PART I: Knee Joint

CHAPTER 1: Knee Joint – General Part 3

1.1 Historical Development	4	1.14 Examination Sequence	73
1.2 Instrumentation (Arthroscopy System)	5	1.15 Complications	73
1.2.1 Arthroscope	5	1.15.1 Instrument Breakage	73
1.2.2 Sheath	9	1.15.2 Nerve Injuries	75
1.2.3 Light Source	11	1.15.3 Vascular Injuries	76
1.2.4 Light Cable	12	1.15.4 Bony Injuries	76
1.3 Video System	13	1.15.5 Ligament Injuries	76
1.3.1 Video Camera	13	1.15.6 Cartilage Damage	77
1.3.2 Monitor	15	1.15.7 Infection	80
1.3.3 Digital Video	16	1.15.8 Thrombosis	80
1.3.4 Picture-in-a-Picture	17	1.15.9 Compartment Syndrome	80
1.4 Probe	17	1.15.10 Effusion	80
1.4.1 Triangulation	17	1.15.11 Synovial Fistula	80
1.4.2 Rendezvous Principle	17	1.15.12 Skin Complications	81
1.5 Mirrors	17	1.15.13 Lost Tissue Fragments	81
1.6 Surgical Instruments	22	1.15.14 Reflex Sympathetic Dystrophy	81
1.6.1 Mechanical Instruments	23	1.15.15 Arthroscopy of the Wrong Knee	82
1.6.2 Motorized Instruments (Shavers)	27	1.15.16 Rare Complications	82
1.6.3 Electrosurgical Instruments	32	1.16 Documentation	83
1.6.4 Lasers	40	1.16.1 Written Documentation	83
1.6.5 Special Instruments	43	1.16.2 Image Documentation	84
1.7 Anesthesia	48	1.16.3 Recommended Documentation System	87
1.7.1 General Anesthesia	48	1.17 Outpatient Arthroscopy	87
1.7.2 Regional Anesthesia	48	1.17.1 Indications	87
1.7.3 Local Anesthesia	48	1.17.2 Contraindications	87
1.8 Positioning	49	1.17.3 Setting	87
1.8.1 Straight-Leg Position	49	1.17.4 Organization	88
1.8.2 Flexed-Knee Position	49	1.17.5 Patient Selection	88
1.9 Tourniquet	50	1.17.6 Patient Reception	89
1.9.1 Tourniquet Placement	50	1.17.7 Premedication	89
1.9.2 Arthroscopy without Tourniquet Inflation	50	1.17.8 Patient Preparations	89
1.9.3 Arthroscopy with Tourniquet Inflation	51	1.17.9 Anesthesia	90
1.9.4 Arthroscopy in an Exsanguinated Field	51	1.17.10 Surgical Procedure	90
1.10 Draping	51	1.17.11 Postoperative Management	91
1.11 Distention Medium	52	1.17.12 Documentation	92
1.11.1 Gas Distention	52	1.17.13 Quality Control	92
1.11.2 Fluid Distention	53	1.18 Indications	93
1.11.3 Irrigation System	54	1.18.1 Hemarthrosis	93
1.12 Setup and Preparations for Arthroscopy	56	1.18.2 Second-Look Arthroscopy	94
1.12.1 Arthroscopy Cart	56	1.18.3 Established Indications	95
1.12.2 Connecting the Basic Equipment	57	1.19 Contraindications	95
1.13 Portal Placement	57		
1.13.1 Arthroscope Portal	58		
1.13.2 Instrument Portal	61		
1.13.3 Medial Instrument Portals	64		
		1.13.4 Lateral Instrument Portals	65
		1.13.5 Posterior Instrument Portals	65
		1.13.6 Switching Portals	70
		1.13.7 Problems	72

