General Pharmacology

1

History of Pharmacology	2	Drug Metabolism by Cytochrome P450	38
The Idea	2	Enterohepatic Circulation	40
The Impetus	2	Conjugation Reactions	40
Early Beginnings	3	The Kidney as an Excretory Organ	42
Foundation	3	Presystemic Elimination	44
Consolidation—General Recognition Status Quo	3	Pharmacokinetics	46
Drug Sources	4	Drug Concentration in the Body as a Function of Time—First Order (Exponential) Rate Processes	46
Drug and Active Principle	4	Time Course of Drug Concentration in Plasma	48
The Aims of Isolating Active Principles	4	Time Course of Drug Plasma Levels during Repeated Dosing	50
Plants as Sources of Effective Medicines	6	Time Course of Drug Plasma Levels during Irregular Intake	50
Drug Development	8	Accumulation: Dose, Dose Interval, and Plasma Level Fluctuation	52
Congeneric Drugs and Name Diversity	10	Change in Elimination Characteristics during Drug Therapy	52
Drug Administration	12	Quantification of Drug Action	54
Oral Dosage Forms	12	Dose–Response Relationship	54
Drug Administration by Inhalation	14	Concentration–Effect Relationship	56
Dermatological Agents	16	Concentration–Effect Curves	56
Skin Protection	16	Drug–Receptor Interaction	58
Dermatological Agents as Vehicles	16	Concentration–Binding Curves	58
From Administration to Distribution in the Body	18	Types of Binding Forces	60
Cellular Sites of Action	20	Covalent Bonding	60
Potential Targets of Drug Action	20	Noncovalent Bonding	60
Distribution in the Body	22	Agonists—Antagonists	62
External Barriers of the Body	22	Models of the Molecular Mechanism of Agonist/Antagonist Action	62
Blood–Tissue Barriers	24	Other Forms of Antagonism	62
Membrane Permeation	26	Enantioselectivity of Drug Action	64
Drug Transporters	28	Receptor Types	66
Possible Modes of Drug Distribution	30	Mode of Operation of G-Protein-coupled Receptors	68
Binding to Plasma Proteins	32	Time Course of Plasma Concentration and Effect	70
Drug Elimination	34		
The Liver as an Excretory Organ	34		
Biotransformation of Drugs	36		

Adverse Drug Effects	72	Genetic Variation of Drug Effects	80
Adverse Drug Effects, Side Effects	72	Pharmacogenetics	80
Causes of Adverse Effects	72		
Drug Allergy	74	Drug-independent Effects	82
Cutaneous Reactions	76	Placebo	82
Drug Toxicity in Pregnancy and Lactation	78		

Systems Pharmacology

85

Drugs Acting on the Sympathetic Nervous System	86	Vasodilators	120
Sympathetic Nervous System	86	Vasodilators—Overview	120
Structure of the Sympathetic Nervous System	88	Organic Nitrates	122
Adrenergic Synapse	88	Calcium Antagonists	124
Adrenoceptor Subtypes and Catecholamine Actions	90	Dihydropyridine Derivatives	124
Smooth Muscle Effects	90	Verapamil and Other Catamphiphilic Ca ²⁺ Antagonists	124
Cardiostimulation	90	Inhibitors of the Renin–Angiotensin–Aldosterone System	126
Metabolic Effects	92		
Receptor Desensitization	92	Drugs Acting on Smooth Muscle	128
Structure–Activity Relationships of Sympathomimetics	94	Drugs Used to Influence Smooth-Muscle Organs	128
Indirect Sympathomimetics	96		
α-Sympathomimetics, α-Sympatholytics	98	Cardiac Drugs	130
α-Sympathomimetics	98	Cardiac Glycosides	132
β-Sympatholytics	98	Antiarrhythmic Drugs	134
β-Sympatholytics	100	Drugs for Selective Control of Sinoatrial and AV Nodes	134
Drugs Acting on the Parasympathetic Nervous System	102	Nonspecific Drug Actions on Impulse Generation and Propagation	134
Parasympathetic Nervous System	102	Electrophysiological Actions of Antiarrhythmics of the Na ⁺ Channel-blocking Type	136
Cholinergic Synapse	104		
Parasympathomimetics	106	Antianemics	138
Parasympatholytics	108	Drugs for the Treatment of Anemias	138
Biogenic Amines	112	Erythropoiesis	138
Dopamine	112	Vitamin B ₁₂	138
Histamine Effects and Their Pharmacological Properties	114	Folic Acid	138
Serotonin	116	Iron Deficiency Anemia	140
Occurrence and Functions	116	Antithrombotics	142
Promoters of Serotonin Effects	116	Prophylaxis and Therapy of Thrombosis	142
Serotonin Inhibitors	116		
Substance P	118		
Amino Acids	118		

