
Contents – Volume III

12	Atomic Force Microscopy in Nanomedicine <i>Dessy Nikova, Tobias Lange, Hans Oberleithner, Hermann Schillers, Andreas Ebner, Peter Hinterdorfer</i>	1
12.1	AFM in Biological Sciences	1
12.2	Plasma Membrane Preparation for AFM Imaging	4
12.2.1	Introduction	4
12.2.2	Plasma Membrane Preparation	5
12.2.3	Atomic Force Microscopy	7
12.2.4	Molecular Volume Measurements of Membrane Proteins	7
12.2.5	AFM Imaging	7
12.3	AFM Imaging of CFTR in Oocyte Membranes	10
12.3.1	Introduction	11
12.3.2	Does the CFTR Form Functional Assemblies?	11
12.3.3	Two CFTRs are Better Than One	13
12.4	Single Antibody–CFTR Recognition Imaging	16
12.4.1	Introduction	16
12.4.2	Tethering of Antibodies to AFM Tips	17
12.4.3	AFM Imaging and Recognition	17
12.4.4	A Single Antibody Sees a Single CFTR	17
12.5	Single Cell Elasticity: Probing for Diseases	19
12.5.1	Introduction	19
12.5.2	Force–Mapping AFM	20
12.5.3	Can One Protein Change Cell Elasticity?	21
12.6	Summary	24
	References	24

13	Scanning Probe Microscopy: From Living Cells to the Subatomic Range <i>Ille C. Gebeshuber, Manfred Drack, Friedrich Aumayr, Hannspeter Winter, Friedrich Franek</i>	27
13.1	Introduction	27
13.2	Cells <i>In Vivo</i> as Exemplified by Diatoms	28
13.2.1	Introduction to Diatoms	28
13.2.2	SPM of Diatoms	30
13.3	Interaction of Large Organic Molecules	33
13.4	Nanodefects on Atomically Flat Surfaces	37
13.4.1	Ion Bombardment of Highly Oriented Pyrolytic Graphite (HOPG)	38
13.4.2	Bombardment of Single Crystal Insulators with Multicharged Ions	42
13.5	Subatomic Features	45
13.5.1	Atom Orbitals	45
13.5.2	Single Electron Spin Detection with AFM and STM	47
13.6	Conclusions and Outlook	50
	References	51
14	Surface Characterization and Adhesion and Friction Properties of Hydrophobic Leaf Surfaces and Nanopatterned Polymers for Superhydrophobic Surfaces <i>Zachary Burton, Bharat Bhushan</i>	55
14.1	Introduction	55
14.2	Experimental Details	58
14.2.1	Instrumentation	58
14.2.2	Samples	59
14.2.3	Roughness Factor	61
14.2.4	Test Matrix for Nanopatterned Polymers	62
14.3	Results and Discussion	63
14.3.1	Hydrophobic Leaf Surfaces	64
14.3.2	Nanopatterned Polymers	74
14.4	Summary	79
	References	81
15	Probing Macromolecular Dynamics and the Influence of Finite Size Effects <i>Scott Sills, René M. Overney</i>	83
15.1	Introduction	84

15.2	The Glass Transition and Molecular Mobility	85
15.3	Macromolecular Probing Techniques	90
15.3.1	Static Contacts	90
15.3.2	Modulated Contacts	92
15.3.3	Calibration of Lateral Forces in Scanning Probe Microscopy	93
15.3.4	Shear Modulation Force Microscopy (SM-FM)	97
15.3.5	Friction Force Microscopy (FFM)	98
15.3.6	Tribological Models for FFM	99
15.4	Internal Friction and Dynamics near the Glass Transition	103
15.4.1	Molecular Relaxations	103
15.4.2	Structural Heterogeneity and Relaxation near the Glass Transition	105
15.4.3	Cooperative Molecular Motion During the Glass Transition	107
15.5	Constraints and Structural Modifications near Interfaces	109
15.5.1	Interfacial Plasticization	109
15.5.2	Dewetting Kinetics	110
15.5.3	Disentanglement Barriers	111
15.5.4	Interfacial Glass Transition Profiles	113
15.6	Mechanical Operations in Nanoscopic Polymer Systems	115
15.6.1	Indentation Contact Mechanics	116
15.6.2	Rim Formation During Indentation	120
15.6.3	Strain Shielding and Confined Plasticity in Nanoscopic Polymer Systems	122
15.7	Closing Remarks	126
	References	127
16	Investigation of Organic Supramolecules by Scanning Probe Microscopy in Ultra-High Vacuum	
	<i>Laurent Nony, Enrico Gnecco, Ernst Meyer</i>	131
16.1	Introduction	131
16.2	Methods	132
16.2.1	Organic Molecular Beam Epitaxy (OMBE)	132
16.2.2	Scanning Tunneling Microscopy (STM)	134
16.2.3	Atomic Force Microscopy (AFM)	137
16.3	Molecules	142
16.3.1	Fullerenes	142
16.3.2	Porphyrins	142
16.3.3	Phthalocyanines	142
16.3.4	Perylene Derivatives	144
16.3.5	Lander Molecules	144
16.3.6	PVBA Molecules	144
16.3.7	Decacyclene and Derivatives	144

