1 Rhizosphere Biology – an Overview	1
<i>Chakravarthula Manoharachary, Krishna G. Mukerji</i>	
1.1 Introduction	1
1.2 Soil Microbes	1
1.3 Rhizosphere Soil.....	3
1.3.1 Rhizoplane	7
1.3.2 Root Exudates.....	7
1.3.3 Rhizosphere and Compounds Released by Roots	8
1.4 Decomposition of Organic/Inorganic Compounds in Rhizosphere	10
1.5 Root Sensing Signals	11
1.6 Conclusions	11
References	12
2 Methods and Techniques for Isolation, Enumeration and Characterization of Rhizosphere Microorganisms	17
<i>Nandanavanam Ranganayaki, Kolluru V.B.R. Tilak, Chakravarthula Manoharachary, Krishna G. Mukerji</i>	
2.1 Introduction	17
2.2 Isolation.....	18
2.2.1 Sampling.....	18
2.2.2 Fungi.....	20
2.2.3 Bacteria	22
2.2.4 Actinomycetes	23
2.2.5 Algae.....	23
2.3 Enumeration.....	25
2.3.1 Counting.....	26
2.3.2 Microscopy	26
2.3.3 Microbial Biomass.....	27
2.3.4 Immunological Detection Methods	29
2.3.5 Molecular Techniques	30

2.4	Mathematical Modeling	31
2.4.1	Mechanistic Models	32
2.4.2	Descriptive Models	33
2.4.3	Enumeration in Real Time Systems	33
2.5	Conclusions	33
	References	34
3	Root Exudates as Determinant of Rhizospheric Microbial Biodiversity	39
	<i>Geeta Singh, Krishna G. Mukerji</i>	
3.1	Introduction	39
3.2	Composition of Root Exudates.....	41
3.3	Factors Affecting Root Exudates	41
3.4	Roles of Root Exudates	42
3.4.1	Root Exudates vs AMF	43
3.5	Host Influence.....	44
3.5.1	Diversity of Microbial Populations in the Rhizo- sphere of Different Plant Species.....	45
3.5.2	Bacterial Population	45
3.5.3	Exudation in Genetically Engineered Plants	47
3.6	Conclusions	48
	References	49
4	Rhizosphere Microbial Community Dynamics	55
	<i>Roopam Kapoor, Krishna G. Mukerji</i>	
4.1	Introduction	55
4.2	Root-Microbe Communication	55
4.2.1	Root Exudates.....	56
4.2.2	Microbial Interactions.....	56
4.2.3	Signalling Factors.....	58
4.3	Microbial Dynamics in Terrestrial Ecosystem	58
4.4	Soil Microbial Community in Relation to Plant Diversity	59
4.5	Microbial Community and Plant Genotype.....	60
4.5.1	Transgenics Expressing T ₄ Lysozyme	60
4.6	Atmospheric Carbon Dioxide	62
4.7	Microbial Community and Rhizodeposition	63
4.8	Agronomical Regimes and Microbial Diversity.....	63
4.8.1	Crop Sequence.....	65
4.9	Conclusions	66
	References	66

5	The Role of Rhizotrons and Minirhizotrons in Evaluating the Dynamics of Rhizoplane-Rhizosphere Microflora	71
	<i>Bobbie L. McMichael, John C. Zak</i>	
5.1	Introduction	71
5.2	Use of Rhizotrons and Minirhizotrons in Root Research	72
5.2.1	Minirhizotrons	73
5.2.2	Data Collection from Rhizotrons and Minirhizotrons	75
5.3	Advantages and Disadvantages of Rhizotrons and Minirhizotrons	76
5.4	Use of Rhizotrons and Minirhizotrons in Rhizoplane and Rhizosphere Research	78
5.5	Mycorrhizae	78
5.6	Soil Borne Pathogens.....	82
5.7	Root Surface or Rhizoplane Phenomena.....	82
5.8	Conclusions	84
	References	84
6	Significance of Bacteria in the Rhizosphere	89
	<i>David B. Nehl, Oliver G.G. Knox</i>	
6.1	Introduction	89
6.2	Functional Diversity of Rhizobacteria	90
6.2.1	Soil Structure	91
6.2.2	Phosphate Solubilisation	92
6.2.3	Nitrogen Cycling	93
6.2.4	Symbioses Between Plants and Diazotrophic Rhizobacteria	94
6.2.5	Free-Living Diazotrophic Rhizobacteria	95
6.2.6	The Soil Food Web	97
6.2.7	Interactions Among Rhizosphere Microorganisms....	98
6.2.8	Functional Flux in the Rhizosphere.....	99
6.2.9	Rhizobacteria are Moderators at the Plant-Soil Interface	100
6.3	Selective Enrichment and Diversity of Bacteria in the Rhizosphere	101
6.3.1	Competitiveness of Rhizobacteria.....	102
6.3.2	Selective Plant Factors	104
6.4	Evolution of the Rhizosphere.....	106
6.4.1	Gene Flow in the Rhizosphere	106
6.4.2	Selection Processes in the Rhizosphere.....	107
6.4.3	Rhizobacteria as Determinants of Plant Diversity.....	109
6.5	Conclusions	109
	References	110

7 Interactions Among Beneficial Microorganisms	121
<i>Anil Kumar Saxena, Rasika Shende, Minakshi Grover</i>	
7.1 Introduction	121
7.2 Interaction Between <i>Rhizobium</i> and PGPR	122
7.2.1 <i>Rhizobium</i> and Nodulation Promoting Rhizobacteria	122
7.2.2 <i>Rhizobium</i> and Biocontrol Agents.....	124
7.3 Interaction Between AM Fungi and <i>Rhizobium</i>	126
7.3.1 Influence on Nodulation and Nitrogen Fixation	126
7.3.2 Specific Compatibility and Yield.....	126
7.3.3 Interaction Under Stress.....	128
7.4 Interaction of AM Fungi with PGPR	128
7.4.1 Mycorrhiza Development and Population Density of PGPR.....	128
7.4.2 Interaction of AMF and PGPR in Plant Growth Promotion.....	129
7.5 Conclusions	131
References	132
8 Bacterial Community Composition and Activity in Rhizosphere of Roots Colonized by Arbuscular Mycorrhizal Fungi	139
<i>Petra Marschner, Sari Timonen</i>	
8.1 Introduction	139
8.2 Rhizosphere Colonization by Bacteria.....	141
8.2.1 Soil Bacteria	141
8.2.2 Pseudomonads.....	142
8.2.3 N ₂ Fixing Bacteria and P Solubilizers	142
8.2.4 Biological Control Organisms	144
8.3 Bacterial Community Composition	144
8.4 Bacterial Activity	147
8.5 Effects of Bacteria on AM Fungi	148
8.6 Bacteria in AM Fungi	148
8.7 Conclusions	149
References	149
9 Mycorrhizosphere Concept	155
<i>Sari Timonen, Petra Marschner</i>	
9.1 Introduction	155
9.2 Mycorrhizosphere Structure.....	155
9.3 Evolution and Occurrence of Mycorrhizospheres.....	158
9.4 Mycorrhizospheres as Habitats	159
9.5 Microorganisms Involved in Forming Mycorrhizospheres ...	160
9.5.1 Mycorrhizal Fungi.....	161

9.5.2	Other Fungi.....	161
