## 1 Epidemiology

<b>Introduction</b> . . . . .	2
<b>Definition</b> . . . . .	2
Gender-Specific Mortality Rates . . . . .	3
Morbidity and Mortality with Respect to Age and Gender . . . . .	4
Perception. . . . .	6
Mortality in Myocardial Infarction:	
Comparison Between Women and Men . . . . .	6
International Comparisons . . . . .	7
<b>The “MONItoring Cardiovascular Disease” Project of the WHO (WHO MONICA Project)</b> . . . . .	10

## 2 Cardiovascular Risk Factors and the Development of Coronary Heart Disease in Women

<b>Smoking</b> . . . . .	16
<b>Dyslipidemia</b> . . . . .	17
<b>Lipoprotein (a)</b> . . . . .	19
<b>Diabetes Mellitus</b> . . . . .	20
<b>Insulin Resistance and Polycystic Ovary Syndrome</b> . . . . .	21
<b>Family History of Coronary Heart Disease or Genetic Disposition</b> . . . . .	23
<b>Hypertension</b> . . . . .	23

<b>Sedentary Lifestyle</b> . . . . .	23
<b>Obesity</b> . . . . .	25
<b>Homocysteine</b> . . . . .	26
<b>High sensitivity C-reactive Protein</b> . . . . .	27
<b>Risk Factors Unique to Women</b> . . . . .	28
Menopause . . . . .	28
Oral Contraception. . . . .	29

### **3 Pathophysiology of Coronary Heart Disease and the Effects of Estrogen**

<b>Basics</b> . . . . .	36
Plaque Formation and Significance of Plaques in CHD. . . . .	36
<b>Effects of Estrogen</b> . . . . .	38
Effect of Estrogen on Vascular Reactivity and Endothelial Function . . . . .	39
Effect of Estrogen on Lipid Metabolism . . . . .	41
Antioxidative Effect of Estrogen . . . . .	42
Effect of Estrogen on Inflammation . . . . .	43
Effect of Estrogen on Hemostasis . . . . .	43

### **4 Stable Angina**

<b>Definition and Pathophysiology of Angina Pectoris</b> . . . . .	48
<b>Diagnosis Based on Symptoms</b> . . . . .	49
Prinzmetal's or Variant Angina . . . . .	50
Syndrome X. . . . .	51
<b>Diagnostic Evaluation</b> . . . . .	52
Electrocardiogram . . . . .	52

## Contents

Stress Testing, Including Stress Echocardiography and Nuclear Imaging . . . . .	52
<i>Determination of Pretest Probability for CHD</i> . . . . .	52
<i>Selection of Stress Test</i> . . . . .	53
<i>Stress ECG</i> . . . . .	53
<i>Nuclear Imaging</i> . . . . .	55
<i>Stress Echocardiography</i> . . . . .	56
<i>Pharmacological Stress Tests</i> . . . . .	58
Electron Beam Computed Tomography . . . . .	61
Magnetic Resonance Imaging . . . . .	61
Diagnostic Cardiac Catheterization . . . . .	61
Gender Differences in the Use of Diagnostic Cardiac Catheterizations and Percutaneous Coronary Intervention . . . . .	62
<b>Medical Management</b> . . . . .	64
Beta-blockers . . . . .	64
Nitrate . . . . .	66
Calcium Channel Blockers . . . . .	66
<b>Percutaneous Coronary Intervention for Stable Angina</b> . . . . .	67
Gender-Specific Success and Complication Rates for Balloon Angioplasty . . . . .	69
Gender-Specific Success and Complication Rates for Coronary Intervention with Stent Implantation . . . . .	71
Restenosis . . . . .	74
Rotablator Therapy, Directional Coronary Atherectomy, Laser Therapy . . . . .	74
Multivessel Coronary Intervention – When PCI? When Bypass Surgery? . . . . .	75
<b>5 Acute Myocardial Infarction</b>	
<b>Progression from Stable Coronary Heart Disease to Myocardial Infarction</b> . . . . .	84
<b>Epidemiology of Acute Myocardial Infarction</b> . . . . .	85
<b>Pathophysiology</b> . . . . .	87

