(I) Motivation and Methods

(A) The Antarctic Ice Sheet and its Role in the Global System	3
(A.1) Main Geographic and Glaciologic Provinces of Antarctica	3
(A.2) Climatic Change, Sea-Level Rise, and Changes in the Cryosphere	5
(A.3) Modeling Versus Measuring	7
(B) Satellite Remote Sensing	9
(B.1) An Overview of Ice Sheet Observations by Satellite	9
(B.2) Satellite Radar Altimetry	14
(B.2.1) Satellite Missions with Radar Altimeter Observations	14
(B.2.1.1) SEASAT	14
(B.2.1.2) GEOSAT	16
(B.2.1.3) ERS-1 and ERS-2	17
(B.2.1.4) Other Missions with Altimeters, and Related Missions	17
(B.2.2) Mission Types: Exact Repeat Missions and Geodetic Missions	18
(B.2.3) Radar Measurement Principles	19
(B.3) Analysis of Satellite Radar Altimeter Data over Ice Sheets and Glaciers	25
(B.3.1) Problems and Methods of Mapping Ice Surface Elevation	25
(B.3.2) Derivation of Ice Surface Roughness and Morphology	26
(C) Data Analysis Methods Applied in the Antarctic Atlas	29
(C.0) Introduction	29
(C.1) Corrections of Radar Altimeter Data	30
(C.1.1) Corrections Applied to Satellite Radar Altimeter Data for Ice Surface Mapping	30
(C.1.2) The Bad-Track Problem	33
(C.1.3) The Need for Interpolation of Geophysical Line Survey Data	34
(C.2) Map Projection and Atlas Mapping	34
(C.2.1) The UTM Projection	35
(C.2.2) The Atlas Mapping Problem	35
(C.2.3) The Solution: The Antarctic Atlas Mapping Scheme	36
(C.2.4) Map Sheet Calculation with TRANSVIEW	40
(C.3) Geostatistical Estimation	44

(C.3.1) Concept of the Regionalized Variable and Principles of Variography	45
(C.3.2) Kriging	51
(C.3.3) Variography for Satellite Radar Altimeter Data over Antarctic Ice Surfaces	53
(C.3.4) Application: Search Algorithm and Kriging Parameters for Antarctic Atlas DTMs. Mapping Parameters.	56
(C.3.4.1) Search Routine for Geophysical Line Survey Data and Software	56
(C.3.4.2) Grid Spacing	57
(C.3.4.3) Mapping Parameters: Contouring and Coloring Scheme	57
(C.3.5) Error Analysis	58
(C.3.6) Influence of the Radar Altimeter Sensor Compared to Influence of the Variogram in Kriging for GEOSAT and ERS-1 Data	60
(C.4) The Role of the Geodetic Reference Surface	64
(C.4.1) Ellipsoid and Geoid Concepts	64
(C.4.2) Mapping of Ice Surfaces with Reference to Geoid Models	67

(II) The Atlas

(D) Atlas Maps	73
(D.0) Map Organization and Description Principles	73
(D.1) Latitude Row 63-68° S: Maps from GEOSAT and ERS-1 Radar Altimeter Data	78
Map m45e37-53n63-68 Casey Bay	78
Map m57e49-65n63-68 Napier Mountains	82
Map m69e61-77n63-68 Mawson Coast East	86
Map m81e73-89n63-68 Leopold and Astrid Coast	88
Map m93e85-101n63-68 Queen Mary Coast	92
Map m105e97-113n63-68 Knox Coast	96
Map m117e109-125n63-68 Sabrina Coast	100
Map m129e121-137n63-68 Clarie Coast	104
Map m141e133-149n63-68 Adélie Coast	108
Map m153e145-161n63-68 Ninnis Glacier Tongue	112
Map m297e289-305n63-68 Antarctic Peninsula (Graham Land)	114
(D.2) Latitude Row 67-72.1° S: Maps from GEOSAT and ERS-1 Radar Altimeter Data	118
Map m15we23W-7Wn67-721 Ekström Ice Shelf	118
Map m3we11w-5n67-721 Fimbul Ice Shelf	120
Map m9e1-17n67-721 Princess Astrid Coast	124
Map m21e13-29n67-721 Erskine Iceport	126
Map m33e25-41n67-721 Riiser-Larsen Peninsula	130
Map m45e37-53n67-721 Prince Olav Coast	134
Map m57e49-65n67-721 Kemp Coast	138
Map m69e61-77n67-721 Lambert Glacier	140
Map m81e73-89n67-721 Ingrid Christensen Coast	146
Map m93e85-101n67-721 Wilkes Land (e85-101n67-721)	148
Map m105e97-113n67-721 Wilkes Land (e97-113n67-721)	150
Map m117e109-125n67-721 Wilkes Land (e109-125n67-721)	152

