
Contents

1 Advanced Conventional Interconnects: State of the Art, Future Trends, and Limitations

<i>M. Moussavi</i>	1
1.1 Introduction.....	1
1.2 Interconnect Schemes Analysis.....	3
1.3 Technological Issues	5
1.4 Electrical Results: State of the Art	9
1.5 Future Trends	10
References	12

2 Optical Gain in Silicon and the Quest for a Silicon Injection Laser

<i>L. Pavesi</i>	15
2.1 Basics on Light Amplification and Gain.....	15
2.2 Limitation of Silicon for Light Amplification.....	17
2.3 Various Approaches to a Silicon Laser	19
2.3.1 Silicon Raman Laser	19
2.3.2 Bulk Silicon Light-Emitting Diodes	21
2.3.3 Optical Gain in Si Nanocrystals	23
2.3.4 Light Amplification in Er-Coupled Si-nc.....	27
2.4 Conclusions	30
References	30

3 Silicon Raman Laser, Amplifier, and Wavelength Converter

<i>O. Boyraz</i>	33
3.1 Introduction.....	33
3.2 Raman Amplification in Silicon	34
3.3 Raman Wavelength Conversion	39
3.4 Experimental Demonstrations	41
3.5 GeSi Raman Devices	47

3.6	Conclusions	48
	References	49
4 Electro-Optical Modulators in Silicon		
	<i>S. Libertino and A. Sciuto</i>	53
4.1	Introduction.....	53
4.2	Introduction to Optical Modulation	55
4.3	Mechanisms for Light Modulation	57
	4.3.1 Acousto-Optical Effect	58
	4.3.2 Electro-Optical Effects	58
	4.3.3 Thermo-Optical Effects in Silicon.....	61
	4.3.4 Free Carrier Absorption	64
4.4	Device Structures	65
4.5	Devices Proposed in Literature	69
	4.5.1 MEMS Devices.....	69
	4.5.2 Thermo-Optical Modulators	71
	4.5.3 Free Carrier Absorption-Based Modulators	72
4.6	How to Fabricate and Characterise an Electro-Optical Modulator	80
4.7	Conclusions	91
	References	92
5 Silicon Photodetectors and Receivers		
	<i>H. Zimmermann</i>	97
5.1	Photodetectors in Standard Silicon Technologies	97
	5.1.1 Photodetectors in Bipolar Technology	97
	5.1.2 Photodetectors in CMOS Technology	98
	5.1.3 Photodetectors in BiCMOS Technology	99
	5.1.4 Lateral PIN Photodiodes on SOI	101
5.2	Advanced Photodetectors	102
	5.2.1 Double Photodiode	102
	5.2.2 Vertical PIN Photodiodes	103
5.3	Photo-Receiver Circuits	107
	5.3.1 OS-OEICS for DVD Applications.....	107
	5.3.2 Fiber and Interconnect Receivers	114
5.4	Conclusion	121
	References	122
6 Active SiGe Devices for Optical Interconnects		
	<i>E. Cassan, S. Laval, D. Marris, M. Rowière, L. Vivien, M. Halbax,</i> <i>A. Lupu, and D. Pascal</i>	125
6.1	Introduction.....	125
6.2	Silicon-Germanium Technology for Optical Interconnects	126
6.3	SiGe and Ge Photodetectors	130
	6.3.1 SiGe Photodetectors	131
	Optimization of the SiGe Layer Stack	131

	Avalanche SiGe Photodetectors	133
	Resonant Cavity Enhanced SiGe Photodetectors	133
	Conclusion on SiGe Detectors	135
6.3.2	Ge Photodetectors.....	135
	Germanium Growth on Si	136
	Recent Advances on Ge Photodetectors	137
	Waveguide Ge Photodetectors for On-Chip Optical Interconnects	139
6.4	SiGe Switching Devices and Optical Modulators	142
6.4.1	Electro-Optical Effects in SiGe Materials	143
6.4.2	SiGe Switching Devices	143
6.4.3	SiGe Optical Modulators	144
	SiGe Electro-Absorption Modulators	144
	SiGe Electro-refractive Modulator	146
6.5	Conclusion	156
	References	157

