Abbreviations and Acronyms	XV
----------------------------------	----

Part I Introduction

1 Acoustic Echo and Noise Control – Where did we come from and where are we going?

E. Hänsler, G. Schmidt

1.1 The Journey to Maturity	3
1.2 State of the Art	10
1.3 Outline of this Book	12

Part II Multi-Microphone Processing

2 Joint Optimization of Acoustic Echo Cancellation and Adaptive Beamforming

W. Herbordt, W. Kellermann, S. Nakamura

2.1 Introduction	19
2.2 Concepts for Joint Acoustic Echo Cancellation and Adaptive Beamforming	21
2.3 Joint Optimization of Acoustic Echo Cancellation and Adaptive Beamforming	27
2.4 Implementation	34
2.5 Experimental Results	38
2.6 Conclusion	43

3 Blind Source Separation of Convolutive Mixtures of Audio Signals in Frequency Domain

S. Makino, H. Sawada, R. Mukai, S. Araki

3.1	Introduction	51
3.2	Blind Source Separation for Convolutive Mixtures	53
3.3	Overview of Frequency-Domain Approach	55
3.4	Complex-Valued Independent Component Analysis	58
3.5	Separation Mechanism of Blind Source Separation	60
3.6	Source Localization	61
3.7	Permutation Alignment	67
3.8	Scaling Alignment	72
3.9	Spectral Smoothing	72
3.10	Experimental Results	75
3.11	Conclusion	85

4 Localization and Tracking of Acoustical Sources

G. Doblinger

4.1	Introduction	91
4.2	Source Localization Using the Generalized Cross-Correlation Function	94
4.3	Source Localization Based on Interaural Time Differences	97
4.4	Source Localization Using Adaptive Filters	103
4.5	Some Remarks on Algorithm Selection	110
4.6	Frequency-Domain Adaptive Beamformer with Speaker Tracking	111
4.7	Conclusions	120

Part III Echo Cancellation

5 Adaptive Algorithms for the Identification of Sparse Impulse Responses

J. Benesty, Y. Huang, J. Chen, P. A. Naylor

5.1	Introduction	125
5.2	Notation and Definitions	126
5.3	Sparseness Measure	128
5.4	The NLMS, PNLMS, and IPNLMS Algorithms	130
5.5	Universal Criterion	132
5.6	Exponentiated Gradient Algorithms	135
5.7	The Lambert W Function Based Gradient Algorithm	140
5.8	Some Important Links Among Algorithms	141
5.9	Simulations	145
5.10	Conclusions	149

6 Selective-Tap Adaptive Algorithms for Echo Cancellation

P. A. Naylor, A. W. H. Khong

6.1	Introduction	156
6.2	Sequential and Periodic Tap Selection	157
6.3	MMax Tap Selection	159
6.4	Selective Partial Update Tap Selection	166
6.5	Performance Comparison for Single-Channel Selective-Tap algorithms	168
6.6	Convergence Analysis	168
6.7	Sparse Partial Update NLMS	179
6.8	multichannel Selective-Tap Algorithms for Stereophonic Acoustic Echo Cancellation	181
6.9	Exclusive Maximum Tap Selection	185
6.10	Exclusive Maximum Adaptive Filters	190
6.11	SAEC Simulation Results	192
6.12	Discussion and Conclusion	194
A	Appendices	197

7 Nonlinear Acoustic Echo Cancellation

F. KÜch, W. Kellermann

7.1	Introduction	205
7.2	Nonlinear Acoustic Echo Paths	207
7.3	Volterra Filters	211
7.4	Power Filters	237
7.5	Conclusions	257

8 Intelligent Control Strategies for Hands-Free Telephones

C. Breining, A. Mader

8.1	Introduction	263
8.2	Fuzzy Systems	267
8.3	Learning Vector Quantization	276
8.4	Prerequisites for Automatic Optimization of Control Algorithms: Optimum Step Size and Cost Function	282
8.5	Radial Basis Function Network for Step-Size Control	288
8.6	Radial Basis Function Network for State Detection	305

Part IV Noise Reduction

9 Noise Reduction

U. Heute

9.1	Introduction	325
9.2	Optimum-Filter Design in the Time Domain	329

9.3	Wiener-Filter Description in the Frequency Domain	332
9.4	Examples and Filtering Effects	333
9.5	Wiener-Filter Realizations	336
9.6	Spectral Subtraction: Principles and Realization	339
9.7	Noise Power Density Spectrum Estimation	343
9.8	Subtraction and Weighting Rules	348
9.9	Spectral Analysis and Synthesis	351
9.10	System Configurations, Experiments, and Comparisons	367
9.11	Further Problems and Ideas, Concluding Remarks	376

10 Noise Reduction with Kalman-Filters for Hands-Free Car Phones Based on Parametric Spectral Speech and Noise Estimates

H. Puder

10.1	Introduction	385
10.2	Speech and Car Noise Analysis	387
10.3	Theoretical Basics	393
10.4	Application of Kalman Filters for Noise Reduction	404
10.5	Comparison of the Results with Classical Frequency Domain Noise Reduction Approaches	420
10.6	Conclusions	425

Part V Selected Applications

11 Evaluation of Algorithms for Speech Enhancement

P. Dreiseitel, G. Schmidt

11.1	The Focus of this Chapter	431
11.2	Objective Tests for Noise Suppression	432
11.3	Comparison Mean Opinion Scores (CMOS)	449
11.4	Rhyme Tests	468
11.5	Outlook	481

12 An Auditory Scene Analysis Approach to Monaural Speech Segregation

G. Hu, D.L. Wang

12.1	Introduction	485
12.2	Computational Auditory Scene Analysis	488
12.3	Peripheral Analysis and Feature Extraction	490
12.4	Auditory Segmentation	497
12.5	Voiced Speech Grouping	499
12.6	Unvoiced Speech Grouping	503
12.7	Concluding Remarks	508

**13 Wave Field Synthesis Techniques for Spatial Sound
Reproduction**

R. Rabenstein, S. Spors, P. Steffen

13.1 Introduction 517

13.2 Elements from the Foundations of Acoustics 518

13.3 Wave Field Synthesis 527

13.4 Implementation of a Wave Field Synthesis System 540

13.5 Conclusions 542

14 Signal Processing for In-Car Communication Systems

G. Schmidt, T. Haulick

14.1 Basics 549

14.2 Signal Processing for Intercom Systems 560

14.3 Evaluation of Intercom Systems 585

14.4 A Real System 592

14.5 Conclusions and Outlook 596

**15 Applications of Adaptive Signal Processing Methods in
High-End Hearing Aids**

V. Hamacher, E. Fischer, U. Kornagel, H. Puder

15.1 Introduction 599

15.2 Directional Microphones 600

15.3 Noise Reduction 608

15.4 Multi-Band Compression 617

15.5 Feedback Cancellation 620

15.6 Classification 627

15.7 Summary 632

Index 637
