Contents

Computer Algebra Algorithms for Orthogonal Polynomials and Special Functions
Wolfram Koepf 1
1 The computation of power series and hypergeometric functions 2
2 Summation of hypergeometric series 6
3 Hypergeometric term solutions of recurrence equations 14
4 Integration 15
5 Applications and further algorithms 18
6 Epilogue 22
References 23

$3nj$-Coefficients and Orthogonal Polynomials of Hypergeometric Type
Joris Van der Jeugt 25
1 The Lie algebras $\mathfrak{su}(2)$ and $\mathfrak{su}(1,1)$ and representations 27
2 Hypergeometric series and some transformation formulas 35
3 Tensor product of two $\mathfrak{su}(2)$ representations 40
4 Tensor product of three $\mathfrak{su}(2)$ representations and Racah coefficients 56
5 Tensor product of $n+1$ representations and $3nj$-coefficients 70
References 89

Dunkl Operators: Theory and Applications
Margit Rösler 93
1 Introduction 94
2 Dunkl operators and the Dunkl transform 95
3 CMS models and generalized Hermite polynomials 110
4 Positivity results 117
5 Asymptotic analysis for the Dunkl kernel 127
6 Notation 132
References 132

Enumeration and Special Functions
Dennis Stanton 137
1 Enumeration and q-series 138
2 Orthogonal polynomials 155
3 Symmetric functions 160
References 165

Riemann-Hilbert Analysis for Orthogonal Polynomials
Arno B.J. Kuijlaars 167
1 Introduction 168
2 Boundary values of analytic functions 169
3 Matrix Riemann-Hilbert problems 172
4 Riemann–Hilbert problem for orthogonal polynomials on the real line 177
5 Riemann–Hilbert problem for orthogonal polynomials on $[-1, 1]$ . . . 179
6 Basic idea of steepest descent method 181
7 First transformation $Y \mapsto T$ 182
8 Second transformation $T \mapsto S$ 184
9 Special case $\alpha = \beta = -\frac{1}{2}$ 187
10 Model Riemann Hilbert problem 189
11 Third transformation $S \mapsto R$ 191
12 Asymptotics for orthogonal polynomials (case $\alpha = \beta = -\frac{1}{2}$) 192
13 Case of general α and β 196
14 Construction of the local parametrix 198
15 Asymptotics for orthogonal polynomials (general case) 204
References 208

Exponential Asymptotics
Adri B. Olde Daalhuis 211
1 Introduction 212
2 Local hyperasymptotics for integrals 217
3 Global hyperasymptotics for integrals 221
4 Global hyperasymptotics for linear ODEs 226
5 Exercises 241
References 243
