1 A Paediatric Overview of Children Seen in the ENT Outpatient Department	1	3 Anaesthesia for Paediatric ENT Surgery	11
<i>Helen Bantock</i>		<i>Ian Barker</i>	
Introduction: Paediatric Consultation	1	Introduction	11
Development in the First Five Years of Life	2	General Considerations	12
Children with Special Needs	2	Anaesthesia for Children	12
Speech and Language Delay or Disorder	2	Anaesthesia for the Newborn	12
Autistic Spectrum	2	<i>Hypoxia</i>	12
Global Delay	3	<i>Hypothermia</i>	12
Specific Learning Difficulties	3	<i>Hypoglycaemia</i>	12
Syndromes	3	Intravenous Fluid Therapy for Children	12
<i>Down Syndrome</i>	3	Specific Conditions	13
Behaviour Difficulties	3	Post-Tonsillectomy Bleeding	13
<i>Attention Deficit Hyperactivity Disorder</i>	3	<i>Assessment</i>	13
Social Difficulties	3	<i>Resuscitation</i>	13
<i>Types of Abuse</i>	3	<i>Anaesthesia</i>	13
<i>Child Abuse in the Context of an ENT Clinic</i>	4	Airway Endoscopy	13
<i>Alerting Signs of Non-Accidental Injury and Abuse in a Clinic Setting</i>	4	<i>Indications</i>	13
<i>What to do if Abuse is Suspected</i>	4	<i>Induction</i>	14
Links with Local Services	4	Maintenance	14
Primary Care Team	4	Laser Surgery	14
The Child Development Team	4	Obstructive Sleep Apnoea	15
The Education Service	4	Anaesthetic Equipment	15
Child and Adolescent Mental Health Services	5	Endotracheal Tubes	15
Social Services	5	Laryngeal Mask Airway	16
Non-Statutory Organisations	5	Pulse Oximeter	16
		<i>Limitations</i>	16
		Carbon Dioxide Monitor	16
2 Nursing Aspects of Paediatric ENT	7	4 The Evolution of Speech and Language	19
<i>Rosalind Wilson and Judith Barton</i>		<i>John F. Stein</i>	
Introduction	7	Introduction	19
Communication	7	Is Language Innate or Learnt?	20
Consent for Surgery	8	Human Evolution	20
Staffing	8	Left-Sided Specialisation	20
The Physical Environment	8	Emotional Vocalisations	21
Tracheostomy	8	Mirror Neurones	21
Parents	9	Bipedalism and the Aquatic Ape Hypothesis	22
Day Surgery	9	Larynx Descent	22
Pain Control	10		

Brain Enlargement	23	7 Genetics of Non-Syndromic Deafness	47
Right-Handedness	23	<i>Maria Bitner-Glindzicz</i>	
Selective Advantages of Speech	23	Introduction	47
Gesture and Speech	24	Investigation of the Aetiology	
Writing	24	of Hearing Loss	48
Conclusion	24	Reasons	48
		Protocol	48
5 Evidence-Based Management		History	48
of Speech and Language Delays	27	Examination	48
<i>Amy McConkey Robbins</i>		Investigation	48
Introduction	27	Genetic Hearing Loss	49
Milestones for Communication		Recessive Genes: Common/	
Development	28	Recognizable Types of	
Normal Variation in Language		Non-Syndromic Genetic Hearing Loss	50
Learning	28	<i>GJB2 (Connexin26)</i>	50
Normal Variation versus		<i>SLC26A4 (Pendred and Non-</i>	
Communication Delay	28	<i>Syndromic Enlarged Vestibular</i>	
Communication Milestones		<i>Aqueduct)</i>	52
in the First Year of Life	29	<i>OTOF (Auditory Neuropathy)</i>	53
Clinical Use of Table 5.1 by Physicians	31	Dominant Genes: Common/	
Speech and Language Intervention		Recognizable Types of Non-	
is Correlated with Young Age		Syndromic Genetic Hearing Loss	53
at Identification	32	<i>WFS1 (Dominant Low-Frequency</i>	
Hearing Loss can be Identified		<i>Sensorineural Hearing Loss)</i>	53
and Treated as Early as the Newborn		<i>COCH (Menière-Like Symptoms)</i> ...	54
Period	32		
Differential Diagnosis of Several		8 ENT-Related Syndromes	57
Communication Disorders	33	<i>David Albert and Fiona Connell</i>	
Association Between Some Speech/		Definition	58
Language Characteristics and Reading		Introduction	58
Disability	34	Resources	59
