<b>1</b>	<b>Soil Sampling and Storage</b>	<b>1</b>
	<i>Andreas Paetz, Berndt-Michael Wilke</i>	
1.1	Objective of Soil Sampling.....	1
1.1.1	Principal Objectives .....	1
1.1.2	Specific Objectives .....	4
1.2	Selection of Sampling Technique .....	6
1.3	Sampling Strategy .....	7
1.3.1	General .....	7
1.3.2	Preliminary Investigation .....	7
1.3.3	Exploratory Investigation .....	9
1.3.4	Main Site Investigation .....	9
1.3.5	Samples and Sampling Points .....	10
1.4	Sampling Methods .....	25
1.4.1	General .....	25
1.4.2	Type of Sample.....	25
1.4.3	Undisturbed Samples .....	27
1.4.4	Cross-Contamination .....	34
1.4.5	Sampling Containers.....	34
1.5	Pretreatment .....	37
1.5.1	Chemical Analysis .....	37
1.5.2	Physical Analysis .....	40
1.5.3	Biological Analysis.....	40
1.6	Storage of Samples .....	41
1.6.1	General .....	41
1.6.2	Specific Considerations for Biological Parameters .....	42
1.6.3	Preparing the Samples After Storage.....	44
	References .....	44
<b>2</b>	<b>Determination of Chemical and Physical Soil Properties</b>	<b>47</b>
	<i>Berndt-Michael Wilke</i>	
2.1	Soil Dry Mass and Water Content .....	47
2.2	Water-Holding Capacity .....	50

2.3	Bulk Density – Total Porosity.....	52
2.3.1	Core Method.....	52
2.3.2	Excavation Method .....	54
2.3.3	Clod Method.....	57
2.4	Water Retention Characteristics – Pore Size Distribution .....	59
2.4.1	Determination of Soil Water Characteristics Using Sand, Kaolin, and Ceramic Suction Tables .....	62
2.4.2	Determination of Soil Water Characteristics by Pressure Plate Extractor .....	65
2.5	Soil pH.....	68
2.6	Soil Organic Matter – Soil Organic Carbon .....	71
2.6.1	Dry Combustion Method .....	72
2.6.2	Loss On Ignition Method (LOI).....	74
2.7	Soil Nutrients: Total Nitrogen .....	76
2.7.1	Dry Combustion Method (“Elemental Analysis”) .....	77
2.7.2	Modified Kjeldahl Method .....	79
2.8	Soil Nutrients: Inorganic Nitrogen.....	82
2.8.1	Extraction .....	83
2.8.2	Quantification of Nitrate Nitrogen.....	84
2.8.3	Quantification of Ammonium Nitrogen .....	86
2.9	Soil Nutrients: Phosphorus.....	87
2.9.1	Extraction of Total Phosphorus .....	88
2.9.2	Extraction of Labile Phosphorus.....	90
2.9.3	Quantification of Phosphorus.....	91
	References .....	93
<b>3</b>	<b>Quantification of Soil Contamination</b>	<b>97</b>
	<i>Kirsten S. Jørgensen, Olli Järvinen, Pirjo Sainio, Jani Salminen, Anna-Mari Suortti</i>	
3.1	General Introduction.....	97
3.2	Volatile Hydrocarbons.....	99
3.3	Hydrocarbons in the Range C <sub>10</sub> to C <sub>40</sub> .....	103
3.4	Polyaromatic Hydrocarbons (PAHs) .....	109
3.5	Heavy Metals.....	115
	References .....	118
<b>4</b>	<b>Immunotechniques as a Tool for Detection of Hydrocarbons</b>	<b>121</b>
	<i>Grażyna A. Płaza, Krzysztof Ulfig, Albert J. Tien</i>	
4.1	RaPID Assay Test System .....	121
4.2	EnviroGard Test System .....	126
	References .....	130

