Dedication	V
Foreword by the President of the Maldives	VII
Foreword by the Honorary Consul of Tuvalu	IX
Author’s Notes	XI
Acknowledgements	XIII
Acronyms and Abbreviations	XV
Update on the Kyoto Protocol	XVII
Chapter 1 Introduction	1
1.1 Overview	2
1.2 How to Use This Book	3
Chapter 2 Global Warming	3
2.1 Impact on the Global Environment	3
2.2 Greenhouse Gases: Primary Sources and Global Warming Potential of Each Gas	4
Chapter 3 The Kyoto Protocol’s Flexible Mechanisms	7
3.1 United Nations Framework Convention on Climate Change (UNFCCC)	7
3.2 Three Main “Pillars”: Market-Based Flexible Mechanisms	7
3.3 Clean Development Mechanism (Article 12)	8
3.4 Joint Implementation (Article 6)	9
3.5 Emissions Trading (Article 17) – Current Experience and Global Reaction	9
3.6 Original Text from the Protocol (Articles 3.1, 6, 12 and 17)	10
Chapter 4 Institutional Issues	15
4.1 Kyoto Protocol: Signing and Ratification	15
4.2 Why Flexible Mechanisms May Not Prevent Global Warming	16
4.3 “Ceilings” and “Checks” Issues	16
4.4 Remedial Measures in the Event of Non-Ratification of the Kyoto Protocol	17
4.5 LDC/IRISK Climate Change Fund	18
Chapter 5 Global Emissions of Carbon Dioxide	21
5.1 Carbon Dioxide Emissions in Non-Annex I Countries (Table 5.1)	22

5.2	Methane and Nitrous Oxide Emissions in Non-Annex I Countries (Table 5.2)	45
Chapter 6 Clean Development Mechanism Project Prospects		49
6.1	Basis of Country, Power Plant and Industry Sector Survey (Table 6.1)	50
Chapter 7 Project Parameters and Equitable Treatment		89
7.1	Baselines	89
7.1.1	Temporal Baselines – Reference Years	89
7.1.2	Physical Baselines – National vs. Specific	90
7.1.3	Conceptual Reality of Multiple Baselines in Project Location	91
7.1.4	Case for Inadmissibility of Multiple Counting	92
7.1.5	Practical Baseline for the International Transportation Sector	93
7.2	Project Eligibility Criteria – CDM Projects	94
7.2.1	Emissions Additionality	94
7.2.2	Financial Additionality (Investment Criteria)	94
7.2.3	“Economic-Social-Environmental” Sustainability	95
7.3	Determination of the Discount Rate	96
7.4	Cost or Price Revisions Pro-Rata Rate of Change of Market or Subsidised Prices	97
7.5	Equitable Treatment	99
7.5.1	Allocation of Part Proceeds to Charities and Humanitarian Aid in CDM Projects	99
7.5.2	The LDC/IRISK Climate Change Fund	102
7.5.3	Comparison of LDC Fossil-Fuel Resources (Table 7.1)	106
7.5.4	Percentage Contribution to LDC Countries	107
7.5.5	LDCs and Islands-at-Risk Statistics (Table 7.2)	109
7.5.6	Benefits Comparison Between Host Country, Annex I Investors and Traders	122
7.5.7	Equitable Balancing to Stimulate Investments in SMEs	127
Chapter 8 CO₂ Reduction Technologies and Financial Analysis		139
8.1	Thermal and Renewable Energy Technologies	139
8.2	Cost of Carbon Dioxide Reduction (Tables 8.1, 8.2)	140
8.3	Role of Recycling Plants on Greenhouse Gas Emissions (Table 8.3)	144
8.4	Energy Saving Strategies for Process Industries: Potential Emission Reductions (Tables 8.4, 8.5)	145
8.5	Traditional Biogas Energy Technology	150
8.6	Electricity Storage from Renewable Energy Resources	151
8.7	Costs and Benefits of Carbon Dioxide Reduction Technologies (Table 8.6)	154
8.8	CO ₂ Cost and Electricity Cost, and Return on Capital	168
8.9	Financial Analysis – IRR, Risk Return and Project Financing	169