CHAPTER 2: Knee Joint – Special Part	97
2.1 Menisci	99
2.1.1 General Therapeutic Principles	101
2.1.2 Longitudinal Tears	116
2.1.3 Bucket-Handle Tears	132
2.1.4 Flap Tears	151
2.1.5 Radial Tears	159
2.1.6 Horizontal Tears	164
2.1.7 Degenerative Lesions	166
2.1.8 Ramp Lesions	171
2.1.9 Meniscal Cysts	178
2.1.10 Discoid Meniscus	182
2.1.11 Crystalline Deposits	193
2.1.12 Hypermobility Meniscus	193
2.1.13 Removal of Meniscal Repair Devices	196
2.1.14 Postoperative Management	199
2.1.15 Future Directions in Meniscal Surgery	199
2.2 Cartilage	201
2.2.1 Degenerative Cartilage Lesions	202
2.2.2 Traumatic Cartilage Lesions	212
2.3 Synovium	235
2.3.1 Reactive (Secondary) Synovitis	235
2.3.2 Primary Synovitis	242
2.3.3 Traumatic Synovial Lesions	249
2.3.4 Posttraumatic Synovial Changes	251
2.4 Synovial Plicae	253
2.4.1 Medial Patellar Plica	253
2.4.2 Infrapatellar Plica	259
2.4.3 Suprapatellar Plica, Suprapatellar Septum	263
2.5 Femoropatellar Joint	267
2.5.1 Femoropatellar Pain Syndrome (FPPS)	267
2.5.2 Excessive Lateral Pressure Syndrome (ELPS)	270
2.5.3 Patellar Dislocation	275
2.5.4 Cartilage Lesions, Patellofemoral Osteoarthritis	284
2.5.5 Osteochondritis Dissecans	285
2.6 Osteophytes	289
2.6.1 Osteophytes in the Anterior Intercondylar Area	289
2.6.2 Osteophytes on the Femoral Condyle	291
2.6.3 Osteophytes on the Medial or Lateral Tibial Plateau	293
2.6.4 Osteophyte on the Patellar Apex	294
2.7 Osteochondral Lesions	297
2.7.1 Osteochondritis Dissecans (OCD)	297
2.7.2 Osteochondral Fractures	310
2.8 Baker Cyst	315
2.9 Loose Bodies	319
2.9.1 Free Loose Bodies	319
2.9.2 Multiple Loose Bodies	326
2.9.3 Fixed Loose Bodies	329
2.10 Osteoarthritis	331
2.11 Tumors and Intraarticular Ganglia	335
2.12 Limited Motion and Scarring	341
2.12.1 Cyclops Syndrome	341
2.12.2 Infrapatellar Contracture Syndrome	346
2.12.3 Mechanical Restriction Caused by Fixation Material	349
2.12.4 Notch Stenosis	354
2.12.5 Local Adhesions, Arthrofibrosis	358
2.13 Anterior Cruciate Ligament	367
2.13.1 Acute ACL Rupture	369
2.13.2 Chronic ACL Rupture, ACL Deficiency	376
2.13.3 Partial ACL Tear and Scarring	515
2.13.4 Bony Avulsion of the ACL	518
2.13.5 Personal Experience, Current Trend and Outlook	522
2.14 Revision Surgery of the Anterior Cruciate Ligament	525
2.14.1 Limitation of Motion	525
2.14.2 Deficiency and Rerupture	529
2.14.3 Locking	555
2.14.4 Pain	556
2.14.5 Recurrent Swelling	558
2.14.6 ACL Graft Removal	560
2.14.7 Guidelines for Revision ACL Reconstruction	568
2.15 Posterior Cruciate Ligament	571
2.15.1 Acute PCL Rupture	574
2.15.2 Chronic PCL Deficiency	588
2.15.3 Posterolateral Instability	633
2.15.4 Bony Avulsion of the PCL	638
2.15.5 Combined PCL and ACL Injuries	638
2.16 Revision Surgery of the Posterior Cruciate Ligament	643
2.16.1 PCL Rupture and ACL Reconstruction	645
2.16.2 PCL Rupture and MCL Repair	646
2.16.3 PCL Rupture and Immobilization in Flexion	647
2.16.4 Incorrect Tunnel Placement	648
2.16.5 Deficient Operative Stabilization	651
2.16.6 Revision Problems	652
2.17 Fractures	659
2.17.1 Patellar Fracture	659
2.17.2 Upper Tibial Fracture	661
2.18 Infection	663
PART II: Ankle Joint	
CHAPTER 3: Ankle Joint – General Part	673
3.1 Historical Development	673
3.2 Instrumentation (Arthroscopy System)	673
3.3 Video System	674
3.4 Probe	674
3.5 Distraction	674
3.6 Operating Instruments	674
3.7 Anesthesia	675
3.8 Positioning	675
3.9 Tourniquet	676
3.10 Draping	676
3.11 Distention Medium	676
3.12 Setup and Preparations for Arthroscopy	676
3.13 Portal Placement	676
3.13.1 Gross Anatomy	676
3.13.2 Anterior Portals	677
3.13.3 Posterior Portals	679
3.13.4 Transmalleolar Portals	680
3.13.5 Transtalar Portals	680
3.13.6 Placement of the Arthroscope Portal	680
3.13.7 Placement of the Anteromedial Portal	682
3.13.8 Placement of the Posterolateral Portal	684
3.13.9 Switching the Arthroscope and Instrument Portals	686

