## Contents

|  |     |
|--|-----|
| <b>Advanced Technologies for Studies on Protein Interactomes</b><br>H. Guan · E. Kiss-Toth . . . . .   | 1   |
| <b>Cardiac Systems Biology and Parameter Sensitivity Analysis:<br/>Intracellular Ca<sup>2+</sup> Regulatory Mechanisms<br/>in Mouse Ventricular Myocytes</b><br>S.-Y. Shin · S.-M. Choo · S.-H. Woo · K.-H. Cho . . . . .        | 25  |
| <b>Protein Interactions: Analysis Using Allele Libraries</b><br>T. G. Chappell · P. N. Gray . . . . .  | 47  |
| <b>Identification of Protein–Protein Interactions<br/>by Mass Spectrometry Coupled Techniques</b><br>M. Abu-Farha · F. Elisma · D. Figeys . . . . .  | 67  |
| <b>Lab-on-a-chip in Vitro Compartmentalization Technologies<br/>for Protein Studies</b><br>Y. Zhu · B. E. Power . . . . .  | 81  |
| <b>Large-Scale Analysis of Protein–Protein Interactions<br/>Using Cellulose-Bound Peptide Arrays</b><br>U. Beutling · K. Städing · T. Stradal · R. Frank . . . . .   | 115 |
| <b>Antibody Microarrays as an Experimental Platform<br/>for the Analysis of Signal Transduction Networks</b><br>U. Korf · F. Henjes · C. Schmidt · A. Tresch · H. Mannsperger<br>C. Löbke · T. Beissbarth · A. Poustka . . . . . | 153 |
| <b>Using Aptamers to Study Protein–Protein Interactions</b><br>P. Parekh · J. Martin · Y. Chen · D. Colon · H. Wang · W. Tan . . . . .   | 177 |
| <b>Investigating Protein–Protein Interactions by Far-Westerns</b><br>C. S. Chan · T. M. L. Winstone · R. J. Turner . . . . .   | 195 |

|  |     |
|--|-----|
| <b>Using Product Kernels to Predict Protein Interactions</b>             |     |
| S. Martin · W. M. Brown · J.-L. Faulon . . . . .                         | 215 |
| <br>   |     |
| <b>Computational Methods For Predicting Protein–Protein Interactions</b> |     |
| S. Pitre · M. Alamgir · J. R. Green · M. Dumontier                       |     |
| F. Dehne · A. Golshani . . . . .   | 247 |
| <br>   |     |
| <b>Subject Index</b> . . . . .   | 269 |