Chapter 9 Emissions Trading	181
9.1 A National Pilot Scheme for Allocation and Trading of Carbon Permits	182
9.2 Derivatives for Hedging Price Exposures of Carbon Credits	184
9.3 Value-at-Risk of CDM/JI Investments	185
9.3.1 Case Example: VaR of CDM Power Project, China, 100MW _e CCGT Plant	190
9.3.2 Total VaR Analysis of Power Project	191
9.3.3 Risk Erosion Strategies for the Electricity Market – Generator and Consumer	192
9.4 Pricing Techniques for Futures and Options	194
9.4.1 Forward Pricing for Electricity Contracts	194
9.4.2 Forward Pricing for Emission Reduction Contracts	194
9.4.3 Option Pricing for Electricity Contracts	195
9.4.4 Option Pricing for Emission Reduction Contracts	196
9.5 Pricing Packaged Electricity and Emission Contracts	199
9.6 Factors Influencing Pricing of Futures, Options and Swaps of CO ₂ Assets	200
9.7 Emissions Trading Contract	201
9.7.1 Data Input	201
9.7.2 Proposed Format for Spot/Futures/Options	205
9.7.3 Proposed Specifications for Futures and Spot Contracts	206
9.7.4 Proposed Specifications for Options Contracts	209
9.8 Case Examples Using Spot, Futures and Options	210
9.8.1 Futures Market, Pricing Methodology, 3-month Contracts, Case Examples	211
9.8.2 Futures Market, CDM Example	212
9.8.3 Futures Hedging Example, Firm with Net CO ₂ Emissions Reductions	215
9.8.4 Options Market – Principles	217
9.8.5 Options Market, CDM Example	218
9.8.6 Options Hedging Example, Firm with Net CO ₂ Emissions Reductions	219
9.8.7 Swaps, “Physicals” and “Credit Risk” Swaps	223
9.8.8 Swaps, Case Example	225
9.8.9 Derivatives, Pricing and Application	225
9.9 International Emissions Trading (Tables 9.1, 9.2, 9.3)	226
9.10 Trading Commissions	229
9.11 Role of National, Regional and Global Exchanges and OTC Market	230
9.12 Packaged Commodity and Emissions Trading, PACOMET (Table 9.4)	231
9.13 Impact of the Kyoto Protocol on Financial Markets and Issued Securities (Table 9.5)	232
9.14 Impact of the Kyoto Protocol on Credit Ratings and Net Asset Values (Table 9.6)	233

Chapter 10	Conclusions	237
Appendices		
A1	Contact Addresses of Environmental Authorities/Relevant Government Authorities in Developing Countries	241
A2	United Nations and Multilateral Environmental Organisations Concerned with Environmental Policies and Financing of Projects	263
A3	Emissions Measurement and Monitoring	267
A3.1	Technical Methods (Table A3.1)	267
A3.2	Maintaining Sustainability in Kyoto Protocol Projects	267
A3.3	World Bank Guidelines on Environmental Standards – Major Atmospheric, Land and Water Pollutants from Industries and Domestic Sources (Table A3.2)	269
A4	The Green 500 Project – A National Green Index to Rank Firms, Case Study: United Kingdom, Case Example 1, Case Example 2 (Tables A4.1, A4.2)	273
A5	Carbon Accounting and Carbon Taxes	279
A5.1	Accounting for Carbon Assets	279
A5.2	Effect of Taxation on Carbon Dioxide Emissions	280
A6	National Pilot Schemes for Emissions Permits Trading Outside Annex I countries	283
A6.1	National Permits Trading Scheme for India and China: Bilateral Cooperation Between the World’s Two Most Populous Countries	283
A6.2	Model Questionnaire to Enterprises in Developing Countries	286
A7	Calculating the Cost of CO ₂ Control	289
A7.1	Annuitised and Levelised Costs of Carbon Abatement	289
A7.2	Pricing Credits or Permits: Calculating “Overnight” and “Discounted” Cost	290
A7.3	Technical Example I for Pricing CO ₂ Emissions Reductions	291
A7.4	Technical Example II for Pricing CO ₂ Emissions Reductions	295
A7.5	Economics of Energy Conversion – Coal to Natural Gas for Power Stations	299
A8	Cost Data – Indicative Costs of Key Equipment for Thermal Power Projects	303
A9	The Clean Development Mechanism: How to implement the CDM – a <i>Modus Operandi</i> Framework Document prepared by Euro-Asia Pacific Corporation Limited, UK	305
A9.1	The Clean Development Mechanism	305
A9.2	Role of the Conference of the Parties (Governments)	320
A9.3	The Role of the Private Sector and Trading Exchanges	322
A9.4	Kyoto Protocol and Non-Kyoto Protocol Risks	323
A9.5	Case for Private Sector Financing of CDM Projects	324
A9.6	Issues Regarding “Tradability” of Emissions Credits Earned by Non-Annex I Firms	325
A9.7	Case of Governments Which Have Not, or May Not, Sign Up to the Kyoto Protocol	326

A9.8	Countries Listed in Annex I to the Convention Compared to Countries listed in Annex B to the Protocol	327
A9.9	Definition of Small and Medium-Size Enterprises, and Large Companies	327
A9.10	Project Selection Criteria for the CDM: Industries and Country Targets	327
A9.11	Reference Datum for Measuring Emissions Reductions for CDM: Emissions Additionality	331
A9.12	How Annex I Countries Can Move Ahead with the CDM	334
A9.13	A Global Private Equity Fund – The World CDM Green Fund	335
A10	Islands-at-Risk – Contingency Plans for Evacuation and Resettlement (Tables A10.1, A10.2, A10.3 and A10.4)	337
Annexes	Annex 1 Annex A of the Kyoto Protocol: Targeted Greenhouse Gases and Sources	349
	Annex 2 Annex B of the Kyoto Protocol: Countries and QELRCs (commitments)	350
	Annex 3 Annex I of the Kyoto Protocol: Countries and CO ₂ Emissions in 1990	351
	Annex 4 List of Countries Signing and Ratifying the Kyoto Protocol, at end 1999	352
	Units, Definitions and Conversion Factors	357
	Figures Index	360
	Subject Index	363
	Country, Place Index	373
	Persons Index	375
