## Contents

<b>1</b>	<b>Introduction</b> . . . . .	1
1.1	General objectives of the book . . . . .	1
1.2	Why modelling radioactivity dispersion in the marine environment? . . . . .	2
1.3	Marine dispersion models: from box models to full 3D dispersion models for non conservative radionuclides . . . . .	3
<b>2</b>	<b>Model structure and processes</b> . . . . .	11
2.1	Processes governing radionuclide dispersion . . . . .	11
2.2	Model configuration. Resolution . . . . .	15
2.3	Mixing time scales . . . . .	16
<b>3</b>	<b>Introduction to the transport equation</b> . . . . .	19
3.1	Introduction . . . . .	19
3.2	Advection . . . . .	19
3.3	Diffusion . . . . .	23
3.3.1	Vertical diffusion in the sea . . . . .	27
<b>4</b>	<b>Solving hydrodynamics</b> . . . . .	29
4.1	Introduction . . . . .	29
4.2	Hydrodynamic equations . . . . .	30
4.3	Numerical solution . . . . .	32
4.4	Computing tidal currents. Boundary conditions . . . . .	35
4.5	Something about tides . . . . .	40
4.6	Residual transport . . . . .	46
<b>5</b>	<b>Solving hydrodynamics and dispersion</b> . . . . .	49
5.1	Introduction . . . . .	49
5.2	Hydrodynamics on-line and off-line . . . . .	49
5.3	The transport equation in non constant water flows and depths . . . . .	51
5.4	Open boundary conditions . . . . .	54

<b>6</b>	<b>Modelling the dispersion of non conservative radionuclides</b>	57
6.1	Introduction	57
6.2	Modelling the transport of suspended sediments	57
6.3	Kinetic models for uptake/release	62
6.4	The Rhone River plume dispersion model	73
6.4.1	Model description	76
6.4.2	Results: some examples	78
<b>7</b>	<b>Lagrangian dispersion models</b>	91
7.1	Introduction	91
7.2	Advection, diffusion and decay	92
7.3	GISPART model	95
7.3.1	Hydrodynamic module	96
7.3.2	Dispersion code	97
7.3.3	Input data	97
7.3.4	Model output	98
7.3.5	Examples	100
7.4	Water-sediment interactions	104
7.4.1	Formulation	104
7.4.2	Application	110
<b>8</b>	<b>Dispersion in estuaries: an example</b>	117
8.1	Introduction	117
8.2	The Odiel-Tinto estuary	119
8.3	Model description	120
8.4	Examples of results	123
<b>9</b>	<b>Sensitivity analysis</b>	135
9.1	Introduction	135
9.2	Classical sensitivity analysis	136
9.3	Monte Carlo based sensitivity study	138
<b>10</b>	<b>Review of some radionuclide dispersion models</b>	147
10.1	The European Continental Shelf model by Prandle	147
10.2	Ifremer long-term dispersion model for the English Channel and southern North Sea	148
10.3	THREETOX: Three dimensional model of toxicants transport	149
10.4	CEFAS Irish Sea model	150
10.5	MEAD model	151
10.6	Suez Canal model	151
10.7	The Artic Ocean environment	152
10.8	PCFLOW3D model	154
10.9	Global scale models	155

<b>A Rhone River model: 3D equations</b> .....	159
A.1 Hydrodynamic model .....	159
A.2 Suspended sediment model .....	162
A.3 Radionuclide equations .....	163
A.4 Numerical solution .....	165
A.5 Normalized $\sigma$ coordinates .....	165
<b>B Examples of codes</b> .....	169
B.1 Advection term using the upstream scheme (1D) .....	169
B.2 Advection term using the MSOU scheme (1D) .....	170
B.3 Diffusion equation (1D) .....	171
B.4 Upstream scheme for a 2D problem .....	172
B.5 MSOU scheme for a 2D problem .....	174
B.6 Kinetic exchanges water-sediment .....	176
B.7 Stochastic method for the radioactive equation .....	177
B.8 Hydrodynamic model of the Strait of Gibraltar .....	178
<b>C Disk contents</b> .....	185
<b>References</b> .....	187
<b>Index</b> .....	199
