1 Introduction

<i>Matteo G.A. Paris, Jaroslav Řeháček</i>	1
--	---

Part I Quantum Estimation

2 Quantum Tomographic Methods

<i>Giacomo Mauro D'Ariano, Matteo G.A. Paris, Massimiliano F. Sacchi</i>	7
2.1 Introduction	7
2.2 Wigner Functions	10
2.3 Elements of Detection Theory	12
2.4 General Tomographic Method	20
2.5 Multimode Homodyne Tomography	39
2.6 Maximum-Likelihood Method in Quantum Estimation	46

3 Maximum-Likelihood Methods in Quantum Mechanics

<i>Zdeněk Hradil, Jaroslav Řeháček, Jaromír Fiurášek, Miroslav Ježek</i>	59
3.1 Introduction	59
3.2 Overview of Quantum-State Reconstruction Techniques	61
3.3 ML Quantum-State Estimation	66
3.4 Estimation Errors and Fisher Information	80
3.5 Estimation of Quantum Processes	85
3.6 Estimation of Quantum Measurements	95
3.7 Discrimination Between Quantum States	100

4 Qubit Quantum State Tomography

<i>Joseph B. Altepeter, Daniel F.V. James, Paul G. Kwiat</i>	113
4.1 State Representation	114
4.2 Exact Tomography	125
4.3 Real Tomography: Errors and the Maximum Likelihood Technique	134
4.4 Error Analysis	141

5 Unknown Quantum States and Operations, a Bayesian View

<i>Christopher A. Fuchs, Rüdiger Schack</i>	147
5.1 Introduction	147
5.2 The Classical de Finetti Theorem	154
5.3 The Quantum de Finetti Representation	158
5.4 Proof of the Quantum de Finetti Theorem	163
5.5 Intermezzo	170
5.6 Subjectivity of Quantum Operations	171
5.7 Quantum Process Tomography	172
5.8 The Process-Tomography Theorem	173
5.9 Proof of the Process-Tomography Theorem	175
5.10 Concluding Remarks	182

6 Quantum Tomography from Incomplete Data via *MaxEnt* Principle

<i>Vladimír Bužek</i>	189
6.1 Modest Question	189
6.2 Complete Observation Level	190
6.3 Maxent Principle and Observation Levels	197
6.4 Numerical Implementation	203
6.5 Reconstruction of Motional States of Neutral Atoms	211
6.6 Direct Measurement of Wigner Functions of Single Mode Fields in Cavities	223
6.7 Conclusions	230

7 Experimental Quantum State Tomography of Optical Fields and Ultrafast Statistical Sampling

<i>Michael G. Raymer, Mark Beck</i>	235
7.1 Introduction	235
7.2 Balanced Homodyne Detection of Temporal-Spatial Modes	243
7.3 Quantum State Reconstruction and Optical Mode Statistical Sampling	249
7.4 Experimental Techniques	271
7.5 Array Detection	278
7.6 Conclusions	289
A Spatial-Temporal Orthogonality	289

8 Characterization of Quantum Devices

<i>Giacomo Mauro D'Ariano, Paoloplacido Lo Presti</i>	297
8.1 Quantum Operations and Quantum Measurements	299
8.2 Imprinting Quantum Operations into Quantum States	307
8.3 Homodyne Tomography of Channels and POVM's	319

9 Quantum Operations on Qubits and Their Characterization

Francesco De Martini, Marco Ricci, Fabio Sciarrino 333

9.1 Introduction 333

9.2 Quantum-Injected Optical Parametric Amplification 336

9.3 Realization of an “All Optical” Schrödinger-Cat 341

9.4 Universal Optimal Quantum Cloning Machine and U-NOT Gate 346

9.5 More on Contextuality and Universality 351

9.6 Teleportation Scheme Implementing the Universal Optimal Quantum Cloning Machine and the Universal NOT Gate 354

9.7 Quantum Entanglement and Tomographic Analysis of Quantum Operations 361

10 Maximum-Likelihood Estimation in Experimental Quantum Physics

Gerald Badurek, Zdeněk Hradil, Alexander Lvovsky, Gabriel Molina-Teriza, Helmut Rauch, Jaroslav Řeháček, Alipasha Vaziri, Michael Zawisky 373

10.1 Introduction 373

10.2 Maximum-Likelihood Phase Estimation 374

10.3 ML Neutron Absorption Tomography 382

10.4 ML Neutron Phase Tomography 391

10.5 Maximum-Likelihood Characterization of Photonic Qutrits 399

10.6 Maximum-Likelihood Quantum Homodyne Tomography 406

Part II Quantum Decision

11 Discrimination of Quantum States

János A. Bergou, Ulrike Herzog, Mark Hillery 417

11.1 Introduction 417

11.2 Unambiguous Discrimination 419

11.3 State Discrimination with Minimum Error 440

11.4 Discriminating Multiparticle States 459

11.5 Outlook 462

12 Quantum States: Discrimination and Classical Information Transmission. A Review of Experimental Progress

Anthony Chefles 467

12.1 Introduction 467

12.2 Minimum Error Discrimination Between Two Pure States 471

12.3 Generalised Measurements and POVMs 475

12.4 Unambiguous Discrimination Between Two Pure States	477
12.5 Discrimination Among Multiple States with Minimum Error Probability and the Accessible Information	485
12.6 Accessible Information Experiments with Symmetric Qubit Ensembles	498
12.7 Superadditivity of the Classical Capacity	503
12.8 Discussion	508
Index	513
