Table of Contents

1. Point Processes 1
- 1.1 General Definitions 2
- 1.2 Poisson Processes 5
- 1.3 Poisson Point Processes on the Real Line 16
- 1.4 Renewal Point Processes 22

2. $GI/GI/1$ FIFO Queues and Random Walks 29
- 2.1 General results on $GI/GI/1$ FIFO Queues 29
- 2.2 Wiener-Hopf Factorization 33
- 2.3 Applications to the $GI/GI/1$ Queue 37
- 2.4 $GI/M/1$ and $M/GI/1$ Queues 43
- 2.5 The $H_1/G/1$ Queue 50
- 2.6 A Probabilistic Proof 52

3. Limit Theorems for $GI/GI/1$ Queues 57
- 3.1 Introduction 57
- 3.2 The Biased Random Walk 58
- 3.3 The Tail Distribution of W 63
- 3.4 The Maximum of a Busy Period 67
- 3.5 The $GI/GI/1$ Queue near Saturation 69
- 3.6 The Random Walk Conditioned to Hit Level a 74

4. Stochastic Networks and Reversibility 79
- 4.1 Introduction 79
- 4.2 Reversibility of Markov Processes 80
- 4.3 Local Balance Equations 90
- 4.4 Queueing Networks with Product Form 92

5. The $M/M/1$ Queue 103
- 5.1 Introduction 104
- 5.2 Exponential Martingales 106
- 5.3 Hitting Times : Downward 109
- 5.4 Convergence to Equilibrium 113
- 5.5 Hitting Times : Upward 117

5.6 Rare Events 120
5.7 Fluid Limits 124
5.8 Large Deviations 129
5.9 Appendix 139

6. The $M/M/\infty$ Queue 141
6.1 Introduction 141
6.2 Positive Martingales 146
6.3 Hitting Times : Downward 150
6.4 Hitting Times : Upward 153
6.5 Fluid Limits 157
6.6 A Functional Central Limit Theorem 160
6.7 The $M/M/N/N$ Queue 164
6.8 Appendix 174

7. Queues with Poisson Arrivals 177
7.1 FIFO $M/G/1$ Queue 178
7.2 Infinite Server Queue 180
7.3 Processor-Sharing $M/G/1$ Queue 182
7.4 LIFO $M/G/1$ Queue with Preemptive Service 196
7.5 The Insensitivity Property 202
7.6 The Distribution Seen by Customers 202
7.7 Appendix: Feller-Dynkin Markov Processes 205

8. Recurrence and Transience of Markov Chains 207
8.1 Recurrence of Markov Chains 209
8.2 Ergodicity 211
8.3 Transience 217
8.4 Ergodicity of Markov Processes 222
8.5 Some Applications 225
8.6 The Classical Version of Lyapunov's Theorem 229

9. Rescaled Markov Processes and Fluid Limits 231
9.1 Introduction 231
9.2 Rescaled Markov Processes 233
9.3 Fluid Limits of a Class of Markov Processes 241
9.4 Relations with Skorohod Problems 249
9.5 Criteria for Ergodicity Properties 258
9.6 Local Equilibrium of a Rescaled Markov Process 271
9.7 Bibliographical Notes 277

10. Ergodic Theory: Basic Results 279
10.1 Discrete Dynamical Systems 280
10.2 Ergodic Theorems 284
10.3 Continuous Time Dynamical Systems 293

10.4 Markovian Endomorphisms ... 297

11. Stationary Point Processes ... 303
11.1 Introduction ... 303
11.2 The Palm Space of Arrival Process ... 304
11.3 Construction of a Stationary Point Process ... 307
11.4 Relations Between the Palm Space and Its Extension ... 312
11.5 Joint Distribution of the Points Around $t = 0$ ... 316
11.6 Some Properties of Stationary Point Processes ... 319
11.7 Appendix ... 326

12. The $G/G/1$ FIFO Queue ... 331
12.1 Waiting Time ... 332
12.2 Virtual Waiting Time ... 336
12.3 Number of Customers ... 341
12.4 Associated Stationary Point Processes ... 343
12.5 The Unstable $G/G/1$ Queue ... 346
12.6 A Queue with Two Servers, the $G/G/2$ Queue ... 347

A. Martingales ... 351
A.1 Discrete Time Parameter Martingales ... 351
A.2 Continuous Time Martingales ... 353
A.3 The Stochastic Integral for a Poisson Process ... 354
A.4 Stochastic Differential Equations with Jumps ... 356

B. Markovian Jump Processes ... 359
B.1 $\mathcal{Q}$-Matrices ... 360
B.2 Global Balance Equations ... 362
B.3 The Associated Martingales ... 364

C. Convergence in Distribution ... 367
C.1 Total Variation Norm on Probability Distributions ... 367
C.2 Convergence of Stochastic Processes ... 369

D. An Introduction to Skorohod Problems ... 375
D.1 Dimension 1 ... 375
D.2 Multi-Dimensional Skorohod Problems ... 378

References ... 385

Research Papers ... 389
