# Contents

<b>1</b>	<b>Introduction</b> . . . . .	1
<b>2</b>	<b>Connected Reductive Groups and Their Lie Algebras</b> . . . . .	5
2.1	Notation and Background . . . . .	5
2.1.1	$H$ -Varieties and Adjoint Action of $H$ on $\mathcal{H}$ . . . . .	6
2.1.4	Reductive Groups . . . . .	7
2.1.10	About Intersections of Lie Algebras of Closed Subgroups of $G$ . . . . .	9
2.1.16	$\mathbb{F}_q$ -Structures . . . . .	10
2.2	Chevalley Formulas . . . . .	11
2.3	The Lie Algebra of $Z_G$ . . . . .	13
2.4	Existence of Chevalley Bases on $\mathcal{G}'$ . . . . .	15
2.5	Existence of Non-degenerate $G$ -Invariant Bilinear Forms on $\mathcal{G}$ .	18
2.6	Centralizers . . . . .	24
2.7	The Varieties $\mathcal{G}_{uni}$ and $\mathcal{G}_{nil}$ . . . . .	30
<b>3</b>	<b>Deligne-Lusztig Induction</b> . . . . .	33
3.1	The Space of $G^F$ -Invariant Functions on $\mathcal{G}^F$ . . . . .	33
3.2	Deligne-Lusztig Induction: Definition and Basic Properties . . .	36
3.2.1	Deligne-Lusztig Induction: The Group Case . . . . .	36
3.2.8	Deligne-Lusztig Induction: The Lie Algebra Case . . . . .	38
3.2.17	Basic Properties of $\mathcal{R}_{\mathcal{L}\subset\mathcal{P}}^{\mathcal{G}}$ . . . . .	40
<b>4</b>	<b>Local Systems and Perverse Sheaves</b> . . . . .	45
4.1	Simple Perverse Sheaves, Intersection Cohomology Complexes .	47
4.2	$H$ -Equivariance . . . . .	49
4.3	Locally (Iso)trivial Principal $H$ -Bundles . . . . .	54
4.4	$F$ -Equivariant Sheaves and Complexes . . . . .	57

<b>5</b>	<b>Geometrical Induction</b> . . . . .	61
5.1	Admissible Complexes and Orbital Perverse Sheaves on $\mathcal{G}$ . . . .	62
5.1.1	Parabolic Induction of Equivariant Perverse Sheaves . . . .	63
5.1.9	The Complexes $\text{ind}_{\mathcal{LCP}}^{\mathcal{G}} K(\Sigma, \mathcal{E})$ . . . . .	64
5.1.14	The Complexes $\text{ind}_{\mathcal{LCP}}^{\mathcal{G}} K(\Sigma, \mathcal{E})$ Are $G$ -Equivariant Perverse Sheaves . . . . .	66
5.1.26	When the Complexes $\text{ind}_{\mathcal{LCP}}^{\mathcal{G}} K(\Sigma, \mathcal{E})$ Are Intersection Cohomology Complexes . . . . .	73
5.1.41	Restriction of $\text{ind}_{\mathcal{LCP}}^{\mathcal{G}} K(\Sigma, \mathcal{E})$ to $\mathcal{G}_{\sigma}$ with $\sigma \in z(\mathcal{G})$ . . . .	79
5.1.51	Introducing Frobenius . . . . .	81
5.1.56	Admissible Complexes (or Character Sheaves) on $\mathcal{G}$ . . . .	84
5.1.72	Orbital Perverse Sheaves: The Fundamental Theorem . . . .	86
5.2	Deligne-Fourier Transforms and Admissible Complexes . . . . .	89
5.3	Endomorphism Algebra of Lusztig Complexes . . . . .	96
5.4	Geometrical Induction: Definition . . . . .	99
5.4.1	Preliminaries . . . . .	100
5.4.10	Geometrical Induction . . . . .	103
5.5	Deligne-Lusztig Induction and Geometrical Induction . . . . .	106
5.5.1	Generalized Green Functions . . . . .	106
5.5.9	The Character Formula . . . . .	110
5.5.11	Generalized Green Functions and Two-Variable Green Functions . . . . .	111
5.5.14	Geometrical Induction and Deligne-Lusztig Induction . . . .	112
<b>6</b>	<b>Deligne-Lusztig Induction and Fourier Transforms</b> . . . . .	115
6.1	Frobenius Action on the Parabolic Induction of Cuspidal Orbital Perverse Sheaves . . . . .	115
6.1.1	The Functor $\text{ind}_{S \times \mathcal{L}, \mathcal{P}}^{S \times \mathcal{G}} : \mathcal{M}_L(S \times \mathcal{L}) \rightarrow \mathcal{D}_c^b(S \times \mathcal{G})$ . . . .	116
6.1.2	The Complexes $\text{ind}_{S \times \mathcal{L}, \mathcal{P}}^{S \times \mathcal{G}} K(\mathcal{Z} \times C, \mathcal{E})$ . . . . .	116
6.1.15	The Complexes $K_1$ and $K_2$ . . . . .	121
6.1.19	The Character Formula . . . . .	122
6.1.54	Deligne-Lusztig Induction and Geometrical Induction . . . .	137
6.2	On the Conjecture 3.2.30 . . . . .	139
6.2.1	Reduction of 3.2.30 to the Case of Nilpotently Supported Cuspidal Functions . . . . .	139
6.2.7	The Main Results . . . . .	142
6.2.20	Lusztig Constants: A Formula . . . . .	146

**7 Fourier Transforms of the Characteristic Functions of the Adjoint Orbits** ..... 151

7.1 Preliminaries ..... 151

    7.1.1 A Decomposition of  $\mathcal{C}(\mathcal{G}^F)$  ..... 151

    7.1.6 A Geometric Analogue of 3.2.24 ..... 153

7.2 Fourier Transforms of the Characteristic Functions of the Adjoint Orbits ..... 154

7.3 Fourier Transforms of the Characteristic Functions of the Semi-simple Orbits ..... 157

**References** ..... 159

**Index** ..... 163
