# Contents

1	Extrusion Machinery . . . . .	1
1.1	What is an Extruder? . . . . .	1
1.2	Different Types of Extruders . . . . .	2
1.2.1	Single Screw Extruders . . . . .	2
1.2.2	Twin Screw Extruders . . . . .	2
1.2.2.1	Co-Rotating Twin Screw Extruders . . . . .	3
1.2.2.2	Counter-Rotating Twin Screw Extruders . . . . .	3
1.2.3	Ram Extruders . . . . .	4
1.3	Components of an Extruder . . . . .	5
1.3.1	The Extruder Screw . . . . .	5
1.3.2	The Extruder Barrel . . . . .	6
1.3.3	The Feed Throat . . . . .	6
1.3.4	The Feed Hopper . . . . .	7
1.3.5	Barrel Heating and Cooling . . . . .	8
1.3.6	Screw Heating and Cooling. . . . .	9
1.3.7	The Breaker Plate. . . . .	9
1.3.8	The Screen Pack . . . . .	10
1.3.8.1	Screen Changers . . . . .	11
1.3.9	The Extrusion Die . . . . .	13
1.3.9.1	Coextrusion Dies. . . . .	14
1.3.10	The Extruder Drive. . . . .	15
1.3.10.1	Coupling between Motor and Gearbox . . . . .	15
1.3.11	The Speed Reducer. . . . .	46
1.3.11.1	Thrust Bearing Assembly. . . . .	17
1.3.12	The Gear Pump. . . . .	18
2	Instrumentation and Control. . . . .	19
2.1	Instrumentation . . . . .	19
2.2	Most Important Process Parameters . . . . .	19
2.2.1	Melt Pressure . . . . .	20
2.2.2	Pressure Transducers . . . . .	21
2.2.3	Temperature Measurement. . . . .	22
2.2.4	Melt Temperature Measurement . . . . .	23
2.2.5	Barrel Temperature Measurement . . . . .	24
2.3	Temperature Control . . . . .	26
2.3.1	On-Off Control . . . . .	26
2.3.2	Proportional Control . . . . .	26
2.3.3	Fuzzy Logic Control . . . . .	29

3	Complete Extrusion Lines . . . . .	31
3.1	Tubing and Pipe Extrusion Lines. . . . .	31
3.2	Film and Sheet Lines Using the Roll Stack Process. . . . .	32
3.3	Film Lines Using Chill Roll Casting . . . . .	33
3.4	Combination of Materials . . . . .	34
3.4.1	Coextrusion . . . . .	35
3.4.2	Extrusion Coating . . . . .	36
3.4.3	Extrusion Lamination . . . . .	36
3.5	Blown Film Lines . . . . .	37
3.6	Extrusion Compounding Lines. . . . .	37
3.7	Profile Extrusion Lines . . . . .	39
4	Plastics and Their Properties Important in Extrusion . . . . .	41
4.1	Thermoplastics and Thermosets . . . . .	41
4.2	Amorphous and Semi-Crystalline Plastics . . . . .	42
4.3	Liquid Crystalline Plastics (LCPs) . . . . .	44
4.4	Elastomers . . . . .	44
4.5	Flow Behavior of Plastic Melts . . . . .	45
4.6	Melt Index . . . . .	46
4.7	The Effect of Shearing . . . . .	47
4.8	Shear Thinning or Pseudoplastic Behavior . . . . .	47
4.9	Effect of Temperature on Viscosity . . . . .	48
4.10	Viscous Heat Generation . . . . .	49
4.11	Thermal Properties . . . . .	49
4.11.1	Thermal Conductivity . . . . .	50
4.11.2	Specific Heat and Enthalpy . . . . .	51
4.11.3	Thermal Stability and Induction Time . . . . .	52
4.11.4	Density . . . . .	53
4.11.5	Melting Point. . . . .	54
4.11.6	Glass Transition Temperature . . . . .	55
5	How an Extruder Works . . . . .	57
5.1	Solids Conveying . . . . .	58
5.1.1	Gravity Induced Conveying . . . . .	58
5.1.2	Drag Induced Conveying . . . . .	61
5.1.3	Starve Feeding . . . . .	62
5.1.4	Grooved Feed Extruders . . . . .	62
5.2	Melting . . . . .	65
5.2.1	Contiguous Solids Melting. . . . .	65
5.2.2	Dispersed Solids Melting. . . . .	66
5.3	Melt Conveying . . . . .	70
5.3.1	Melt Temperatures . . . . .	70
5.4	Mixing . . . . .	73
5.4.1	Distributive Mixing . . . . .	73

5.4.2	Mixing Sections . . . . .	78
5.4.2.1	Distributive Mixing Sections. . . . .	78
5.4.2.2	Dispersive Mixing Sections. . . . .	83
5.5	Degassing . . . . .	89
5.6	Die Forming. . . . .	92
5.6.1	Size and Shape Changes . . . . .	92
5.6.2	Tubing and Pipe Dies . . . . .	96
5.6.3	Flat Film and Sheet Dies. . . . .	98
5.6.4	Profile Dies . . . . .	101
6	How to Run an Extruder . . . . .	103
6.1	Introduction . . . . .	103
6.2	Before Start-up . . . . .	103
6.3	Getting Ready for a Run . . . . .	104
6.4	Starting the Extruder . . . . .	106
6.5	Actual Operation. . . . .	108
6.6	Shut-down. . . . .	109
6.6.1	Purging. . . . .	110
6.7	Safety Issues . . . . .	111
6.7.1	Heat. . . . .	111
6.7.2	Moving Parts . . . . .	111
6.7.3	Electrical . . . . .	112
6.7.4	Weights . . . . .	112
6.7.5	Pressure . . . . .	112
6.8	Inspection and Training . . . . .	113
7	How to Troubleshoot Extrusion Problems . . . . .	117
7.1	Objectives . . . . .	117
7.2	Prerequisites. . . . .	117
7.2.1	Good Instrumentation . . . . .	117
7.2.2	Good Understanding of the Process . . . . .	118
7.2.3	Collect and Analyze Historical Data . . . . .	118
7.2.4	Teamwork . . . . .	118
7.3	Main Types of Problems . . . . .	119
7.3.1	Output Problems. . . . .	119
7.3.1.1	Low Extruder Output. . . . .	119
7.3.1.2	Variation in Extruder Output . . . . .	121
7.3.2	Appearance Problems . . . . .	125
7.3.2.1	Lines . . . . .	125
7.3.2.2	Die Drool . . . . .	126
7.3.2.3	Discoloration and Degradation . . . . .	126
7.3.2.4	Voids . . . . .	128
7.3.2.5	Vent Flow . . . . .	128