3.14 Examination Sequence 686

3.15 Complications 686

3.15.1 Intraoperative Local Complications 686

3.15.2 Postoperative Local Complications 687

3.15.3 Distraction-Related Complications 688

3.16 Documentation 688

3.17 Outpatient Arthroscopy 688

3.18 Indications 688

3.18.1 Unexplained Pain 688

3.18.2 Locking 690

3.18.3 Osteochondral Lesions
(Osteochondritis Dissecans) 690

3.18.4 Unexplained Effusion 690

3.18.5 Bony Impingement 690

3.18.6 Ligament Impingement Syndromes 690

3.18.7 Cartilage Lesions 690

3.18.8 Chronic Lateral Instability 690

3.18.9 Arthrodesis 691

3.18.10 Infection 691

3.18.11 Fractures 691

3.18.12 Tumors 691

3.19 Contraindications 692

CHAPTER 4: Ankle Joint – Special Part 693

4.1 Synovitis 693

4.2 Impingement Syndromes 697

4.2.1 Lateral Impingement Syndrome 698

4.2.2 Syndesmotic Impingement 701

4.2.3 Posterior Impingement Syndrome 702

4.3 Loose Bodies 703

4.4 Cartilage Lesions 709

4.5 Osteophytes 710

4.6 Arthrofibrosis, Scarring 718

4.7 Osteochondral Lesions 722

4.7.1 Anteromedial Bony Impingement 731

4.8 Osteoarthritis 733

4.9 Chronic Lateral Instability 738

4.10 Fractures 740

4.11 Infection 741

4.12 Tumors 741

PART III: Wrist

CHAPTER 5: Wrist – General Part 747

5.1 Historical Development 747

5.2 Instrumentation (Arthroscopy System) 748

5.2.1 Arthroscope 748

5.2.2 Sheath 748

5.3 Video System 748

5.4 Probe 748

5.5 Mirrors 749

5.6 Operating Instruments 749

5.6.1 Mechanical Instruments 749

5.6.2 Motorized Instruments (Shaver) 749

5.6.3 Electrosurgical Instruments 750

5.6.4 Lasers 753

5.7 Anesthesia 753

5.8 Positioning 753

5.8.1 Distraction by Countertraction 753

5.8.2 Traction Tower 753

5.9 Tourniquet 754

5.10 Draping 754

5.11 Distention Medium 754

5.12 Setup and Preparations for Arthroscopy 754

5.13 Portal Placement 754

5.13.1 Anatomy 755

5.13.2 Radiocarpal Portals 756

5.13.3 Midcarpal Portals 757

5.13.4 Distal Radioulnar Portal 757

5.13.5 Creating the Radiocarpal Arthroscope
Portal: Technique 757

5.13.6 Midcarpal and Distal Radioulnar Portals 759

5.13.7 Creating the Instrument Portal: Technique 759

5.13.8 Switching Portals 761

5.14 Anatomy and Examination Sequence 762

5.14.1 Extrinsic Ligaments 762

5.14.2 Intrinsic Ligaments 763

5.14.3 TFCC 764

5.14.4 Examination of the Radioulnar Joint 765

5.14.5 Examination of the Midcarpal Joint 765

5.15 Complications 765

5.15.1 General Complications 765

5.15.2 Specific Complications 765

5.16 Documentation 766

5.17 Outpatient Arthroscopy 766

5.18 Indications 766

5.18.1 Chronic Pain 766

5.18.2 Locking 767

5.18.3 TFC Lesions 769

5.18.4 Synovitis 769

5.18.5 Chondral and Osteochondral Lesions 769

5.18.6 Ligamentous Lesions 769

5.18.7 Ganglia 769

5.18.8 Fractures 769

5.19 Contraindications 769

CHAPTER 6: Wrist – Special Part 771

6.1 Synovitis 771

6.2 Cartilage Lesions 774

6.3 TFC Lesions 777

6.4 Loose Bodies 788

6.5 Ligamentous Lesions 788

6.6 Hyperlaxity 797

6.7 Ulnocarpal Impingement Syndrome (UCIS) 798

6.8 Fractures 804

6.9 Scarring and Arthrofibrosis 804

6.10 Ganglia 807

PART IV: Elbow Joint

CHAPTER 7: Elbow Joint – General Part 811

7.1 Historical Development 811

7.2 Instrumentation (Arthroscopy System) 811

7.3 Video System 812

7.4 Probe 812

7.5 Mirror 812

7.6 Operating Instruments 812

7.6.1 Mechanical Instruments 812

7.6.2 Motorized Instruments (Shaver). 812

7.6.3 Electrosurgical Instruments 813

7.6.4 Lasers 813

