## Contents

<b>-1</b>	<b>Notation and Convention</b> .....	1
<b>0</b>	<b>Preliminaries</b> .....	3
0.1	Doob's Maximal Identity .....	3
0.2	Balayage Formula .....	4
0.3	Predictable Compensators .....	6
0.4	$\sigma$ -fields Associated with a Random Time $A$ .....	6
0.5	Integration by Parts Formulae .....	7
0.6	$H^1$ and BMO Spaces .....	7
0.7	Exercises .....	8
<b>1</b>	<b>Enlargements of Filtrations</b> .....	11
1.1	Some General Problems of Enlargements .....	11
1.2	Progressive Enlargement .....	12
1.2.1	Decomposition Formula .....	13
1.2.2	Pitman's Theorem on $2S-B$ and Some Generalizations via Some Progressive Enlargement of Filtration .....	17
1.3	Initial Enlargement .....	18
1.4	Further References .....	22
1.5	Exercises .....	22
<b>A</b>	<b>Appendix: Some Enlargements Formulae</b> .....	31
	Tables $1\alpha$ and $1\beta$ : Progressive Enlargements .....	32
	Tables $2\alpha$ and $2\beta$ : Initial Enlargements .....	34
	Comments on the Tables .....	36
<b>2</b>	<b>Stopping and Non-stopping Times</b> .....	41
2.1	Stopping Times and Doob's Optional Theorem .....	41
2.1.1	The Knight-Maisonneuve Characterization of Stopping Times .....	41
2.1.2	D. Williams' Example of a Pseudo-stopping Time .....	42

2.1.3	A Characterization of Pseudo-stopping Times . . . . .	43
2.2	How Badly are the BDG Inequalities Affected by a General Random Time? . . . . .	44
2.2.1	A Global Approach (Common to all $A$ 's) . . . . .	45
2.2.2	An "Individual" Approach (Depending on $A$ ) . . . . .	46
2.3	Local Time Estimates . . . . .	47
2.4	Further References . . . . .	49
2.5	Exercises . . . . .	49
<b>3</b>	<b>On the Martingales which Vanish on the Set of Brownian Zeroes . . . . .</b>	<b>53</b>
3.1	Some Quantities Associated with $\gamma$ . . . . .	53
3.1.1	Azéma Supermartingale and the Predictable Compensator Associated with $\gamma$ . . . . .	54
3.1.2	Path Decomposition Relative to $\gamma$ . . . . .	55
3.1.3	Brownian Meander . . . . .	55
3.2	Some Examples of Martingales which Vanish on $\mathcal{Z} = \{t; B_t = 0\}$ . . . . .	57
3.3	Some Brownian Martingales with a Given Local Time, or Supremum Process . . . . .	59
3.4	A Remarkable Coincidence between $\mathbb{E}[X \mathcal{F}_\gamma]$ and $X_\gamma$ . . . . .	60
3.5	Resolution of Some Conditional Equations . . . . .	62
3.6	Understanding how $\mathbb{E}[X \mathcal{F}_\gamma]$ and $X_\gamma$ Differ . . . . .	64
3.7	Exercises . . . . .	66
<b>4</b>	<b>PRP and CRP for Some Remarkable Martingales . . . . .</b>	<b>71</b>
4.1	Definition and First Example . . . . .	71
4.2	PRP and Extremal Martingale Distributions . . . . .	74
4.3	CRP: An Attempt Towards a General Discussion . . . . .	75
4.3.1	An Attempt to Understand the CRP in Terms of a Generalized Moments Problem . . . . .	76
4.3.2	Some Sufficient Conditions for the CRP . . . . .	77
4.3.3	The Case of the Azéma Martingale . . . . .	79
4.4	Exercises . . . . .	83
<b>5</b>	<b>Unveiling the Brownian Path (or history) as the Level Rises . . . . .</b>	<b>87</b>
5.1	Above and Under a Given Level . . . . .	88
5.1.1	First Computations in Williams' Framework . . . . .	88
5.1.2	First Computations in Azéma-Hu's Framework . . . . .	90
5.2	Rogers-Walsh Theorem about Williams' Filtration . . . . .	93
5.2.1	Some Space Martingales which are Constant up to a Fixed Level . . . . .	93
5.2.2	A Dense Family of Continuous Martingales . . . . .	94
5.3	A Discussion Relative to $(\mathcal{E}_A^a, a \in \mathbb{R})$ . . . . .	95
5.3.1	Hu's Result about $(\mathcal{E}_A^a, a \in \mathbb{R})$ -Martingales . . . . .	95

5.3.2	Some Markov Processes with Respect to $(\mathcal{E}_\mathbb{A}^a, a \in \mathbb{R}) \dots$	97
5.4	Some Subfiltrations of the Brownian Filtration .....	99
5.5	Exercises .....	101
<b>6</b>	<b>Weak and Strong Brownian Filtrations .....</b>	<b>103</b>
6.1	Definitions .....	104
6.2	Examples of Weak Brownian Filtrations .....	105
6.2.1	Change of Probability .....	106
6.2.2	Change of Time .....	108
6.2.3	Walsh's Brownian Motion and Spider Martingales .....	109
6.3	Invariants of a Filtration .....	112
6.4	Further References .....	114
6.5	Exercises .....	114
<b>7</b>	<b>Sketches of Solutions for the Exercises .....</b>	<b>117</b>
	<b>References .....</b>	<b>141</b>
	<b>Index .....</b>	<b>157</b>