Evidence-Based Approach		Syndromes of Particular Relevance	
to the Management of Children's Speech		to the ENT Clinician	59
and Language Development	34	Down Syndrome	59
		<i>Genetics</i>	59
6 Paediatric Voice	37	<i>ENT Features</i>	59
<i>Mark E. Boseley</i>		<i>General Features</i>	59
<i>and Christopher J. Hartnick</i>		Pierre Robin Sequence	59
Introduction	37	<i>Genetics</i>	59
Anatomy	38	<i>ENT Features</i>	60
Gross	38	Treacher Collins Syndrome	60
Histology	38	<i>Genetics</i>	60
Diagnostic Techniques	39	<i>ENT Features</i>	60
Physical Examination	39	<i>General Features</i>	60
Voice Outcome Surveys	39	Goldenhar Syndrome	60
Common Voice Pathologies	39	CHARGE Syndrome	60
Vocal Fold Nodules	39	<i>Genetics</i>	60
Voice Results Following		<i>ENT Features</i>	60
Laryngotracheal Reconstruction	42	<i>General Features</i>	61
Recurrent Respiratory Papillomatosis	43	<i>Genetics</i>	61
Vocal Fold Paralysis	43	<i>ENT Features</i>	61
		<i>General Features</i>	61

<i>Head and Neck Examination</i>	113	Tympanomastoid Surgery	125
<i>General Examination</i>	113	Hearing	126
Investigation	113	Adenotonsillar Surgery	127
<i>Laboratory Tests</i>	113	HIV/AIDS and Tuberculosis	127
<i>Radiology</i>	113	Tracheotomy	128
<i>Biopsy Sampling versus Fine-Needle</i>		ENT Aspects of Accidents and Trauma	128
<i>Aspiration for Cytology</i>	114	Paediatric Head and Neck Tumours	128
Part 2. Inflammatory Disorders			
of the Neck and Lymphadenopathy	114	14 Tonsils and Adenoids	131
Viral Infections	114	<i>Anne Pitkäranta and Pekka Karma</i>	
<i>Viral Upper Respiratory Tract</i>		Waldeyer's Ring	131
<i>Infections</i>	114	Tonsillitis	132
<i>Infectious Mononucleosis</i>	115	Acute Tonsillitis	132
<i>Human Immunodeficiency Virus</i> ...	115	Viral Tonsillitis	132
Bacterial Infections	115	Bacterial Tonsillitis	133
<i>Acute Lymphadenopathy</i>		Chronic Tonsillitis	134
<i>with Suppuration</i>	115	Complications of Tonsillitis	134
<i>Mycobacterial Neck Infections</i>	115	<i>Peritonsillar Abscess (Quinsy)</i>	134
Non-Infectious Inflammatory		<i>Adenotonsillar Hyperplasia</i>	134
Lymphadenopathy	116	<i>Mouth Breathing</i>	134
<i>Kawasaki Syndrome</i>	116	Tonsillectomy	135
<i>Sinus Histiocytosis</i>		Indications	135
<i>(Rosai Dorfman Disease)</i>	116	Techniques	135
<i>Kikuchi-Fujimoto Disease</i>	116	Complications	136
Part 3. Haemangiomas		Evaluation of the Adenoids	137
and Vascular Malformations	116	Adenoidectomy	137
Terminology	116	Indications	137
<i>Haemangiomas</i>	117	Techniques	138
<i>Vascular Malformations</i>	117	Complications	138
<i>Capillary Malformations</i>	117	Neoplasms of the Tonsils and the	
<i>Venous Malformations</i>	118	Adenoids	138
<i>Arteriovenous Malformations</i>	119		
Part 4. Head and Neck Malignancy		15 The Causes and Effects of Obstructive	
in Children	119	Sleep Apnoea in Children	141
Hodgkin's Disease	119	<i>Ray W. Clarke</i>	
Non-Hodgkin Lymphoma	119	Pathophysiology of Childhood	
Rhabdomyosarcoma	120	Obstructive Sleep Apnoea	142
Non-Rhabdomyosarcoma Sarcomas	120	Introduction	142
Thyroid Carcinoma in Children	120	Prevalence	142
Salivary Gland Malignancy	120	Aetiology	142
Neuroblastoma	120	Mechanisms	143
Nasopharyngeal Carcinoma	120	Diagnosis of OSA	143
Teratoma	121	The Spectrum of Airway Obstruction	143
Juvenile Nasopharyngeal		Diagnostic Criteria	144
Angiofibroma	121	Presentation	144
		<i>Clinical Features</i>	144

<i>Pharmacological Treatment</i>	147	Human Immunodeficiency Virus/ Acquired Immune Deficiency Syndrome	162
<i>Dental Devices</i>	147	Sarcoidosis	162
<i>Continuous Positive Airway Pressure</i>	147	Obstructive Disorders	162
<i>Postural Therapy</i>	147	Salivary Gland Calculi	162