7.6.5 Switching Sticks 813

7.7 Anesthesia 813

7.8 Positioning 813

7.9 Tourniquet 814

7.10 Draping 814

7.11 Distention Medium 814

7.12 Setup and Preparations for Arthroscopy 814

7.13 Portal Placement 814

7.13.1 Anatomic Landmarks. 814

7.13.2 Anterior Portals 814

7.13.3 Posterior Portals 816

7.13.4 Portal Principles 817

7.13.5 Creating the Arthroscope Portal:
Technique 818

7.13.6 Creating the Instrument Portal:
Technique 820

7.13.7 Switching Portals 825

7.14 Examination Sequence 825

7.14.1 Anterolateral Portal 825

7.14.2 Anteromedial Portal 825

7.14.3 High Posterolateral Portal 826

7.14.4 Low Posterolateral Portal 830

7.15 Complications 831

7.16 Documentation 832

7.17 Outpatient Arthroscopy 832

7.18 Indications 832

7.18.1 Limited Motion 832

7.18.2 Loose Bodies 832

7.18.3 Osteophytes 832

7.18.4 Osteoarthritis 832

7.18.5 Chronic Pain. 835

7.18.6 Recurrent Effusions. 835

7.18.7 Fractures. 835

7.18.8 Osteochondritis Dissecans
(Panner Disease) 835

7.18.9 Infection 835

7.19 Contraindications 835

CHAPTER 8: Elbow Joint – Special Part 837

8.1 Synovitis 837

8.2 Cartilage Lesions 839

8.3 Loose Bodies 847

8.4 Osteophytes 855

8.5 Scarring and Adhesions 861

8.6 Osteoarthritis 864

8.7 Osteochondritis Dissecans (Panner’s Disease) 865

8.8 Radial Head Fracture 869

8.9 Infection 872

8.10 Outlook and Personal Experience 872

PART V: Shoulder Joint

CHAPTER 9: Shoulder – General Part 875

9.1 Historical Development 875

9.2 Instrumentation (Arthroscopy System) 875

9.3 Video System 875

9.4 Probe 876

9.5 Operating Instruments 876

9.6 Anesthesia 876

9.7 Positioning 876

9.7.1 Lateral Decubitus Position 876

9.7.2 Beach Chair Position 877

9.8 Draping 877

9.9 Distention Medium 878

9.10 Setup and Preparations for Arthroscopy 878

9.11 Portal Placement 878

9.11.1 Gross Anatomy 878

9.11.2 Glenohumeral Portals 878

9.11.3 Subacromial Portals. 880

9.11.4 Acromioclavicular Portals 880

9.11.5 Creating the Glenohumeral
Arthroscope Portal: Technique. 880

9.11.6 Creating the Glenohumeral
Instrument Portal: Technique 881

9.11.7 Creating the Subacromial
Arthroscope Portal: Technique. 883

9.11.8 Creating the Subacromial
Instrument Portal: Technique 884

9.11.9 Acromioclavicular Portals 884

9.12 Obscured Vision 884

9.13 Anatomy and Examination Sequence 886

9.13.1 Anatomy 886

9.13.2 Examination of the Glenohumeral Joint 889

9.13.3 Examination of the Subacromial Space 891

9.14 Complications 891

9.14.1 Position-Related Complications 891

9.14.2 Distraction-Related Complications 891

9.14.3 Portal-Related Complications 892

9.14.4 Technique-Related Complications. 892

9.15 Documentation 893

9.16 Outpatient Arthroscopy 893

9.17 Indications 893

9.17.1 Chronic Pain. 893

9.17.2 Locking 893

9.17.3 Loose Bodies 893

9.17.4 Labral Lesions 893

9.17.5 Rotator Cuff Tears. 893

9.17.6 Subacromial Syndrome. 893

9.17.7 Limitation of Motion 893

9.17.8 Biceps Tendon 894

9.17.9 Shoulder Instabilities 894

9.17.10 Infection 894

9.17.11 Acromioclavicular Joint 894

CHAPTER 10: Shoulder – Special Part 895

10.1 Synovitis 895

10.2 Cartilage Lesions 898

10.3 Loose Bodies 899

10.4 Labral Lesions 900

10.4.1 SLAP Lesion 901

10.5 Biceps Tendon 903
10.6 Anterior Capsule and Ligaments (Shoulder Dislocation) 905
10.7 Rotator Cuff Lesions 917
10.8 Frozen Shoulder (Adhesive Capsulitis) 926
10.9 Infection 928
10.10 Subacromial Space 929
10.11 Acromioclavicular Osteoarthritis 940

