Preface	vii
---------------	-----

Part I General Theory

1 The Nature of Chemical Kinetics	3
1.1 What Is Chemical Kinetics?	3
1.2 How to Describe Chemical Reaction Rates?	4
1.3 Can the Rate Equation Be Predicted from the Chemical Equation?	5
1.4 Rate Equation of Reverse Reaction	7
References.....	9
2 Thermodynamics of Chemical Reactions	11
2.1 The Chemical Equation of Reaction Is the Law of Conservation of Mass	11
2.2 Thermodynamic Definition of Reactions	11
2.3 Chemical Affinity: Thermodynamic Force of Reaction	12
2.4 Gibbs Energy of Chemical Reaction	15
2.5 Chemical Affinity in 1806	16
2.6 Applications of Chemical Affinity: Direction of Chemical Changes.....	18
References.....	19
3 Experimental Methods and Treatment of Data	21
3.1 Principle of Rate Measurements	21
3.2 Treatment of Rate Data.....	22
3.3 A Kinetic Measurement of Ethene Hydrogenation with $H_4Ru_4(CO)_{12}$...	24
3.3.1 Apparatus and Procedure	25
3.3.2 Reaction between $H_4Ru_4(CO)_{12}$ and Ethene	26
3.3.3 Catalytic Hydrogenation.....	27
References.....	33

4	Theory of Complex Reactions: Reaction Path	35
4.1	Complex Reactions and Elementary Reactions	35
4.2	Theory of Reaction Path	36
4.3	Quasi-stationary State Approximation	38
	References.....	39
5	Theory of Elementary Reactions	41
5.1	Starting Point of the Theory of Elementary Reactions: The Arrhenius Equation Is an Approximation of the van't Hoff Equation	41
5.2	Kinetic Data	46
5.3	McC. Lewis' Collision Theory of Active Molecules	48
5.4	Active Molecule and Critical Colliding State	49
5.5	Potential Energy Surfaces	52
5.6	Eyring's Theory of Activated Complex	56
5.7	Activation Free Energy and Entropy	59
	References.....	62
6	Coordination Equilibrium and Kinetics.....	63
6.1	Horiuti's Theory	63
6.1.1	Definition and Theorems	63
6.1.2	Rates of Elementary Reactions	64
6.2	Coordination Equilibrium	68
6.2.1	Ideal Coordination	68
6.2.2	Induced Coordination	70
6.2.3	Coordination on Cluster of Sites.....	71
6.2.4	Coordination on Nonuniform Surface Sites	75
6.2.5	Relation between Two Models of Coordination on Uniform and Nonuniform Sites	76
6.2.6	Theory of Coordination on Nonuniform Sites.....	78
6.3	Coordination Reactions	81
6.3.1	Turnover Frequency.....	81
6.3.2	Michaelis-Menten Equation.....	83
6.3.3	Relation between Energies of Coordination and Activation	85
	References.....	85

