Contents

1 Classes of Random Trees 1
1.1 Basic Notions 2
1.1.1 Rooted Versus Unrooted trees 2
1.1.2 Plane Versus Non-Plane trees 3
1.1.3 Labelled Versus Unlabelled Trees 3
1.2 Combinatorial Trees 4
1.2.1 Binary Trees 5
1.2.2 Planted Plane Trees 6
1.2.3 Labelled Trees 7
1.2.4 Labelled Plane Trees 8
1.2.5 Unlabelled Trees 8
1.2.6 Unlabelled Plane Trees 9
1.2.7 Simply Generated Trees – Galton-Watson Trees 9
1.3 Recursive Trees 13
1.3.1 Non-Plane Recursive Trees 13
1.3.2 Plane Oriented Recursive Trees 14
1.3.3 Increasing Trees 15
1.4 Search Trees 17
1.4.1 Binary Search Trees 18
1.4.2 Fringe Balanced m-Ary Search Trees 19
1.4.3 Digital Search Trees 21
1.4.4 Tries and Patricia Tries 22

2 Generating Functions 25
2.1 Counting with Generating Functions 26
2.1.1 Generating Functions and Combinatorial Constructions 27
2.1.2 Pólya's Theory of Counting 33
2.1.3 Lagrange Inversion Formula 36
2.2 Asymptotics with Generating Functions 37
2.2.1 Asymptotic Transfers 38
2.2.2 Functional Equations 43

2.2.3 Asymptotic Normality and Functional Equations 46
2.2.4 Transfer of Singularities 54
2.2.5 Systems of Functional Equations 62

3 Advanced Tree Counting 69
3.1 Generating Functions and Combinatorial Trees 70
3.1.1 Binary and m-Ary Trees 70
3.1.2 Planted Plane Trees 71
3.1.3 Labelled Trees 73
3.1.4 Simply Generated Trees – Galton-Watson Trees 75
3.1.5 Unrooted Trees 77
3.1.6 Trees Embedded in the Plane 81
3.2 Additive Parameters in Trees 82
3.2.1 Simply Generated Trees – Galton-Watson trees 84
3.2.2 Unrooted Trees 87
3.3 Patterns in Trees 90
3.3.1 Planted, Rooted and Unrooted Trees 91
3.3.2 Generating Functions for Planted Rooted Trees 92
3.3.3 Rooted and Unrooted Trees 99
3.3.4 Asymptotic Behavior 101

4 Planar Graphs 107
4.1 Basic Notions 108
4.2 Counting Planar Graphs 110
4.2.1 Outerplanar Graphs 110
4.2.2 Series-Parallel Graphs 118
4.2.3 Quadrangulations and Planar Maps 123
4.2.4 Planar Graphs 130
4.3 Outerplanar Graphs 137
4.3.1 The Degree Distribution of Outerplanar Graphs 137
4.3.2 Vertices of Given Degree in Dissections 141
4.3.3 Vertices of Given Degree in 2-Connected Outerplanar Graphs 146
4.3.4 Vertices of Given Degree in Connected Outerplanar Graphs 147
4.4 Series-Parallel Graphs 150
4.4.1 The Degree Distribution of Series-Parallel Graphs 150
4.4.2 Vertices of Given Degree in Series-Parallel Networks 156
4.4.3 Vertices of Given Degree in 2-Connected Series-Parallel Graphs 158
4.4.4 Vertices of Given Degree in Connected Series-Parallel Graphs 160
4.5 All Planar Graphs 162
4.5.1 The Degree of a Rooted Vertex 162
4.5.2 Singular Expansions 166

