Part I Introduction to Neotropical Montane Oak Forests

1	Global and Neotropical Distribution and Diversity of Oak (Genus <i>Quercus</i>) and Oak Forests	3
	K.C. NIXON	
1.1	Introduction	3
1.2	Higher-Level Taxonomy	4
1.3	Distribution and Species Diversity	6
1.4	Species Diversity in Central America	9
1.5	Conclusions	11
	References	12

Part II Paleo-Ecology and Biogeography

2	Immigration of Oak into Northern South America: a Paleo-Ecological Document	17
	H. HOOGHIEMSTRA	
2.1	Introduction	17
2.2	Miocene Central American Oak Forest and Oak Migration into South America During the Late Pleistocene	17
2.3	Late Pleistocene Records of Neotropical Oak Forest Dynamics	21
2.4	Discussion	25
2.5	Conclusions	26
	References	27

3	Effects of the Younger Dryas Cooling Event on Late Quaternary Montane Oak Forest in Costa Rica	29
	G.A. ISLEBE and H. HOOGHMSTRA	
3.1	Introduction	29
3.2	Present Vegetation	30
3.3	Methods	30
3.4	Description of Pollen Zones	31
3.5	Paleoecology	32
3.6	Vegetation of the Late Glacial-Holocene Transition	33
3.7	Regional Younger Dryas	34
3.8	Conclusions	35
	References	35
4	Altitudinal Zonation of Montane Oak Forests Along Climate and Soil Gradients in Costa Rica	39
	M. KAPPELLE and J.-G. VAN UFFELEN	
4.1	Introduction	39
4.2	Altitudinal Transect Study	39
4.2.1	Sample Plots	39
4.2.2	Climate Measurements	40
4.2.3	Soil Analysis	40
4.2.4	Forest Inventory and Community Analysis	41
4.3	Altitudinal Oak Forest Zonation	41
4.3.1	Plant Species Richness	41
4.3.2	Forest Layering	42
4.3.3	Tree Stem Density	43
4.3.4	Classification of Montane Oak Forest Communities	44
4.3.5	Climatic Changes Along Elevations and Between Seasons	45
4.3.6	Soil Genesis and Classification	46
4.3.7	Soil Changes Along Elevations and Between Slopes	47
4.4	Conclusions	48
	References	50
5	Saprotrophic and Ectomycorrhizal Macrofungi of Costa Rican Oak Forests	55
	G.M. MUELLER, R.E. HALLING, J. CARRANZA, M. MATA, and J.P. SCHMIT	
5.1	Introduction	55
5.1.1	Importance of Macrofungi	55

Contents		XI
5.1.2	Need for Scientific Knowledge	55
5.1.3	Macrofungal Research in Costa Rica	57
5.2	Methods	58
5.2.1	Macrofungal Sampling	58
5.2.2	Information Sources and Data Analysis	58
5.3	Results	59
5.3.1	Polyporid Fungi	59
5.3.2	Fleshy Macrofungi	60
5.4	Conclusions	65
	References	66
6	Diversity and Biogeography of Lichens in Neotropical Montane Oak Forests	69
	H.J.M. SIPMAN	
6.1	Introduction	69
6.2	Floristic Composition	70
6.3	Phytogeographical Considerations	71
6.4	Conclusions	73
	References	80
7	Epiphytic Communities of Bryophytes and Macrolichens in a Costa Rican Montane Oak Forest	83
	I. HOLZ	
7.1	Introduction	83
7.2	Study Area	84
7.3	Primary Forest	84
7.3.1	Species Richness and Biogeography	84
7.3.2	Microhabitats and Life Forms	85
7.3.3	Host Preference, Vertical Distribution and Community Composition	86
7.3.4	Factors Controlling the Microhabitat Differentiation	92
7.4	Recovering Forests	92
7.4.1	General Aspects	92
7.4.2	Species Diversity	93
7.4.3	Indicator Species	94
7.4.4	Recovery of Cryptogamic Epiphyte Communities	94
7.5	Conclusions	05
	References	96

Part III Stand Structure and Composition

8	Composition and Structure of Humid Montane Oak Forests at Different Sites in Central and Eastern Mexico . . .	101
	I. LUNA-VEGA, O. ALCÁNTARA-AYALA, C.A. RUIZ-JIMÉNEZ, and R. CONTRERAS-MEDINA	
8.1	Humid Montane Oak Forests in Mexico	101
8.2	Study Area	102
8.3	Localities and Sampled Sites	102
8.3.1	Selection of Localities and Floristic Composition	102
8.3.2	Vegetation Sampling	102
8.4	Composition and Structure Analyses	104
8.4.1	Lolotla (LT)	104
8.4.2	Molocotlán (ML)	104
8.4.3	Teocelo-Ixhuacán (IX)	104
8.4.4	Ocuilán (OC)	108
8.4.5	Comparison of Localities	108
8.5	Conclusions	111
	References	112
9	Oak Forests of the Hyper-Humid Region of La Chinantla, Northern Oaxaca Range, Mexico	113
	J.A. MEAVE, A. RINCÓN, and M.A. ROMERO-ROMERO	
9.1	Introduction	113
9.2	La Chinantla Region	114
9.3	Floristic Survey and Vegetation Sampling	115
9.4	Altitudinal Distributions of Oak Species at La Chinantla	116
9.5	Higher-Elevation Oak Forests at the Watershed Divide	117
9.6	Lower-Elevation Oak Forests	121
9.7	Discussion	121
9.8	Conclusions	123
	References	123

10	Structure and Composition of Costa Rican Montane Oak Forests	127