7 An Introduction to Silicon Photonics

	<i>G.T. Reed</i>	161
7.1	The Ray Optics Approach to Describing Planar Waveguides	161
7.2	Reflection Coefficients	162
7.3	Phase of a Propagating Wave and its Wavevector	165
7.4	Modes of a Planar Waveguide	166
	7.4.1 The Symmetrical Planar Waveguide	167
	7.4.2 The Asymmetrical Planar Waveguide	169
7.5	Solving the Eigenvalue Equation for Symmetrical and Asymmetrical Waveguides.....	169
7.6	Monomode Conditions	171
7.7	Effective Index	172
7.8	Electromagnetic Theory	173
7.9	Another Look at Propagation Constants	173
7.10	Mode Profiles	174
7.11	Silicon on Insulator Photonics	175
	7.11.1 Introduction	175
	7.11.2 Silicon on Insulator Waveguides	176
	Modes of Two-Dimensional Waveguides	177
	7.11.3 The Effective Index Method of Analysis	178
	7.11.4 Large Single Mode Rib Waveguides	179
	7.11.5 Refractive Index and Loss Coefficient in Optical Waveguides	180
	7.11.6 The Contributions to Loss in an Optical Waveguide.....	181
	Scattering	182
	Absorption	183
	Radiation	184

7.11.7	Coupling to the Optical Circuit	185
	Grating Couplers	185
	Butt Coupling and End-Fire Coupling	188
7.11.8	Measurement of Propagation Loss in Integrated Optical Waveguides	190
	Insertion Loss and Propagation Loss	190
	The Cut-Back Method	190
	The Fabry–Perot Resonance Method	191
	Scattered Light Measurement	192
7.11.9	Optical Modulation Mechanisms in Silicon	192
	The Plasma Dispersion Effect	193
	The Thermo-Optic Effect	194
7.12	Devices	194
7.12.1	The Mach Zehnder Interferometer	194
7.12.2	The Waveguide Bend	196
7.12.3	The Waveguide to Waveguide Coupler	200
	References	202

8 Submicron Silicon Strip Waveguides

	<i>D. Van Thourhout, W. Bogaerts, and P. Dunon</i>	205
8.1	Introduction	205
8.2	Basic Properties	207
8.2.1	Refractive Index, Group Index, Single Mode Condition	207
8.2.2	Losses	208
8.2.3	Box Layer Thickness	211
8.2.4	Polarization	212
8.2.5	Temperature Dependence	213
8.2.6	Bend Radius	213
8.2.7	Waveguide Pitch	214
8.3	Fabrication	215
8.3.1	Introduction	215
8.3.2	CMOS-Compatible Deep-UV Lithography Based Fabrication Process	216
8.3.3	CMOS-Compatibility	220
8.4	Devices	222
8.4.1	Couplers–Splitters	222
8.4.2	Crossings	223
8.4.3	Fiber-Chip Couplers	224
8.4.4	Ring Resonators	229
8.4.5	Arrayed Waveguide Grating Devices	232
8.4.6	Cascaded Mach-Zehnder Interferometers	233
8.4.7	Active Devices	234
	References	234

9 Photonic Crystal Microcircuit Elements	
<i>T.F. Krauss</i>	239
9.1 Introduction	239
9.2 Stopbands and Bandgaps	240
9.2.1 One-Dimensional (1D) Periodic Structures	240
9.2.2 Two-Dimensional (2D) Periodic Structures	242
9.2.3 Photonic Crystal Waveguides	242
9.2.4 The Light Line	244
9.3 Wave Propagation in Periodic Structures	246
9.3.1 Bloch Modes	246
9.4 Superprism and Supercollimator	248
9.4.1 Superprism	248
9.4.2 Supercollimator	251
9.5 Slow Waves	252
9.6 Dispersion Compensation	256
9.7 Photonic Crystal Cavities	257
9.7.1 Purcell Effect and Strong Coupling	257
9.7.2 High Q Cavities in 2D Photonic Crystals	258
9.8 Conclusions	259
References	260
10 On Chip Optical Waveguide Interconnect: the Problem of the In/Out Coupling	
<i>R. Orobtcouk</i>	263
10.1 Introduction	263
10.2 Coupling Efficiency	264
10.3 3D Taper	266
10.4 Tips Taper	269
10.5 Guide to Guide Coupler	271
10.6 Grating Coupler	274
10.7 Guide to Guide Assisted by Grating Coupler	280