Part II Kinetics of Ziegler-Natta-Kaminsky Polymerization

7	Traditional Kinetics of Ziegler-Natta-Kaminsky Polymerization	89
7.1	Historical Introduction.....	89
7.2	Kinetic Observables and Variables.....	91
7.2.1	Rate of Polymerization	91
7.2.2	Molecular Weight Distribution.....	92
7.2.3	Polymerization Time	94
7.3	Traditional Kinetics	97
7.3.1	Ideal Kinetic Model: Stationary Rate and MWD	97
7.3.2	Extension of the Ideal Model.....	102
7.3.3	Plausibility and Uncertainty of Traditional Kinetics.....	108
	References.....	111
8	Coordination Kinetics of Ziegler-Natta-Kaminsky Polymerization ...	113
8.1	Critical State and Its Initial States	113
8.2	Monomer Concentration in Solution or Partial Pressure in Gas Phase : Which Is Better as a Kinetic Variable?.....	116
8.3	Coordination Kinetics of Elementary Reactions of Growing Polymers: Which Is the Rate-determining Step, Coordination or Insertion?	118
8.4	Transfer Reaction by Monomer and the First Monomer Insertion.....	121
8.5	Solvent Effect	124
8.6	Coordination Kinetics of Copolymerization.....	127
	References.....	129
9	Homogeneous Polymerization.....	131
9.1	Living Polymerization of Propene with $V(acac)_3/AlR_2X$ Catalysts	131
9.1.1	Principal Kinetics of Living Polymerization with $V(acac)_3/Al(C_2H_5)_2Cl$	133
9.1.2	Further Analysis in Accordance with Coordination Kinetics.....	136
9.1.3	Reactions of Living Polypropylene with Additives.....	140
9.2	Pseudo-living Polymerization of Propene with Soluble Catalysts	145
9.2.1	Ethene Polymerization with $Cp_2Ti(C_2H_5)Cl/Al(C_2H_5)Cl_2$	145
9.2.2	MMA Polymerization with $Me_2C(Cp)(Ind)Zr(Me)(thf)^+BPh_4^-$	146
9.3	Stationary Propene Polymerization with Vanadium-based Catalysts	151
9.3.1	Molecular Weight Distribution at Elevated Temperatures.....	155
9.4	Kinetics of Polymerization with Metallocene/MAO Catalysts —Trigger, Single-site Two-state or Slow-initiation Model	156
9.4.1	Kinetic Features and Topics of Kaminsky Polymerization	157

9.4.2	Trigger Model and Slow-initiation Model	159
9.4.3	Single-site Two-state Model.....	160
	References	161
10	Propene Polymerization with Heterogeneous Ziegler-Natta Catalysts: TiCl ₃ - and MgCl ₂ -supported TiCl ₂ Catalysts	163
10.1	Transitional Analysis of Mass Transfer	163
10.1.1	Pure Polymerization Rate Free from Mass Transfer Effect ...	167
10.2	Kinetic Behavior of TiCl ₃ /Al(C ₂ H ₅) ₂ Y (Y= C ₂ H ₅ , H, Cl, Br, I)	168
10.2.1	Polymerization Rate during Polymerization	169
10.2.2	Temperature Dependence of the Stationary Rate	178
10.2.3	Effect of Hydrogen Addition.....	179
10.3	Elimination and Substitution of Cocatalyst during Polymerization: Kinetic Relaxation Method.....	179
10.3.1	Rate of Polymerization after Elimination of Cocatalyst.....	180
10.3.2	Reversible Changes in the Kinetic Curve with Cocatalyst Substitutions	183
10.3.3	Pretreatment of TiCl ₃ with Various Halide Compounds	187
10.3.4	MWDs during Polymerization	188
10.3.5	Effects of Temperature, Hydrogen Pressure, Monomer Pressure and Cocatalyst Concentration	190
10.4	MgCl ₂ -supported TiCl ₂ /Al(C ₂ H ₅) ₃ Catalyst.....	192
10.4.1	Dependence of Polymerization Rate on Time.....	193
10.4.2	Kinetic Behavior during Polymerization.....	195
10.4.3	Effect of External Electron Donor.....	202
10.4.4	Elimination of Cocatalyst during Polymerization	203
10.4.5	Quasi-living Stages.....	203
10.5	Radio-C*O Tagging Method and CO Quenching Method.....	205
	References	213
11	Kinetic Mechanism of Molecular Weight Distribution and Isotacticity.....	215
11.1	Kinetic Features of Molecular Weight Distribution and Isotacticity...	215
11.2	Rival Theories of Broad MWDs.....	216
11.2.1	Broad MWDs in the Stationary State	216
11.2.2	Experimental Test of Rival Theories for Stationary Broad MWDs	223
11.2.3	MWDs during Quasi-living Polymerization	226
11.2.4	Possible Kinetic Models of Broadening MWDs	230

11.3 Kinetic Model of Isotacticity.....	233
11.3.1 Characterization of Stereoregularity.....	233
11.3.2 Kinetic Models of Stereospecificity.....	240
References	243
Index.....	245