<b>5 Feasibility Studies for Microbial Remediation of Hydrocarbon-Contaminated Soil</b>	<b>131</b>
<i>Ajay Singh, Owen P. Ward, Ramesh C. Kuhad</i>	
5.1 Introduction .....	131
5.2 Determination of Biodegradation Potential .....	132
5.2.1 Sampling and Soil Preparation .....	132
5.2.2 Selective Microbial Enrichment .....	134
5.2.3 Controls .....	135
5.2.4 Soil Microcosms .....	136
5.2.5 Slurry Bioreactors.....	137
5.2.6 Land Treatment.....	139
5.2.7 Composting.....	140
5.2.8 Scale-Up.....	141
5.3 Process Monitoring and Evaluation .....	142
5.4 Bioaugmentation .....	143
5.5 Effect of Surfactants .....	144
5.5.1 Screening of Microbial Cultures for Biosurfactant Production .....	145
5.5.2 Effect of Biosurfactants.....	146
5.5.3 Effect of Chemical Surfactants .....	146
5.6 Optimization of Environmental Conditions .....	147
5.7 Optimization of Nutritional Factors.....	148
5.8 Conclusions .....	150
References .....	151
<b>6 Feasibility Studies for Microbial Remediation of Metal-Contaminated Soil</b>	<b>155</b>
<i>Franz Schinner, Thomas Klause</i>	
References .....	159
<b>7 Feasibility Studies for Phytoremediation of Metal-Contaminated Soil</b>	<b>161</b>
<i>Aleksandra Sas-Nowosielska, Rafal Kucharski, Eugeniusz Malkowski</i>	
7.1 Introduction .....	161
7.2 Phytoextraction.....	161
7.2.1 Treatability Study .....	162
7.2.2 Full-Scale Application .....	166
7.2.3 Conclusions .....	170
7.3 Phytostabilization Potential for Soils Highly Contaminated with Lead, Cadmium and Zinc .....	171
7.3.1 Evaluation of Site Contaminants .....	171
7.3.2 Logistic Considerations .....	172

7.3.3	Additives .....	172
7.3.4	Plants .....	173
7.3.5	Full-Scale Application .....	173
7.3.6	Effectiveness of Technology.....	174
7.3.7	Monitoring .....	174
7.3.8	Conclusions .....	175
	References .....	176
<b>8</b>	<b>Quantification of Hydrocarbon Biodegradation Using Internal Markers</b>	<b>179</b>
	<i>Roger C. Prince, Gregory S. Douglas</i>	
	References .....	187

	<i>Jon E. Lindstrom, Joan F. Braddock</i>	
	References .....	198
<b>10</b>	<b>Molecular Techniques for Monitoring and Assessing Soil Bioremediation</b>	<b>201</b>
	<i>Lyle G. Whyte, Charles W. Greer</i>	
10.1	General Introduction.....	201
10.2	Extraction and Purification of Nucleic Acids (DNA) from Soil .....	202
10.3	Amplification of Catabolic Genotypes and 16S rDNA Genotypes by PCR.....	208
10.4	DGGE Analysis Soil Microbial Communities.....	218
10.5	Genomics in Environmental Microbiology .....	226
	References .....	228
<b>11</b>	<b>Bioreporter Technology for Monitoring Soil Bioremediation</b>	<b>233</b>
	<i>Steven Ripp</i>	
11.1	General Introduction.....	233
11.2	An Overview of Reporter Systems for Soil Bioremediation Application.....	235
11.3	Single Point Measurements of Soil Contaminants .....	241
11.4	Continuous On-Line Vapor Phase Sensing of Soil Contaminants .....	244
11.5	Quantification of Soil-Borne <i>lux</i> -Tagged Microbial Popula- tions Using Most-Probable-Number (MPN) Analysis .....	247
	References .....	249

