

Contents

1. Zeros of analytic functions	1
1.1 Introduction	1
1.1.1 Computing the total number of zeros with certainty ..	4
1.1.2 An overview of other approaches	8
1.2 Formal orthogonal polynomials	10
1.3 An accurate algorithm to compute zeros of FOPs	21
1.5 The software package ZEAL	34
1.5.1 The approach taken by ZEAL	35
1.5.2 The structure of ZEAL	37
1.5.3 ZEAL'S user interface	40
1.5.4 A few examples of how to use ZEAL	43
1.5.5 Concluding remarks	50
1.6 A derivative-free approach	51
2. Clusters of zeros of analytic functions	61
2.1 How to obtain the centre of a cluster and its weight	61
2.2 A numerical example	65
2.3 Rational interpolation at roots of unity	69
2.4 More numerical examples	79
3. Zeros and poles of meromorphic functions	83
3.1 Introduction	83
3.2 Theoretical considerations and numerical algorithm	85
3.3 A numerical example	88
4 Systems of analytic equations	91
4.1 Introduction	92
4.2 A multidimensional logarithmic residue formula	93
4.3 The algorithm	97
4.4 Numerical examples	101