	7.3.2.6 Air Entrapment . . . . .	129
	7.3.2.7 Gels . . . . .	129
	7.3.2.8 Poor Mixing . . . . .	130
	7.3.3 Functional Product Problems . . . . .	132
	7.3.4 High Melt Temperature . . . . .	132
	7.3.5 High Motor Load . . . . .	133
	7.3.6 Wear Problems. . . . .	134
7.4	Systematic Problem Solving. . . . .	135
7.5	Machine Troubleshooting and Maintenance. . . . .	137
	7.5.1 Check the Oil. . . . .	137
	7.5.2 Unusual Noises . . . . .	138
	7.5.3 Drive Motors and Belts. . . . .	139
	7.5.4 Spare Parts . . . . .	140
	7.5.5 Screw and Barrel. . . . .	140
	7.5.6 Extruder Maintenance Checklist . . . . .	141
7.6	Troubleshooting Lists . . . . .	145
8	New Developments in Extrusion and Methods to Increase Efficiency . .	151
	8.1 General Trends . . . . .	151
	8.2 High-Speed Extrusion . . . . .	151
	8.2.1 Melt Temperature . . . . .	151
	8.2.2 Extruders without Gear Reducer . . . . .	152
	8.2.3 Energy Consumption . . . . .	153
	8.2.4 Change-over Resin Consumption . . . . .	153
	8.2.5 Change-over Time and Residence Time. . . . .	154
	8.3 Multi-Strand Extrusion . . . . .	154
	8.4 Reducing Material Cost . . . . .	156
	8.4.1 Low Cost Filler . . . . .	156
	8.4.2 Recycled Plastics . . . . .	158
	8.4.3 Foamed Plastics . . . . .	158
	8.4.4 Pre-compounded Material vs. In-house Compounding . .	159
	8.4.5 Start-up, Change-over, and Shut-down . . . . .	159
	8.4.6 Polymer Processing Aids (PPA). . . . .	159
	8.5 Increased Automation . . . . .	162
	8.6 Efficient Extrusion . . . . .	162
	8.6.1 Instrumentation . . . . .	163
	8.6.2 Data Acquisition. . . . .	164
	8.6.3 Feed Stock Variability. . . . .	164
	8.6.4 Flood Feeding versus Starve Feeding. . . . .	165
	8.6.5 Purging . . . . .	166
	8.6.5.1 Melt Displacement Behavior . . . . .	166
	8.6.5.2 Effect of Viscosity Differences . . . . .	169
	8.6.5.3 Effect of Color . . . . .	170
	8.6.5.4 Dynamic versus Static Purging Methods . . . . .	172

8.6.5.5	Purging Agents . . . . .	174
8.6.5.6	Practical Rules to Reduce Purge Times . . . . .	175
8.6.6	Methods to Reduce Energy Consumption . . . . .	176
8.6.6.1	Energy Requirement. . . . .	176
8.6.6.2	Energy Cost per Kilogram . . . . .	177
8.6.6.3	Energy Cost per Year . . . . .	177
8.6.6.4	Barrel Cooling . . . . .	177
8.6.6.5	Heat Loss at the Extrusion Die . . . . .	178
8.6.6.6	Melt Temperature . . . . .	178
8.6.6.7	Pre-Drying . . . . .	178
8.6.6.8	Use of Filled Plastics. . . . .	179
8.6.6.9	Tips to Reduce Energy Use in Extrusion. . . . .	179
8.6.7	Flexible Manufacturing . . . . .	180
8.7	Statistical Process Control (SPC) and Design of Experiments (DOE) . . . . .	183
8.8	Causes of Process Variation . . . . .	184
8.8.1	Melt Temperature Variation . . . . .	185
8.8.2	Melting Related Instabilities . . . . .	186
8.9	Grooved Feed Extrusion . . . . .	186
8.9.1	Adjustable Grooved Feed Extruder . . . . .	187
8.10	The Rotary Channel Pump (RCP) . . . . .	188
8.11	New Developments in Mixing and Screw Design . . . . .	188
8.11.1	Elongational Mixing Devices. . . . .	188
8.11.2	Barrier Screws with Elongational Mixing Action . . . . .	189
8.11.3	Floating Sleeve Intermeshing Pin Mixer . . . . .	190
8.11.4	High Heat Transfer (HHT) Screw Design Technology . . . . .	191
8.11.5	The Single Screw Compounding Extruder (SSCE). . . . .	192
8.12	Fiber Reinforced Plastics . . . . .	193
8.12.1	Conventional Methods to Make Fiber Reinforced Plastics . . . . .	193
8.12.2	Nexus Technology . . . . .	194
8.13	Conclusions . . . . .	195
Appendix 1 . . . . .		199
Appendix 2 Extrusion Theory. . . . .		201
Index . . . . .		209