Vitamin K Antagonists and Vitamin K.	144	Nonsteroidal Anti-inflammatory Drugs (NSAIDs)	184
Possibilities for Interaction	144	Cyclooxygenase (COX) Inhibitors	186
Heparin	146	Local Anesthetics	188
Hirudin and Derivatives	146	Opioids = Opiates	194
Fibrinolytics	148	Drugs Acting on the Central Nervous System	200
Inhibitors of Platelet Aggregation	150	General Anesthesia and General Anesthetic Drugs	200
Presystemic Effect of ASA.	150	Inhalational Anesthetics	202
Plasma Volume Expanders	152	Injectable Anesthetics	204
Drugs Used in Hyperlipoproteinemias	154	Benzodiazepines	206
Lipid-lowering Agents	154	Benzodiazepine Antagonist.	206
Diuretics	158	Pharmacokinetics of Benzodiazepines	208
Diuretics—An Overview	158	Therapy of Depressive Illness	210
NaCl Reabsorption in the Kidney	160	Mania	214
Aquaporins (AQP)	160	Agents to Treat Manic States.	214
Osmotic Diuretics	160	Therapy of Schizophrenia	216
Diuretics of the Sulfonamide Type.	162	Neuroleptics	216
Potassium-sparing Diuretics	164	Hormones.	220
Vasopressin and Derivatives	164	Hypothalamic and Hypophyseal Hormones	220
Water and Electrolyte Disorders	166	Thyroid Hormone Therapy	222
Disorders of Na ⁺ Homeostasis	166	Hyperthyroidism and Antithyroid Drugs	224
Disorders of K ⁺ Homeostasis	166	Glucocorticoid Therapy	226
Gastrointestinal Tract.	168	Replacement Therapy.	226
Therapy of Gastric and Duodenal Ulcers	168	Pharmacodynamic Therapy with Glucocorticoids	226
Treatment of Hyperacidity.	168	Androgens, Anabolic Steroids, Antiandrogens	230
Laxatives	168	Inhibitory Principles	230
Antidiarrheal Agents	172	Follicular Growth and Ovulation, Estrogen and Progestin Production	232
Drugs Affecting the Motor System	174	Oral Contraceptives	234
Drugs Affecting Motor Function	174	Antiestrogen and Antiprogestin Active Principles	236
Central Muscle Relaxants and Toxins.	174	Aromatase Inhibitors	238
Muscle Relaxants	176	Diabetes Mellitus.	240
Depolarizing Muscle Relaxants	176	Variations in Dosage Form	240
Nondepolarizing Muscle Relaxants	178	Variation in Amino Acid Sequence.	240
Influencing the Contractile System	178	Treatment of Insulin-dependent Diabetes Mellitus.	242
Drugs for the Suppression of Pain (Analgesics)	180	Undesirable Effects	242
Pain Mechanisms and Pathways	180	Treatment of Type II Diabetes Mellitus	244
Eicosanoids	182	Oral Antidiabetics	246
Antipyretic Analgesics vs. NSAIDs	184	Drugs for Maintaining Calcium Homeostasis	248

Antibacterial Drugs	250	Anticancer Drugs	280
Drugs for Treating Bacterial Infections	250	Chemotherapy of Malignant Tumors	280
Inhibitors of Cell Wall Synthesis	252	Interference with Cell Proliferation	
Pore Formers.	256	Signaling Pathways	284
Inhibitors of Tetrahydrofolate		Special Antineoplastic Drug Actions	286
Synthesis	256	Mechanisms of Resistance to	
Inhibitors of DNA Function	258	Cytostatics	286
Inhibitors of Protein Synthesis	260	Immune Modulators	288
Drugs for Treating Mycobacterial		Inhibition of Immune Responses	288
Infections	264	Calcineurin Inhibitors, Sirolimus	290
Antitubercular Drugs	264	Antidotes	292
Antileprotic Drugs.	264	Inhibitors of Leukocyte Migration	292
Antifungal Drugs	266	Antidotes and Treatment of	
Drugs Used in the Treatment of		Poisonings	294
Fungal Infections	266	“Recreational” Drugs	298
Antiviral Drugs	268	Psychotomimetics (Psychedelics,	
Pharmacotherapy of Viral Infections	268	Hallucinogens)	298
Drugs for the Treatment of HIV	272	Actions of Nicotine.	300
Inhibitors of Reverse		Localization of Nicotinic ACh	
Transcriptase—Nucleoside Agents.	272	Receptors	300
Nonnucleoside Inhibitors.	272	Effects of Nicotine on Body Function	300
HIV protease Inhibitors.	272	Aids for Smoking Cessation	300
Reserve Drugs	272	Consequences of Tobacco Smoking	302
Antiparasitic Drugs	274	Alcohol Abuse	304
Drugs for Treating Endoparasitic			
and Ectoparasitic Infestations	274		
Antimalarials	276		
Other Tropical Diseases	278		

Therapy of Selected Diseases

307

Hypertension.	308	Sleep Disorders and Hypnotics	330
Angina Pectoris	310	Local Treatment of Glaucoma	332
Antianginal Drugs	312	Osteoporosis	334
Acute Coronary Syndrome—		Gout	336
Myocardial Infarction	314	Obesity—Sequelae and	
Congestive Heart Failure	316	Therapeutic Approaches.	338
Septic Shock	318	Atopy and Antiallergic Therapy.	340
Antiparkinsonian Drugs.	320	Bronchial Asthma	342
Antiepileptics.	322	Rheumatoid Arthritis	344
Treatment of Migraine	326	Chronic Inflammatory Bowel Disease	346
Emesis.	328