<i>Nasopharyngeal Airway</i>	147	<i>Presentation</i>	162
<i>Adenotonsillectomy</i>	147	<i>Treatment</i>	162
<i>Nasal Surgery</i>	148	<i>Ranula</i>	162
<i>Maxillomandibular Surgery</i>	148	<i>Treatment</i>	162
<i>Palatal Surgery</i>	148	Salivary Gland Tumours in Childhood	162
<i>Tongue-Base Surgery</i>	149	Benign	162
<i>Tracheotomy</i>	149	Malignant	163
Challenges in OSA Management	149	<i>Presentation</i>	163
OSA and Obesity	149	<i>Pathology</i>	163
OSA in Special Needs Children	149	<i>Treatment</i>	163
		<i>Complications of Parotid Surgery</i> ...	163
16 Cleft Lip and Palate	153		
<i>John Boorman</i>			
Embryology	153	18 Drooling – Salivary Incontinence	
Aetiology	153	(Sialorrhoea)	165
Prevalence	153	<i>Peter D. Bull</i>	
Presentation	154	Introduction	165
Robin Sequence	154	Innervation	165
Feeding	155	Assessment	165
Surgery for Cleft Lip and Palate	155	Non-Surgical Management	166
Velopharyngeal Insufficiency	156	<i>Posture Control</i>	166
Sub-mucous Cleft Palate and Bifid		<i>Drug Treatment</i>	166
Uvula	156	Surgical Management	167
Assessment of VPI	157		
Treatment of VPI	157	19 Congenital Cysts, Sinuses	
Velocardiofacial Syndrome	157	and Fistulae	169
		<i>Fiona B. MacGregor</i>	
17 Salivary Gland Disease in Childhood	159	Introduction	170
<i>Peter D. Bull</i>		Developmental Anatomy	170
Introduction	159	Classification of Congenital Branchial Abnormalities in the Neck	170
History, Investigations	159	Pre-Auricular Sinuses	170
History	159	<i>Presentation</i>	171
Examination	160	<i>Investigations</i>	171
Investigation	160	<i>Management</i>	171
Congenital Disorders	160	<i>Complications</i>	171
Congenital Cysts and Fistulae	160	First Branchial Arch Anomalies ...	171
Inflammatory Disorders		<i>Presentation</i>	171
of the Salivary Glands	160	<i>Investigations</i>	172
Viral Infections	160	<i>Treatment</i>	172
Bacterial Disease	160	<i>Complications</i>	172
Atypical Mycobacterial Disease			
of Salivary the Glands	160		

Second Branchial Arch Anomalies ...	172	22 Congenital Disorders of the Larynx, Trachea and Bronchi	189
<i>Presentation</i>	172	<i>Martin Bailey</i>	
<i>Investigations</i>	172	Introduction	189
<i>Treatment</i>	172	Larynx	189
Third and Fourth Arch Anomalies ...	172	Supraglottis	190
<i>Presentation</i>	172	Laryngomalacia	190
<i>Investigations</i>	173	Saccular Cysts and Laryngocoeles ...	190
<i>Management</i>	173	Lymphangioma	191
<i>Complications</i>	173	Bifid Epiglottis	191
Branchio-Oto-Renal Syndrome	173	Glottis	191
Thyroglossal Duct Cyst	173	Laryngeal Webs	191
<i>Presentation</i>	173	Laryngeal Atresia	191
<i>Investigations</i>	174	Cri-du-Chat Syndrome	191
<i>Treatment</i>	174	Vocal Cord Paralysis	191
<i>Complications</i>	174	Subglottis	192
Lingual Thyroid	174	Congenital Subglottic Stenosis	192
<i>Presentation</i>	174	Subglottic Haemangioma	193
<i>Investigations</i>	174	Laryngeal and Laryngotracheo- Oesophageal Cleft	193
<i>Management</i>	174	Trachea and Bronchi	194
<i>Complications</i>	174	Agenesis	194
Dermoid Cyst	174	Stenosis	194
<i>Presentation</i>	175	Tracheomalacia and Bronchomalacia	194
<i>Investigations</i>	175	Tracheo-Oesophageal Fistula	194
<i>Treatment</i>	175	Vascular Compression	194
Nasal Dermoid Cysts	175	<i>Vascular Ring</i>	195
<i>Presentation</i>	175	<i>Vascular Sling</i>	195
<i>Investigations</i>	175	Anomalous Bifurcations	195
<i>Management</i>	175	Congenital Cysts and Tumours	195
20 Airway Endoscopy and Assessment in Children	177	23 Acquired Disorders of the Larynx in Children	197
<i>Sonia Ayari-Khalfallah and Patrick Froehlich</i>		<i>Neville P. Shine and Christopher Prescott</i>	
