

Contents

I. General Introduction

Elements of Environmental Decoherence <i>E. Joos</i>	1
The Meaning of Decoherence <i>H.D. Zeh</i>	19

II. Theoretical Aspects

Continuous Fuzzy Measurement of Energy: Realization and Application <i>J. Audretsch</i>	43
Slow Decoherence of Superpositions of Macroscopically Distinct States <i>D. Braun, P.A. Braun, and F. Haake</i>	55
Grey Solitons in Bose-Einstein Condensates as Mesoscopic Particles <i>T. Busch and J.R. Anglin</i>	67
Decoherence Through Coupling to the Radiation Field <i>D. Dürr and H. Spohn</i>	77
States, Symmetries and Superselection <i>D. Giulini</i>	87
Decoherence in Situations Involving the Gravitational Field <i>C. Kiefer</i>	101
Moving Quantum Agents in a Finite Environment <i>I. Kim and G. Mahler</i>	113
Mathematical Aspects of Decoherence <i>J. Kupsch</i>	125

Decoherence and Continuous Measurements: Phenomenology and Models <i>M.B. Mensky</i>	137
The Problem of Decoherence and the EPR Paradox <i>P. Mittelstaedt</i>	149
Asymptotically Disjoint Quantum States <i>H. Primas</i>	161
Dynamical Localization and Decoherence <i>F. Saif, K. Riedel, W.P. Schleich, and B. Mirbach</i>	179
III. Experiments	
Quantum Cryptography and Long Distance Bell Experiments: How to Control Decoherence <i>N. Gisin, J. Brendel, J.-D. Gautier, B. Gisin, B. Huttner, G. Ribordy, W. Tittel, and H. Zbinden</i>	191
Exploration of the Fundamentals of Quantum Mechanics by Charged Particle Interferometry <i>F. Hasselbach, H. Kiesel, and P. Sonnentag</i>	201
Single Ions in Paul Traps <i>H.C. Nägerl, Ch. Roos, H. Rohde, D. Leibfried, J. Eschner, F. Schmidt-Kaler, and R. Blatt</i>	213
IV. Alternative Approaches	
Time-Convolutionless Stochastic Unraveling of Non-Markovian Quantum Master Equations <i>H.-P. Breuer, B. Kappler, and F. Petruccione</i>	233
Emergence of Classicality: From Collapse Phenomenologies to Hybrid Dynamics <i>L. Diósi</i>	243
EEQT: Formalism and Applications <i>R. Olkiewicz</i>	251
An Application of EEQT: Tunneling Times <i>A. Ruschhaupt</i>	259
Non-Markovian Quantum State Diffusion and Open System Dynamics <i>W.T. Strunz, L. Diósi, and N. Gisin</i>	271

V. Conceptual and Epistemological Issues

Quantum Theory Without Waves: A Way of Eliminating Quantum Mechanical Paradoxes?

M. Cini 281

Decoherence as an Irreversible Process

R. Omnès 291

Many Minds and Single Mind Interpretations of Quantum Theory

A. Whitaker 299

Decoherence and Einselection

W.H. Zurek 309
