List of Contributors	ix
1 Restructuring Product Development and Production Networks: Introduction to the Book	1
<i>Ulrich Jürgens</i>	
The Challenge of Time to Market: Responses by Industries	
2 Shortening Lead Time through Early Problem-solving – A New Round of Capability-building Competition in the Auto Industry	23
<i>Takahiro Fujimoto</i>	
3 The Machine Tool Industry: New Market Challenges and the Crisis of the Traditional German Pattern of Innovation	55
<i>Hartmut Hirsch-Kreinsen</i>	
4 Turnkey Production Networks: The Organizational Delinking of Production from Innovation	67
<i>Timothy J. Sturgeon</i>	
5 Making Large Teams Work Like Small Teams: Product Development at Microsoft	85
<i>Michael A. Cusumano</i>	
Comparing National-specific Approaches in the Machine Tool, Automobile and PC Industries	
6 Communication and Cooperation in the New Product and Process Development Networks – an International Comparison of Country- and Industry-specific Patterns	107
<i>Ulrich Jürgens</i>	
7 Reorganizing Process Chains in the German and American Machine Tool Industry	149
<i>Inge Lippert</i>	
8 The Italian Machine Tool Industry Towards Product Development Networks	181
<i>Secondo Rolfo</i>	

9	Changing Strategies and Processes in the Japanese Machine Tool Product Development	199
	<i>Masato Kobayashi</i>	
10	Reorganizing the Product and Process Development of an Italian Car Manufacturer	225
	<i>Giuseppe Calabrese</i>	
11	Toward New Product and Process Development Networks: The Case of the German Car Industry	259
	<i>Ulrich Jürgens</i>	
12	Involving Manufacturing Employees in the Early Stages of Product Development: A Case Study from the U.S. Automobile Industry	289
	<i>Carol J. Haddad</i>	
13	The New Product Development System of the Japanese Automobile Industry	313
	<i>Masayoshi Ikeda</i>	
14	Reduction of Development Lead Time Through Improvements in the Development Process and Innovations in Production Technology – Reconfirmation of Japanese-Style Supplier Relations. Evidence from a Case Study	341
	<i>Shoichiro Sei</i>	
15	Industry Hegemony and Company Product Development Performance in the Personal Computer Industry	357
	<i>Helmut Drüke</i>	

Potential and Use of Information and Communication Technology

16	Information and Communication Technologies to Support Cooperation in the Product Development Process	389
	<i>Oliver Tegel</i>	
17	CAD/CAM Utilization Patterns in Japan and Germany	407
	<i>Hiroyuki Okamuro</i>	

Beyond the Management and Engineering Perspective

18	Knowledge Management is the Key Prerequisite for the Improvement of New Product and Process Development	427
	<i>Veronika Lullies</i>	

<i>Contents</i>	<i>vii</i>
19 Creating Systemic Capability for Consistent High Performance New Product Development	441
<i>Edward F. McDonough III and Abbie Griffin</i>	
20 General Conclusion	459
<i>Ulrich Jürgens</i>	
Index	465