Introduction	177	Infections	197
Rigid Endoscopy	178	Laryngitis	197
Supplementary Examinations	181	Laryngotracheobronchitis (Croup) ..	198
21 Emergency Management of the Paediatric Airway	183	Bacterial Laryngitis/Tracheitis	199
<i>Michael Kuo and Michael Rothera</i>		Supraglottitis (Epiglottitis)	200
Anatomical and Physiological		Unusual Laryngeal Infections	200
Considerations	183	<i>Herpetic Laryngitis</i>	200
Clinical and Radiological Assessment		<i>Candidiasis</i>	201
of the Acutely Compromised Upper		<i>Tuberculosis</i>	201
Airway	183	<i>Diphtheria</i>	202
Resuscitation and Pre-Operating-Room		Gastro-Oesophageal Reflux Disease –	
Management	186	Laryngeal Manifestations	202
Endoscopy Under General Anaesthesia	186	Laryngeal Trauma	203
Surgical Management of the Acutely		External Trauma	203
Obstructed Paediatric Airway	187	Internal Trauma	204

Mucocoeles	323	<i>Limitations</i>	343
36 Management of the Deaf Child	327	<i>Use</i>	343
<i>Kevin Patrick Gibbin</i>		Visual Reinforcement Audiometry:	
Introduction	327	Age Six Months to Three Years	344
Aetiology and Pathology		<i>Benefits</i>	344
of Childhood Deafness	328	<i>Limitations</i>	344
Pre-natal Causes	328	<i>Use</i>	344
Perinatal Causes	328	Conditioned Audiometry:	
Post-natal Causes	329	Two to Three Years and Upwards	344
Epidemiology	329	Play Audiometry:	
Risk Factors for Hearing Loss in		Age Two to Three Years and Upwards	344
Children	330	<i>Benefits</i>	345
Identification of Hearing Loss	330	<i>Limitations</i>	345
Screening – Targeted versus Universal	330	Speech Audiometry:	
Early Childhood/Pre-school		Age Two to Six Years and Upwards ..	345
Programmes	330	<i>Benefits</i>	346
Monitoring of Special Groups	331	<i>Limitations</i>	346
<i>Post-Meningitis Screening</i>	331	Cortical Electric Response Audiometry	346
Reactive Testing	331	Audiometric Steady-State Response	347
Investigation	331	<i>Benefits</i>	348
<i>Clinical History Taking</i>	331	<i>Limitations</i>	348
<i>Clinical Examination</i>	332	<i>Use</i>	348
<i>Special Investigations</i>	332	Tympanometry and Acoustic Reflexes	348
Audiological Assessment	333	Special Situations	349
Treatment of Children with Hearing		38 Otoplasty and Common Auricular	
Loss	333	Deformities	351
37 Audiometric Testing of Children	337	<i>Werner J. Heppt</i>	
<i>John Graham, Milanka Drenovak</i>		Introduction	351
<i>and William Hellier</i>		Basics	352
Introduction	338	Development of the Auricle	352
Neonatal Tests Used From Soon After		Clinical Anatomy	352
Birth Until Six Months	339	Classification of Congenital Deformities	353
Transient Otoacoustic Emission		Protruding Ears (Prominent Ears, Bat	
Testing	339	Ears)	353
<i>Benefits</i>	339	Causes	353
<i>Limitations</i>	339	Conservative Treatment Options	353
<i>Use</i>	339	Surgical Correction (Pinnaplasty) ...	354
Distortion Product Otoacoustic		<i>Goals</i>	354
Emissions	339	<i>Choice of Appropriate Method</i>	354
Auditory Brainstem Response	339	<i>Antihelix</i>	354
<i>Benefits</i>	341	<i>Conchal Hyperplasia, Increased</i>	
<i>Limitations</i>	341	<i>Conchomastoid Angle</i>	356
<i>Use</i>	341	<i>Prominent Lobule</i>	357
Electrocochleography	342	<i>Severe Deformities, Revision Surgery</i>	357
<i>Benefits</i>	342	Operative Management	357
<i>Limitation</i>	342	<i>Timing</i>	357
Behavioural Testing: Ages Six Months		<i>Medical Consultation</i>	357
to Three Years	342	<i>Peri- and Post-operative Care</i>	357
Distraction Testing:		<i>Results</i>	357
Age Six to Eighteen Months	342	Trauma	358
<i>Benefits</i>	343	Abrasion	358
		Haematoma	358
		Laceration	358
		Thermal Injuries, Frostbite	359