Map m129e121-137n67-721 Wilkes Land (e121-137n67-721)	154
Map m141e133-149n67-721 Wilkes Land (e133-149n67-721)	156
Map m153e145-161n67-721 Cook Ice Shelf	160
Map m165e157-173n67-721 Pennell Coast	164
Map m292e284-300n67-721 Antarctic Peninsula (Palmer Land)	168
(D.3) Latitude Row 71-77° S: Maps from ERS-1 Radar Altimeter Data	172
Map m333e315-351n71-77 Riiser-Larsen Ice Shelf	172
Map m357e339-15n71-77 New Schwabenland	175
Map m21e3-39n71-77 Sør Rondane Mountains	178
Map m45e27-63n71-77 Belgica Mountains	180
Map m69e51-87n71-77 Upper Lambert Glacier	182
Map m93e75-111n71-77 American Highland	184
Map m117e99-135n71-77 Dome Charlie	186
Map m141e123-159n71-77 Southern Wilkes Land (e123-159)	188
Map m165e147-183n71-77 Victoria Land	190
Map m213e195-231n71-77 Ruppert Coast	194
Map m237e219-255n71-77 Bakutis Coast	196
Map m261e243-279n71-77 Walgreen Coast	198
Map m285e267-303n71-77 Ellsworth Land	201
Map m309e291-327n71-77 Black Coast	204
(D.4) Latitude Row 75-80° S: Maps from ERS-1 Radar Altimeter Data	206
Map m333e315-351n75-80 Coats Land	206
Map m357e339-15n75-80 Western Queen Maud Land (North)	208
Map m21e3-39n75-80 Central Queen Maud Land (North)	209
Map m45e27-63n75-80 Valkyrie Dome	210
Map m69e51-87n75-80 South of Lambert Glacier	211
Map m93e75-111n75-80 East Antarctica (Sovetskaya)	213
Map m117e99-135n75-80 East Antarctica (Vostok)	214
Map m141e123-159n75-80 East Antarctica (Mt. Longhurst)	216
Map m165e147-183n75-80 Scott Coast	218
Map m189e171-207n75-80 Roosevelt Island	220
Map m213e195-231n75-80 Saunders Coast	222
Map m237e219-255n75-80 Northern Marie Byrd Land	224
Map m261e243-279n75-80 Northern Hollick-Kenyon Plateau	226
Map m285e267-303n75-80 Zumberge Coast	228
Map m309e291-327n75-80 Ronne Ice Shelf	232
(D.5) Latitude Row 78-81.5° S: Maps from ERS-1 Radar Altimeter Data	234
Map m333e315-351n78-815 Filchner Ice Shelf	234
Map m357e339-15n78-815 Western Queen Maud Land (South)	237
Map m21e3-39n78-815 Central Queen Maud Land (South)	238
Map m45e27-63n78-815 Eastern Queen Maud Land (South)	239
Map m69e51-87n78-815 Dome Argus	240
Map m93e75-111n78-815 East Antarctica (e75-111n78-815)	241
Map m117e99-135n78-815 East Antarctica (e99-135n78-815)	242
Map m141e123-159n78-815 Byrd Glacier	243

Map m165e147-183n78-815 Hillary Coast	244
Map m189e171-207n78-815 Ross Ice Shelf.....	246
Map m213e195-231n78-815 Shirase Coast.....	248
Map m237e219-255n78-815 Southern Marie Byrd Land	250
Map m261e243-279n78-815 Southern Hollick-Kenyon Plateau	251
Map m285e267-303n78-815 Ellsworth Mountains	252
Map m309e291-327n78-815 Berkner Island	254

(III) Applications

(E) Monitoring Changes in Antarctic Ice Surface Topography: The Example of the Lambert Glacier/Amery Ice Shelf System	259
(E.1) The Problem of Monitoring Changes.....	259
(E.2) Time Series of Digital Terrain Models and Maps	261
(E.3) Altimeter Data: Acquisition and Corrections.....	262
(E.4) Visual Comparison — Quantitative Comparison.....	274
(E.5) Calculation of Elevation Changes.....	275
(E.6) Discussion of Results on Elevation Changes.....	281
(E.6.1) Results of the Monitoring Study.....	281
(E.6.2) Comparison with Other Maps of Lambert Glacier/Amery Ice Shelf	283
(E.7) On the Potential Existence of Surge Glaciers in the Lambert Glacier/Amery Ice Shelf System	286
(E.7.1) Introduction to the Surge Phenomenon and Relationship to Results of the Monitoring Study	286
(E.7.2) Discussion of the Surge Hypothesis in the Glaciologic Literature.....	286
(F) Detailed Studies of Selected Antarctic Outlet Glaciers and Ice Shelves.....	289
(F.0) Introduction	289
(F.1) Detail Map 1: Slessor Glacier (ERS-1 Data 1995)	290
(F.2) Detail Map 2: Stancomb-Wills Glacier (ERS-1 Data 1995)	294
(F.3) Detail Map 3: Jutulstraumen Glacier (ERS-1 Data 1995)	296
(F.4) Detail Map 4: Shirase Glacier (ERS-1 Data 1995)	300
(F.5) Detail Map 5: Lambert Glacier (ERS-1 Data 1995)	302
(F.6) Detail Map 6: West Ice Shelf (ERS-1 Data 1995)	308
(F.7) Detail Map 7: Denman Glacier (ERS-1 Data 1995)	310
(F.8) Detail Map 8: Vanderford Glacier (ERS-1 Data 1995)	312
(F.9) Detail Map 9: Totten Glacier (ERS-1 Data 1995)	314
(F.10) Detail Maps 10: Mertz Glacier, 11: Ninnis Glacier, and 12: Mertz and Ninnis Glaciers (GEOSAT Data 1985-86)	316
(F.11) Detail Map 13: Rennick Glacier (ERS-1 Data 1995).....	322
(F.12) Detail Map 14: David Glacier/Drygalski Ice Tongue (ERS-1 Data 1995)	326
(F.13) Detail Map 15: Thwaites Glacier (ERS-1 Data 1995)	328
(F.14) Detail Map 16: Pine Island Glacier (ERS-1 Data 1995)	330

(G) Combination of SAR and Radar Altimeter Data:	
Lambert Glacier/Amery Ice Shelf	333

(IV) References and Appendix

(H) References	343