## XII    Contents

<b>Clinical Presentation of Acute Myocardial Infarction . . . . .</b>	89
Silent Myocardial Infarction . . . . .	89
Symptomatic Myocardial Infarction . . . . .	90
<b>Criteria for the Diagnosis of Acute Myocardial Infarction . . . . .</b>	90
Clinical Presentation . . . . .	90
Electrocardiogram . . . . .	91
Serum Markers of Cardiac Damage . . . . .	91
Creatine Kinase and the CK Isoenzyme CK-MB . . . . .	91
Troponin T and I . . . . .	92
<b>Therapy . . . . .</b>	92
Revascularization . . . . .	93
<i>Thrombolytic Therapy</i> . . . . .	93
<i>Primary Percutaneous Transluminal Coronary Angioplasty</i> . . . . .	94
<i>Thrombolysis Versus Primary PTCA</i> . . . . .	96
<i>Rescue PTCA after Thrombolysis of Acute Myocardial Infarction</i> . . . . .	97
Medical Therapy of Acute Myocardial Infarction . . . . .	98
<i>Aspirin</i> . . . . .	99
<i>Beta-blockers</i> . . . . .	99
<i>Unfractionated Heparin</i> . . . . .	99
<i>Calcium Channel Blockers</i> . . . . .	100
<i>ACE Inhibitors</i> . . . . .	100
<i>Nitrates</i> . . . . .	100
<b>Complications . . . . .</b>	101
<b>Prognosis . . . . .</b>	102
Mortality in Acute Myocardial Infarction (With and Without Thrombolysis) . . . . .	103
Mortality in the Pre-thrombolytic Era (Mid-1960s to Early-1980s) . . . . .	105
Mortality in the Thrombolytic Era (1980 to Present) . . . . .	105

## Contents

<b>Influence of Gender on the Referral for Coronary Angiography in Patients with Acute Myocardial Infarction . . . . .</b>	107

## 6 Acute Coronary Syndromes

<b>Non-ST-Elevation Myocardial Infarction/Unstable Angina . . . . .</b>	116
<b>Definition . . . . .</b>	118
<b>Presentation . . . . .</b>	118
<b>Diagnosis . . . . .</b>	119
<b>Therapy. . . . .</b>	120
Medical Therapy . . . . .	120
<i>Aspirin . . . . .</i>	120
<i>Unfractionated Heparin . . . . .</i>	121
<i>Low-Molecular-Weight Heparin . . . . .</i>	121
<i>Glycoprotein IIb/IIIa Receptor Antagonists . . . . .</i>	122
<i>Nitrates . . . . .</i>	127
<i>Beta-blocker. . . . .</i>	127
<i>Calcium Channel Blocker . . . . .</i>	127
Interventional Therapy . . . . .	127

## 7 Coronary Artery Bypass Surgery

<b>Operative Mortality . . . . .</b>	134
<b>Complications Associated with CABG . . . . .</b>	138
<b>Long-Term Outcomes . . . . .</b>	139
<b>Indication for CABG Surgery . . . . .</b>	140
<b>Comparison of CABG with Multivessel Angioplasty . . . . .</b>	141

## 8 Primary and Secondary Prevention of Coronary Heart Disease

<b>Class I Interventions . . . . .</b>	148
Treatment of Hyperlipidemia . . . . .	148
<i>Diet . . . . .</i>	149
<i>Medical Therapy of Dyslipidemia . . . . .</i>	151
<i>Primary Prevention Trials . . . . .</i>	151
<i>Primary Prevention with Estrogen . . . . .</i>	151
<i>Secondary Prevention Trials with Statins. . . . .</i>	152
<i>Secondary Prevention Trials with Medications Other Than Statins. . . . .</i>	154
Treatment of Hypertension . . . . .	155
Aspirin . . . . .	160
<i>Primary Prevention of CAD with Aspirin. . . . .</i>	160
<i>Secondary Prevention with Aspirin . . . . .</i>	160
<b>Class II Interventions . . . . .</b>	161
Physical Activity . . . . .	161
<i>Primary Prevention Studies . . . . .</i>	162
<i>Secondary Prevention Studies . . . . .</i>	162
Weight Reduction . . . . .	164
Alcohol . . . . .	164
<b>Class III Interventions . . . . .</b>	166
Antioxidants . . . . .	166
<i>Vitamins E and C. . . . .</i>	166
<i>Beta-carotene. . . . .</i>	168

## 9 Hormone Replacement Therapy

<b>Hormone Replacement Therapy and Prevention of Coronary Heart Disease . . . . .</b>	176
<b>Observational Studies for Primary and Secondary Prevention . . . . .</b>	177
<b>Randomized Primary Prevention Trials . . . . .</b>	178

**Contents**

<b>Randomized Secondary Prevention Trials . . . . .</b>	180
<b>Clinical Implications of Hormone Replacement Therapy . . . . .</b>	185
Combination Therapy . . . . .	187
Risk of Breast Cancer with HRT. . . . .	187
Risk of Ovarian Cancer with HRT . . . . .	190
Risk of Endometrial Cancer with HRT . . . . .	190
Risk of Deep Vein Thrombosis and Thromboembolic Events . .	191
Estrogen and High Sensitivity C-reactive Protein . . . . .	192
<b>Biological Mechanisms of Hormone Replacement Therapy . . . . .</b>	193
Lipids and Antioxidant Effects of Estrogen . . . . .	193
Glucose Metabolism . . . . .	194
Hemostasis . . . . .	195
Vascular Reactivity. . . . .	195
Impact on Markers of Inflammation . . . . .	196
Selective Estrogen Receptor Modulators . . . . .	196
Soy Protein . . . . .	198

## 10 Future Directions
