# Contents

<b>Basic Notation</b>	XIII
<b>1 Preliminaries from Probability Theory</b>	1
1.1 Discrete Random Variables and Distributions	1
1.2 Continuous Random Variables and Distributions	11
1.3 Moments of Random Variables	22
1.4 Joint Distributions and Random Vectors	39
1.5 Copulas (*)	50
1.6 Exercises for Chapter 1	53
<b>2 Statistical Methods</b>	55
2.1 Limit Theorems	55
2.2 Confidence Intervals	63
2.3 Estimation Methods	70
2.4 Maximum Likelihood Estimation	78
2.5 Normal Variance Mixture Models	81
2.6 Distribution of Index Log>Returns	84
2.7 Convergence of Random Sequences	92
2.8 Exercises for Chapter 2	98
<b>3 Modeling via Stochastic Processes</b>	99
3.1 Introduction to Stochastic Processes	99
3.2 Certain Classes of Stochastic Processes	106
3.3 Discrete Time Markov Chains	110
3.4 Continuous Time Markov Chains	113
3.5 Poisson Processes	120
3.6 Lévy Processes (*)	126
3.7 Insurance Risk Modeling (*)	128
3.8 Exercises for Chapter 3	131

<b>4</b>	<b>Diffusion Processes</b> .....	133
4.1	Continuous Markov Processes .....	133
4.2	Examples for Continuous Markov Processes .....	136
4.3	Diffusion Processes .....	141
4.4	Kolmogorov Equations .....	145
4.5	Diffusions with Stationary Densities .....	154
4.6	Multi-Dimensional Diffusion Processes (*) .....	159
4.7	Exercises for Chapter 4 .....	161
<b>5</b>	<b>Martingales and Stochastic Integrals</b> .....	163
5.1	Martingales .....	163
5.2	Quadratic Variation and Covariation .....	174
5.3	Gains from Trade as Stochastic Integral .....	187
5.4	Itô Integral for Wiener Processes .....	193
5.5	Stochastic Integrals for Semimartingales (*) .....	197
5.6	Exercises for Chapter 5 .....	203
<b>6</b>	<b>The Itô Formula</b> .....	205
6.1	The Stochastic Chain Rule .....	205
6.2	Multivariate Itô Formula .....	209
6.3	Some Applications of the Itô Formula .....	213
6.4	Extensions of the Itô Formula .....	222
6.5	Lévy's Theorem (*) .....	227
6.6	A Proof of the Itô Formula (*) .....	230
6.7	Exercises for Chapter 6 .....	234
<b>7</b>	<b>Stochastic Differential Equations</b> .....	237
7.1	Solution of a Stochastic Differential Equation .....	237
7.2	Linear SDE with Additive Noise .....	241
7.3	Linear SDE with Multiplicative Noise .....	243
7.4	Vector Stochastic Differential Equations .....	246
7.5	Constructing Explicit Solutions of SDEs .....	248
7.6	Jump Diffusions (*) .....	254
7.7	Existence and Uniqueness (*) .....	261
7.8	Markovian Solutions of SDEs (*) .....	272
7.9	Exercises for Chapter 7 .....	275
<b>8</b>	<b>Introduction to Option Pricing</b> .....	277
8.1	Options .....	277
8.2	Options under the Black-Scholes Model .....	281
8.3	The Black-Scholes Formula .....	288
8.4	Sensitivities for European Call Option .....	290
8.5	European Put Option .....	295
8.6	Hedge Simulation .....	298
8.7	Squared Bessel Processes (*) .....	304

8.8	Exercises for Chapter 8	317
<b>9</b>	<b>Various Approaches to Asset Pricing</b>	<b>319</b>
9.1	Real World Pricing	319
9.2	Actuarial Pricing	329
9.3	Capital Asset Pricing Model	332
9.4	Risk Neutral Pricing	336
9.5	Girsanov Transformation and Bayes Rule (*)	345
9.6	Change of Numeraire (*)	350
9.7	Feynman-Kac Formula (*)	356
9.8	Exercises for Chapter 9	364
<b>10</b>	<b>Continuous Financial Markets</b>	<b>367</b>
10.1	Primary Security Accounts and Portfolios	367
10.2	Growth Optimal Portfolio	372
10.3	Supermartingale Property	375
10.4	Real World Pricing	378
10.5	GOP as Best Performing Portfolio	386
10.6	Diversified Portfolios in CFMs	389
10.7	Exercises for Chapter 10	402
<b>11</b>	<b>Portfolio Optimization</b>	<b>403</b>
11.1	Locally Optimal Portfolios	404
11.2	Market Portfolio and GOP	415
11.3	Expected Utility Maximization	419
11.4	Pricing Nonreplicable Payoffs	427
11.5	Hedging	430
11.6	Exercises for Chapter 11	437
<b>12</b>	<b>Modeling Stochastic Volatility</b>	<b>439</b>
12.1	Stochastic Volatility	439
12.2	Modified CEV Model	444
12.3	Local Volatility Models	461
12.4	Stochastic Volatility Models	472
12.5	Exercises for Chapter 12	481
<b>13</b>	<b>Minimal Market Model</b>	<b>483</b>
13.1	Parametrization via Volatility or Drift	483
13.2	Stylized Minimal Market Model	488
13.3	Derivatives under the MMM	496
13.4	MMM with Random Scaling (*)	503
13.5	Exercises for Chapter 13	511

<b>14</b>	<b>Markets with Event Risk</b> .....	513
14.1	Jump Diffusion Markets .....	513
14.2	Diversified Portfolios .....	523
14.3	Mean-Variance Portfolio Optimization .....	532
14.4	Real World Pricing for Two Market Models .....	536
14.5	Exercises for Chapter 14 .....	549
<b>15</b>	<b>Numerical Methods</b> .....	551
15.1	Random Number Generation .....	551
15.2	Scenario Simulation .....	558
15.3	Classical Monte Carlo Method .....	570
15.4	Monte Carlo Simulation for SDEs .....	578
15.5	Variance Reduction of Functionals of SDEs .....	587
15.6	Tree Methods .....	591
15.7	Finite Difference Methods .....	600
15.8	Exercises for Chapter 15 .....	611
<b>16</b>	<b>Solutions for Exercises</b> .....	615
	<b>Acknowledgements</b> .....	667
	<b>References</b> .....	669
	<b>Author Index</b> .....	685
	<b>Index</b> .....	691
