3	Gastric Substitutes: An Overview	25
3.1	History	25
3.1.1	Pouches	25
3.1.2	Duodenal Passage	28
3.1.3	Antireflux Procedures	30
3.1.4	Large-Bowel Procedures	30
3.2	Roux-en-Y Reconstruction	30
3.3	Operative Techniques	31
3.3.1	Small-Bowel Substitutes	32
3.3.1.1	The Hunt-Lawrence-Rodino Pouch	32
3.3.1.2	The Longmire Interpositional Pouch	32
3.3.1.3	Oesophagojejunoplication (Siewert-Peiper-Pouch)	32
3.3.1.4	Cuschieri Jejunal Pouch	33
3.3.2	Large-Bowel Substitutes	33
3.3.2.1	The Ileocaecal Segment	33
3.3.2.2	Transverse Colon	34
3.3.2.3	The Left Colon Substitute with the Creation of a His Angle as Reflux Barrier	34
3.4	The Reservoir: A Necessity?	34
3.4.1	Evidence Supporting the Use of Pouches	34
3.4.2	Against the Use of Pouches	39
3.4.3	Experimental Work	39
3.5	The Benefits of a Duodenal Passage	40
3.5.1	Retaining the Duodenal Route	40
3.5.2	Disadvantages of Preserving the Duodenal Route	41
3.5.3	Experimental Work	42
3.6	The Consequences of Alkaline Reflux	42
3.7	Pouches, the Duodenal Route and Antireflux Procedures	43
3.8	State of the Art in 2001	43
3.9	Summary	44
3.10	Conclusion	45
3.11	The Ideal Gastric Substitute	45
	References	45
4	The Ileocaecal Segment	53
4.1	Surgical Anatomy	53
4.2	Histology	54
4.3	The Physiology of the Ileocaecal Region	55
4.3.1	Motility and Pressure Zones Which Suggest That There Is a Physiological Sphincter	55
4.3.2	Mechanical Barrier	56
4.3.3	Regulation of the Sphincter	58
4.3.3.1	Food and Filling	58

4.3.3.2	Hormones	59
4.3.3.3	Nerve Supply	59
4.3.3.4	Neurotransmitters	59
4.3.3.5	Chemicals and Drugs	59
4.3.3.6	The Ileal Brake	59
4.4	Loss of the Ileocaecal Valve	60
4.4.1	The Consequences of Ileocaecal Resection	60
4.4.2	Replacement of the Ileocaecal Valve	60
4.5	Summary	61

5 Ileocaecal Interpositional Graft as a Gastric Substitute 67

5.1	Management of Gastric Cancer	67
5.1.1	Extent of Gastric Resection	67
5.1.2	Lymphadenectomy (D1 vs D2 Compartment)	68
5.2	The History of the Ileocaecal Segment as a Gastric Substitute	68
5.3	Multipurpose Substitute	71
5.3.1	Bladder Replacement	71
5.3.2	Oesophagus Replacement	72
5.3.3	Biliary Drainage	73
5.3.4	Rectal Replacement	73
5.4	The Patients	75
5.5	Protocol	76
5.5.1	The Preoperative Assessment	76
5.5.2	Evaluation: The Follow-Up	76
5.5.2.1	Body Weight	76
5.5.2.2	Endoscopy	76
5.5.2.3	Interview: Questionnaires	76
5.5.2.3.1	Dumping and Reflux Symptoms	76
5.5.2.3.2	The Quality-of-Life Score	77
5.5.2.3.3	The Eypasch Scoring System: The Gastrointestinal Quality-of-Life Index Score (GIQLI)	77
5.5.2.4	Additional Tests (Special Evaluations)	79
5.5.2.4.1	Gastric Emptying	79
5.5.2.4.2	The Glucose Tolerance Test	79
5.5.2.4.3	Manometry	79
5.5.2.5	Data Analysis	80
5.5.3	Statistical Analysis	80
5.6	Operative Technique	80
5.6.1	Position	80
5.6.2	Incision	80
5.6.3	Exploration and Determination of Operability	81

5.7	Total Gastrectomy and Lymphadenectomy	82
5.7.1	Subdiaphragmatic Reconstruction	82
5.7.2	Oesophagoileal Anastomosis	84
5.7.3	Coloduodenal Anastomosis	86
5.7.4	Ileotransversostomy	88
5.7.5	Intrathoracic reconstruction	89
5.8	Results	90
5.8.1	Operation Data	90
5.8.2	Complications and Patients Lost to Follow-Up . . .	90
5.8.3	Body Weight Development	92
5.8.4	Diarrhoea, Dumping and Reflux Symptoms	92
5.8.5	Quality-of-Life Score	93
5.8.6	Endoscopy and Biopsy	93
5.8.7	Special Examinations	93
5.8.7.1	Gastric Emptying Rates	93
5.8.7.2	Glucose Tolerance Test	94
5.8.7.3	Manometry	94
5.9	Discussion	94
5.9.1	The Advantages of the Ileocaecal Segment as a Gastric Substitute	94
5.9.2	A Comparison of the Ileocaecal Segment with Other Reconstructions	96
5.9.2.1	Comparison with Small-Bowel Substitutes	96
5.9.2.1.1	Morbidity and Mortality	96
5.9.2.1.2	Postoperative Body Weight Development	97
5.9.2.1.3	Dumping, Gastric Emptying Rates and Glucose Tolerance	97
5.9.2.1.4	Alkaline Reflux	98
5.9.2.1.5	Manometry	99
5.9.2.1.6	Quality of Life	99
5.9.2.2	Comparison with Large-Bowel Substitutes	99
5.9.3	Comparing Our Results With Other Authors Who Used the Same Segment	99
5.9.4	Conclusions from the Literature	102
5.9.5	The Ileocaecal Segment as a Replacement for the Oesophagus and Stomach	102
