Tumors	373
Benign Tumors	318	Malignant Tumors	373
Malignant Tumors	321		
Hypopharynx	328		
Hypopharyngeal Carcinoma	328
