## Part I A Guided Tour to Arbitrage Theory

---

<b>1</b>	<b>The Story in a Nutshell</b>	3
1.1	Arbitrage	3
1.2	An Easy Model of a Financial Market	4
1.3	Pricing by No-Arbitrage	5
1.4	Variations of the Example	7
1.5	Martingale Measures	7
1.6	The Fundamental Theorem of Asset Pricing	8
<b>2</b>	<b>Models of Financial Markets on Finite Probability Spaces</b>	11
2.1	Description of the Model	11
2.2	No-Arbitrage and the Fundamental Theorem of Asset Pricing	16
2.3	Equivalence of Single-period with Multiperiod Arbitrage	22
2.4	Pricing by No-Arbitrage	23
2.5	Change of Numéraire	27
2.6	Kramkov's Optional Decomposition Theorem	31
<b>3</b>	<b>Utility Maximisation on Finite Probability Spaces</b>	33
3.1	The Complete Case	34
3.2	The Incomplete Case	41
3.3	The Binomial and the Trinomial Model	45
<b>4</b>	<b>Bachelier and Black-Scholes</b>	57
4.1	Introduction to Continuous Time Models	57
4.2	Models in Continuous Time	57
4.3	Bachelier's Model	58
4.4	The Black-Scholes Model	60

<b>5 The Kreps-Yan Theorem . . . . .</b>	71
5.1 A General Framework . . . . .	71
5.2 No Free Lunch . . . . .	76
<b>6 The Dalang-Morton-Willinger Theorem . . . . .</b>	85
6.1 Statement of the Theorem . . . . .	85
6.2 The Predictable Range . . . . .	86
6.3 The Selection Principle . . . . .	89
6.4 The Closedness of the Cone $C$ . . . . .	92
6.5 Proof of the Dalang-Morton-Willinger Theorem for $T = 1$ . . . . .	94
6.6 A Utility-based Proof of the DMW Theorem for $T = 1$ . . . . .	96
6.7 Proof of the Dalang-Morton-Willinger Theorem for $T \geq 1$ by Induction on $T$ . . . . .	102
6.8 Proof of the Closedness of $K$ in the Case $T \geq 1$ . . . . .	103
6.9 Proof of the Closedness of $C$ in the Case $T \geq 1$ under the $(NA)$ Condition . . . . .	105
6.10 Proof of the Dalang-Morton-Willinger Theorem for $T \geq 1$ using the Closedness of $C$ . . . . .	107
6.11 Interpretation of the $L^\infty$ -Bound in the DMW Theorem . . . . .	108
<b>7 A Primer in Stochastic Integration . . . . .</b>	111
7.1 The Set-up . . . . .	111
7.2 Introductory on Stochastic Processes . . . . .	112
7.3 Strategies, Semi-martingales and Stochastic Integration . . . . .	117
<b>8 Arbitrage Theory in Continuous Time: an Overview . . . . .</b>	129
8.1 Notation and Preliminaries . . . . .	129
8.2 The Crucial Lemma . . . . .	131
8.3 Sigma-martingales and the Non-locally Bounded Case . . . . .	140

**Part II The Original Papers**

<b>9 A General Version of the Fundamental Theorem of Asset Pricing (1994) . . . . .</b>	149
9.1 Introduction . . . . .	149
9.2 Definitions and Preliminary Results . . . . .	155
9.3 No Free Lunch with Vanishing Risk . . . . .	160
9.4 Proof of the Main Theorem . . . . .	164
9.5 The Set of Representing Measures . . . . .	181
9.6 No Free Lunch with Bounded Risk . . . . .	186
9.7 Simple Integrands . . . . .	190
9.8 Appendix: Some Measure Theoretical Lemmas . . . . .	202

<b>10 A Simple Counter-Example to Several Problems in the Theory of Asset Pricing (1998) . . . . .</b>	207
10.1 Introduction and Known Results . . . . .	207
10.2 Construction of the Example . . . . .	210
10.3 Incomplete Markets . . . . .	212
<b>11 The No-Arbitrage Property under a Change of Numéraire (1995) . . . . .</b>	217
11.1 Introduction . . . . .	217
11.2 Basic Theorems . . . . .	219
11.3 Duality Relation . . . . .	222
11.4 Hedging and Change of Numéraire . . . . .	225
<b>12 The Existence of Absolutely Continuous Local Martingale Measures (1995) . . . . .</b>	231
12.1 Introduction . . . . .	231
12.2 The Predictable Radon-Nikodým Derivative . . . . .	235
12.3 The No-Arbitrage Property and Immediate Arbitrage . . . . .	239
12.4 The Existence of an Absolutely Continuous Local Martingale Measure . . . . .	244
<b>13 The Banach Space of Workable Contingent Claims in Arbitrage Theory (1997) . . . . .</b>	251
13.1 Introduction . . . . .	251
13.2 Maximal Admissible Contingent Claims . . . . .	255
13.3 The Banach Space Generated by Maximal Contingent Claims . . . . .	261
13.4 Some Results on the Topology of $\mathcal{G}$ . . . . .	266
13.5 The Value of Maximal Admissible Contingent Claims on the Set $\mathcal{M}^e$ . . . . .	272
13.6 The Space $\mathcal{G}$ under a Numéraire Change . . . . .	274
13.7 The Closure of $\mathcal{G}^\infty$ and Related Problems . . . . .	276
<b>14 The Fundamental Theorem of Asset Pricing for Unbounded Stochastic Processes (1998) . . . . .</b>	279
14.1 Introduction . . . . .	279
14.2 Sigma-martingales . . . . .	280
14.3 One-period Processes . . . . .	284
14.4 The General $\mathbb{R}^d$ -valued Case . . . . .	294
14.5 Duality Results and Maximal Elements . . . . .	305
<b>15 A Compactness Principle for Bounded Sequences of Martingales with Applications (1999) . . . . .</b>	319
15.1 Introduction . . . . .	319
15.2 Notations and Preliminaries . . . . .	326

XVI    Contents

15.3 An Example . . . . .	332
15.4 A Substitute of Compactness for Bounded Subsets of $\mathcal{H}^1$ . . . . .	334
15.4.1 Proof of Theorem 15.A . . . . .	335
15.4.2 Proof of Theorem 15.C . . . . .	337
15.4.3 Proof of Theorem 15.B . . . . .	339
15.4.4 A proof of M. Yor's Theorem . . . . .	345
15.4.5 Proof of Theorem 15.D . . . . .	346
15.5 Application . . . . .	352