16.4	Molecules on Metals	145
16.4.1	STM Investigations	145
16.4.2	Non-Contact AFM Investigations	157
16.5	Molecules on Semiconductor Surfaces	162
16.5.1	STM Investigations	162
16.5.2	Non-Contact AFM Investigations	165
16.6	Molecules on Insulating Surfaces	167
16.6.1	STM Investigations	168
16.6.2	Non-contact AFM Investigations	169
16.7	Manipulation of Single Molecules	171
16.7.1	STM Investigations	171
16.7.2	Non-contact AFM Investigations	175
16.8	Conclusions	175
	References	176
17	One- and Two-Dimensional Systems: Scanning Tunneling Microscopy and Spectroscopy of Organic and Inorganic Structures <i>Luca Gavioli, Massimo Sancrotti</i>	183
17.1	Introduction	183
17.2	Basic Principles of STM and STS	185
17.3	Inorganic Overlayers	188
17.3.1	1D Structures	188
17.3.2	2D Structures	196
17.4	Molecular Overlayers	201
17.4.1	1D Structures	202
17.4.2	2D Overlayers	208
17.5	Conclusions	212
	References	212
18	Scanning Probe Microscopy Applied to Ferroelectric Materials <i>Oleg Tikhomirov, Massimiliano Labardi, Maria Allegrini</i>	217
18.1	Introduction	217
18.2	Development of Scanning Probe Techniques for Ferroelectrics	217
18.3	Scanning Force Microscopy	220
18.3.1	Non-Contact Mode	220
18.3.2	Contact Mode	221
18.3.3	Voltage-Modulated SFM	222

18.3.4	Resonance Modes of EFM	224
18.3.5	Lateral Force	228
18.3.6	Frontal Force	232
18.3.7	Second Harmonic	233
18.3.8	Tapping Mode	234
18.4	Scanning Optical Microscopy	235
18.4.1	Pure Optical Microscopy	235
18.4.2	Scanning Electrooptic Microscopy	237
18.4.3	Near-Field Electrooptic Microscopy	242
18.4.4	Micro-Spectroscopic Techniques	244
18.4.5	Second Harmonic Microscopy	245
18.5	Applications to Ferroelectrics	247
18.5.1	Imaging of Domains and Domain Walls	247
18.5.2	Writing Patterns	248
18.5.3	Phase Transitions	249
18.5.4	Morphotropic Phase Boundary	250
18.5.5	Relaxors	251
18.5.6	Thin Films	251
18.5.7	Artificial Nanostructures	252
18.6	Conclusions	253
	References	254

19	Morphological and Tribological Characterization of Rough Surfaces by Atomic Force Microscopy	
	<i>Renato Buzio, Ugo Valbusa</i>	261
19.1	Characterization of Surface Roughness by Atomic Force Microscopy	263
19.1.1	Statistical Methods for Stationary Random Surfaces	264
19.1.2	Statistical Methods for Fractal Surfaces	266
19.1.3	Estimation of Morphological Parameters from AFM Topographies	270
19.2	Modeling Contact Mechanics for Rough Surfaces	272
19.2.1	Early Phenomenological Contact Theories	273
19.2.2	Contact Mechanics Theories for Fractal Roughness	277
19.2.3	On the Molecular Origins of Amontons' Law	284
19.3	Investigations of Multi-Asperity Contacts by AFM	286
19.3.1	AFM Characterization of Surface Roughness for Tribological Purposes	286
19.3.2	Contact Mechanics Investigations at the Nanometer Scale	288
19.3.3	Contact Mechanics Investigations on the Micrometer Scale	291
19.4	Conclusions	293
	References	294

20	AFM Applications for Contact and Wear Simulation	
	<i>Nikolai K. Myshkin, Mark I. Petrokovets, Alexander V. Kovalev . . .</i>	299
20.1	Introduction	299
20.2	Scale Factor in Tribology	299
20.3	AFM as a Tool of Contact Simulation	300
20.3.1	Contact of Rough Surfaces	300
20.3.2	Rough Contact with Adhesion	303
20.3.3	Multilevel Contact Models	307
20.3.4	Simulation of Contact Using AFM Images	309
20.3.5	Nanomechanical Probing of Soft Layers	312
20.4	AFM in Wear Simulation	316
20.4.1	Nanoscratching and Nanowear with AFM Tip.	317
20.4.2	Wear Simulation in AFM Contact Mode	320
20.5	Conclusions	323
	References	324
21	AFM Applications for Analysis of Fullerene-Like Nanoparticles	
	<i>Lev Rapoport, Armen Verdyan</i>	327
21.1	Introduction	327
21.2	Instrumentation	328
21.2.1	Friction Experiment	328
21.2.2	AFM Experiment	329
21.3	Characterization of Fullerene-Like Solid Lubricant Nanoparticles .	330
21.4	Friction of Solid Lubricant Films	331
21.5	Friction and Wear of the Surfaces Lubricated with Oil + <i>IF</i> Nanoparticles.	333
21.6	Friction of <i>IF</i> Nanoparticles Under Severe Contact Conditions . .	336
21.7	Mechanisms of Friction of the <i>IF</i> Nanoparticles	339
21.8	Conclusions	341
	References	341
22	Scanning Probe Methods in the Magnetic Tape Industry	
	<i>James K. Knudsen</i>	343
22.1	Introduction	343
22.2	Atomic Force Microscopy	345

22.2.1	Topographic Characterization of the Magnetic Tape	345
22.2.2	Topographic Characterization of Heads	349
22.2.3	Tape Roughness Analysis	351
22.3	Magnetic Force Microscopy	358
22.3.1	Methodology	358
22.3.2	Characterization of the Magnetic Tape with MFM	359
22.3.3	Characterization of Heads with MFM	364
22.4	Conclusions	367
	References	367
	Subject Index	371