4.5.3 Degree Distribution for Planar Graphs 170
4.5.4 Vertices of Degree 1 or 2 in Planar Graphs 174

5 The Shape of Galton-Watson Trees and Pólya Trees 179
5.1 The Continuum Random Tree 180
5.1.1 Depth-First Search of a Rooted Tree 180
5.1.2 Real Trees 181
5.1.3 Galton-Watson Trees and the Continuum Random Tree 183
5.2 The Profile of Galton-Watson Trees 187
5.2.1 The Distribution of the Local Time 190
5.2.2 Weak Convergence of Continuous Stochastic Processes . 192
5.2.3 Combinatorics on the Profile of Galton-Watson Trees . . 197
5.2.4 Asymptotic Analysis of the Main Recurrence 198
5.2.5 Finite Dimensional Limiting Distributions 201
5.2.6 Tightness 206
5.2.7 The Height of Galton-Watson Trees 211
5.2.8 Depth-First Search 221
5.3 The Profile of Pólya Trees 226
5.3.1 Combinatorial Setup 227
5.3.2 Asymptotic Analysis of the Main Recurrence 228
5.3.3 Finite Dimensional Limiting Distributions 236
5.3.4 Tightness 240
5.3.5 The Height of Pólya Trees 249

6 The Vertical Profile of Trees 259
6.1 Quadrangulations and Embedded Trees 260
6.2 Profiles of Trees and Random Measures 268
6.2.1 General Profiles 268
6.2.2 Space Embedded Trees and ISE 268
6.2.3 The Distribution of the ISE 273
6.3 Combinatorics on Embedded Trees 276
6.3.1 Embedded Trees with Increments ± 1 276
6.3.2 Embedded Trees with Increments $0, \pm 1$ 283
6.3.3 Naturally Embedded Binary Trees 285
6.4 Asymptotics on Embedded Trees 287
6.4.1 Trees with Small Labels 287
6.4.2 The Number of Nodes of Given Label 293
6.4.3 The Number of Nodes of Large Labels 298
6.4.4 Embedded Trees with Increments 0 and ± 1 303
6.4.5 Naturally Embedded Binary Trees 304
6.4.6 Comments on the General Case 304

7 Recursive Trees and Binary Search Trees 309
7.1 Permutations and Trees 310
7.1.1 Permutations and Recursive Trees 311
7.1.2 Permutations and Binary Search Trees 318
7.2 Generating Functions and Basic Statistics 319
7.2.1 Generating Functions for Recursive Trees 320
7.2.2 Generating Functions for Binary Search Trees 321
7.2.3 Generating Functions for Plane Oriented Recursive Trees 323
7.2.4 The Degree Distribution of Recursive Trees 325
7.2.5 The Insertion Depth 334
7.3 The Profile of Recursive Trees 337
7.3.1 The Martingale Method 338
7.3.2 The Moment Method 347
7.3.3 The Contraction Method 351
7.4 The Height of Recursive Trees 352
7.5 Profile and Height of Binary Search Trees 364
7.5.1 The Profile of Binary Search Trees and Related Trees . . 364
7.5.2 The Height of Binary Search Trees and Related Trees . . 373

8 Tries and Digital Search Trees 379
8.1 The Profile of Tries 380
8.1.1 Generating Functions for the Profile 380
8.1.2 The Expected Profile of Tries 383
8.1.3 The Limiting Distribution of the Profile of Tries 393
8.1.4 The Height of Tries 395
8.1.5 Symmetric Tries 396
8.2 The Profile of Digital Search Trees 397
8.2.1 Generating Functions for the Profile 398
8.2.2 The Expected Profile of Digital Search Trees 399
8.2.3 Symmetric Digital Search Trees 410

9 Recursive Algorithms and the Contraction Method 415
9.1 The Number of Comparisons in Quicksort 417
9.2 The L_2 Setting of the Contraction Method 422
9.2.1 A General Type of Recurrence 422
9.2.2 A general L_2 convergence theorem 424
9.2.3 Applications of the L_2 Setting 429
9.3 Limitations of the L_2 Setting and Extensions 433
9.3.1 The Zolotarev metric 434
9.3.2 Degenerate Limit Equations 435

Appendix 437
