

# Contents

Introduction . . . . .	1
<b>1. General considerations . . . . .</b>	<b>5</b>
1.1. The Golgi apparatus and main discoveries in the field of intracellular transport . . . . .	7
1.2. The Golgi apparatus as a crossroads in intracellular traffic . . . . .	16
<b>2. Main machineries operating at the Golgi apparatus . . . . .</b>	<b>41</b>
2.1. SNAREs . . . . .	43
2.2. Rabs . . . . .	66
2.3. COPII . . . . .	78
2.4. COPI: mechanisms and transport roles . . . . .	87
2.5. Arfs and Arls: models for Arf family members in membrane traffic at the Golgi . . . . .	106
2.6. COG complex . . . . .	120
2.7. The TRAPP complex . . . . .	130
2.8. The role of Ca <sup>2+</sup> in the regulation of intracellular transport . . . . .	143
2.9. Golgi glycosylation enzymes . . . . .	161
2.10. Nucleotide sugar transporters of the Golgi apparatus . . . . .	190
2.11. Luminal lectins . . . . .	207
2.12. The Golgi ribbon and the function of the golgins . . . . .	223
2.13. Functional cross talk between membrane trafficking and cell signalling . . . . .	247
2.14. The role of the cytoskeleton in the structure and function of the Golgi apparatus . . . . .	270
2.15. The dynamin–cortactin complex as a mediator of vesicle formation at the <i>trans</i> -Golgi network . . . . .	301
2.16. The geometry of organelles of the secretory pathway . . . . .	314
<b>3. Main transport steps . . . . .</b>	<b>331</b>
3.1. ER-to-Golgi transport . . . . .	333
3.2. Intra-Golgi transport . . . . .	342
3.3. Structure and domain organization of the <i>trans</i> -Golgi network . . . . .	358
3.4. Golgi-to-PM transport . . . . .	375
3.5. Protein transport from the <i>trans</i> -Golgi network to endosomes . . . . .	388

3.6.	The transport of soluble lysosomal hydrolases from the Golgi complex to lysosomes . . . . .	402
3.7.	Transport of lysosomal membrane proteins from the Golgi complex to lysosomes . . . . .	414
3.8.	Retrograde endosome-to-TGN transport . . . . .	425
3.9.	Retrograde plasma membrane-to-Golgi apparatus transport . . . . .	459
3.10.	Interactions between endocytosis and secretory transport . .	475
3.11.	Origins of the regulated secretory pathway . . . . .	485
3.12.	Secretion and endocytosis in endothelial cells . . . . .	520
3.13.	Formation of mucin granules . . . . .	535
3.14.	Golgi apparatus and epithelial cell polarity . . . . .	563
3.15.	Golgi apparatus inheritance . . . . .	580
<b>4.</b>	<b>Peculiarities of intracellular transport in different organisms . . . . .</b>	<b>609</b>
4.1.	Features of the plant Golgi apparatus . . . . .	611
4.2.	Yeast Golgi apparatus . . . . .	623
4.3.	Morphodynamics of the yeast Golgi apparatus . . . . .	630
4.4.	Structure and function of the Golgi organelle in parasitic protists . . . . .	647
4.5.	Evolution of the Golgi complex . . . . .	675
<b>5.</b>	<b>General conclusions . . . . .</b>	<b>693</b>
	Contributors in alphabetical order . . . . .	697