<b>12 Interpretation of Fatty Acid Profiles of Soil Microorganisms</b>	<b>251</b>
<i>David B. Hedrick, Aaron Peacock, David C. White</i>	
12.1 Obtaining Fatty Acid Profiles from Soil Samples .....	251
12.2 Transforming Fatty Acid Peak Areas to Total Microbial Biomass .....	252
12.3 Calculation and Interpretation of Community Structure.....	254
12.3.1 Standard Community Structure Method .....	254
12.3.2 Custom Community Structure Methods.....	255
12.3.3 Factor Analysis.....	255
12.4 Calculation and Interpretation of Metabolic Stress Biomarkers .....	256
12.5 Naming of Fatty Acids .....	257
References .....	258
<b>13 Enumeration of Soil Microorganisms</b>	<b>261</b>
<i>Julia Foght, Jackie Aislabie</i>	
13.1 Sample Preparation and Dilution .....	261
13.2 Direct (Microscopic) Enumeration .....	264
13.3 Enumeration by Culture in Liquid Medium (Most Probable Number Technique) .....	268
13.4 Enumeration by Culture on Solid Medium (Plate Count Technique) .....	272
References .....	279
<b>14 Quantification of Soil Microbial Biomass by Fumigation-Extraction</b>	<b>281</b>
<i>Rainer Georg Joergensen, Philip C. Brookes</i>	
14.1 General Introduction.....	281
14.2 Fumigation and Extraction .....	282
14.3 Biomass C.....	284
14.3.1 Biomass C by Dichromate Oxidation .....	284
14.3.2 Biomass C by UV-Persulfate Oxidation .....	286
14.3.3 Biomass C by Oven Oxidation .....	288
14.4 Biomass N .....	289
14.4.1 Ninhydrin-Reactive Nitrogen .....	289
14.4.2 Total Nitrogen.....	292
References .....	294
<b>15 Determination of Adenylates and Adenylate Energy Charge</b>	<b>297</b>
<i>Rainer Georg Joergensen, Markus Raubuch</i>	
References .....	302

<i>Rainer Georg Joergensen</i>	
References .....	306
<b>17 Determination of Enzyme Activities in Contaminated Soil</b>	<b>309</b>
<i>Rosa Margesin</i>	
17.1 General Introduction.....	309
17.2 Lipase-Esterase Activity.....	310
17.3 Fluorescein Diacetate Hydrolytic Activity.....	313
17.4 Dehydrogenase Activity.....	316
References .....	319
<b>18 Assessment of Ecotoxicity of Contaminated Soil Using Bioassays</b>	<b>321</b>
<i>Adolf Eisentraeger, Kerstin Hund-Rinke, Joerg Roembke</i>	
18.1 General Introduction: Strategy.....	321
18.2 Sample Preparation.....	323
18.3 Water-Extractable Ecotoxicity.....	330
18.3.1 <i>Vibrio fischeri</i> Luminescence-Inhibition Assay .....	330
18.3.2 <i>Desmodesmus subspicatus</i> Growth-Inhibition Assay....	331
18.4 Water-Extractable Genotoxicity .....	332
18.4.1 The umu Test .....	332
18.4.2 Salmonella/Microsome Assay (Ames Test).....	333
18.5 Habitat Function:	
Soil/Microorganisms, Soil/Soil Fauna, Soil/Higher Plants .....	334
18.5.1 Respiration Curve Test .....	334
18.5.2 Ammonium Oxidation Test.....	337
18.5.3 Combined Earthworm Mortality/Reproduction Test ...	340
18.5.4 Collembola Reproduction Test.....	342
18.5.5 Plant Growth Test .....	344
18.5.6 Test Performance for the Derivation of Threshold Values .....	346
18.6 Combined Performance of Bioassays and Assessment of the Results .....	348
18.6.1 Water-Extractable Ecotoxic Potential.....	348
18.6.2 Water-Extractable Genotoxicity .....	349
18.6.3 Assessment of the Habitat Function.....	350
18.6.4 Overall Assessment – Combined Strategy.....	353
References .....	355
