## Part I Subspaces and Sequences in Banach Spaces

---

<b>1</b>	<b>Disposition of Subspaces</b> . . . . .	3
1.1	Different Definitions of the Opening of Subspaces . . . . .	3
1.2	Inclination . . . . .	5
1.3	Connection between the Opening and Inclination . . . . .	10
1.4	Conditions for the Closure of Sums of Subspaces . . . . .	12
1.5	Projection Constants . . . . .	16
1.6	The Projection Function of a Banach Space . . . . .	20
<b>2</b>	<b>Sequences in Normed Spaces</b> . . . . .	23
2.1	Complete, Supercomplete and $\{c_k\}$ -Complete Sequences . . . . .	23
2.2	Minimal and Uniformly Minimal Sequences . . . . .	27
2.3	Bases . . . . .	32
2.4	Uniformly Convex and Uniformly Smooth Spaces . . . . .	34
2.5	Bases in Uniformly Convex Spaces . . . . .	36
2.6	Bases of Subspaces . . . . .	40
2.7	Stability of Sequences . . . . .	41
<b>3</b>	<b>Isomorphisms, Isometries and Embeddings</b> . . . . .	45
3.1	Classical Isomorphisms . . . . .	45
3.2	The Banach-Mazur Distance . . . . .	48
3.3	Minkowski Representation of $n$ -Dimensional Banach Spaces and Limiting Spaces . . . . .	49
<b>4</b>	<b>Spaces of Universal Disposition</b> . . . . .	53
4.1	Coincidence of Embeddings . . . . .	53
4.2	Existence of Spaces of Almost Universal Disposition . . . . .	54
4.3	Uniqueness and Universality of Spaces of Almost Universal Disposition . . . . .	55
4.4	Synthesis of Sequences . . . . .	59

<b>5</b>	<b>Bounded Approximation Properties</b> .....	61
5.1	Basic Definitions .....	61
5.2	The Shrinking CBAP .....	66

---

**Part II On the Geometry of Müntz Sequences**

---

<b>6</b>	<b>Coefficient Estimates and the Müntz Theorem</b> .....	73
6.1	The Müntz Theorem .....	73
6.2	The Clarkson-Erdős Theorem .....	78
6.3	Lacunary and Quasilacunary Müntz Sequences .....	81
6.4	On $\bar{c}$ -Completeness of Müntz Sequences .....	87
6.5	Coefficient Estimates on $[a, b]$ where $a > 0$ .....	90
<b>7</b>	<b>Classification and Elementary Properties of Müntz Sequences</b> .....	93
7.1	Different Classes of $A$ .....	93
7.2	Iterated Differences .....	95
7.3	Elementary Properties of Müntz Sequences and Polynomials .....	97
7.4	Differences of Müntz Sequences .....	99
7.5	The Inclination of Positive Octants of Müntz Sequences .....	102
<b>8</b>	<b>More on the Geometry of Müntz Sequences and Müntz Polynomials</b> .....	105
8.1	Lorentz-Saff-Varga-Type Theorems .....	105
8.2	The Newman Inequality .....	108
8.3	A Bernstein-Type Inequality in $C$ .....	113
8.4	Some Applications of the Clarkson-Erdős Theorem .....	114
<b>9</b>	<b>Operators of Finite Rank and Bases in Müntz Spaces</b> .....	117
9.1	Special Finite Rank Operators .....	117
9.2	Lacunary Müntz Spaces .....	124
9.3	Quasilacunary Müntz Spaces .....	127
9.4	Non-Existence of Monotone Bases in Non-dense Müntz Subspaces of $C$ .....	132
9.5	Balanced Sequences in $C$ .....	134
<b>10</b>	<b>Projection Types and the Isomorphism Problem for Müntz Spaces</b> .....	137
10.1	The Projection Function of Müntz Spaces .....	137
10.2	Some Müntz Spaces of L-Projection Type .....	138
10.3	Bases in Some Müntz Spaces of L-Projection Type .....	141
10.4	Non-Isometric Müntz Spaces in $C$ .....	143

<b>11</b>	<b>The Classes <math>[\mathcal{M}]</math>, <math>\mathcal{A}</math>, <math>\mathcal{P}</math> and <math>\mathcal{P}_\epsilon</math> .....</b>	<b>147</b>
11.1	The Classes $[\mathcal{M}]$ and $\mathcal{A}$ .....	147
11.2	The Class $\mathcal{P}$ .....	148
11.3	Interpolation and Approximation in the Spaces of Class $\mathcal{P}$ .....	150
11.4	Embeddings of the Spaces $X \in \mathcal{P}$ into $c_0$ .....	151
11.5	Universality for Finite Müntz Sequences .....	152
11.6	Sequences of Universal Disposition .....	154
<b>12</b>	<b>Finite Dimensional Müntz Limiting Spaces in <math>\mathcal{C}</math> .....</b>	<b>155</b>
12.1	Angle Convergence .....	155
12.2	Special Limiting Müntz Spaces of Finite Dimension .....	157
	<b>References .....</b>	<b>163</b>
	<b>Index .....</b>	<b>171</b>