PART VI

CHAPTER 11: Subtalar Joint 945

11.1 Historical Development 945
11.2 Instrumentation 945
11.3 Video System 945
11.4 Probe 945
11.5 Operating Instruments 946
11.6 Anesthesia 946
11.7 Positioning 946
11.8 Tourniquet 946
11.9 Draping 946
11.10 Distention Medium 946
11.11 Setup and Preparations for Arthroscopy 946
11.12 Portal Placement 946
 11.12.1 Anatomy 946
 11.12.2 Anterolateral Portals 947
 11.12.3 Posterolateral Portals 948
 11.12.4 Creating the Arthroscope Portal: Technique 948
 11.12.5 Creating the Instrument Portal: Technique 949
 11.12.6 Switching Portals 949
11.13 Examination Sequence 949
11.14 Complications 949
11.15 Documentation 949
11.16 Outpatient Arthroscopy 949
11.17 Indications 949
11.18 Synovitis 951
11.19 Loose Bodies 953
11.20 Cartilage Lesions 953
11.21 Symptomatic Os Trigonum 953
11.22 Adhesions 953
11.23 Arthroscopic Arthrodesis 953
11.24 Outlook and Personal Experience 953

CHAPTER 12: Joints of the Toes 955

12.1 Historical Development 955
12.2 Instrumentation (Arthroscopy System) 955
12.3 Video System 956
12.4 Probe 956
12.5 Operating Instruments 956
12.6 Anesthesia 956
12.7 Positioning 956
12.8 Tourniquet 956
12.9 Draping 956
12.10 Distention Medium 956
12.11 Setup and Preparations for Arthroscopy 956

12.12 Portal Placement 956
 12.12.1 Anatomy of the Metatarsophalangeal Joint of the Big Toe 956
 12.12.2 Anatomy of the Metatarsophalangeal Joints of the Second through Fifth Toes 957
 12.12.3 Portal Sites 957
 12.12.4 Creating the Arthroscope Portal: Technique 957
 12.12.5 Creating the Instrument Portal: Technique 958
 12.12.6 Switching Portals 959
12.13 Examination Sequence 959
12.14 Complications 959
12.15 Documentation 959
12.16 Outpatient Arthroscopy 959
12.17 Indications 960
12.18 Contraindications 960
12.19 Loose Bodies 961
12.20 Synovitis 961
12.21 Osteophytes 961
12.22 Cartilage Lesions 961
12.23 Osteochondritis Dissecans 962
12.24 Summary and Personal Experience 962

CHAPTER 13: Joints of the Fingers 965

13.1 Historical Development 965
13.2 Instrumentation 965
13.3 Anesthesia 965
13.4 Positioning 965
13.5 Tourniquet 966
13.6 Draping 966
13.7 Distention Medium 966
13.8 Setup and Preparations for Arthroscopy 966
13.9 Portal Placement 966
 13.9.1 Arthroscope Portal 966
 13.9.2 Instrument Portal 967
 13.9.3 Switching Portals 967
13.10 Examination Sequence 967
13.11 Complications 967
13.12 Documentation 967
13.13 Outpatient Arthroscopy 967
13.14 Indications 968
13.15 Contraindications 968
13.16 Synovitis 968
13.17 Loose Bodies 968
13.18 Cartilage Lesions 968
13.19 Summary and Outlook 968

CHAPTER 14: Hip Joint 969

14.1 Historical Development 969
14.2 Instrumentation 969
14.3 Video System 969
14.4 Probe 969
14.5 Surgical Instruments 970
14.6 Anesthesia 970
14.7 Positioning 970
14.8 Draping 971
14.9 Distention Medium 971
14.10 Setup and Preparations 971

14.11 Portal Placement	971	16.8 Draping	994
14.11.1 Anatomy	971	16.9 Distention Medium	994
14.11.2 Lateral Portal (Supratrochanteric)	972	16.10 Setup and Preparations for Endoscopy	994
14.11.3 Anterior Portal	972	16.11 Portal Placement	994
14.11.4 Technique for Creating the Portals	972	16.11.1 Technique for Creating the Portals	994
14.12 Examination Sequence	973	16.11.2 Instrument Portal	994
14.13 Complications	973	16.12 Complications	994
14.14 Documentation	973	16.13 Documentation	994
14.15 Outpatient Arthroscopy	973	16.14 Outpatient Bursoscopy	994
14.16 Indications	973	16.15 Indications	994
