1 Fungal Siderophores: Structure, Functions and Regulation	1
<i>Aparajita Das¹, Ram Prasad¹, Abhishek Srivastava², Pham Huong Giang³, Kamyia Bhatnagar¹ and Ajit Varma¹</i>	
1.1 Introduction	1
1.1.1 Significance of Terrestrial Fungi	1
1.1.2 Mycorrhiza	2
1.1.3 Role of Fungi in Industry	6
1.1.4 A Novel Endophytic Fungus <i>Piriformospora indica</i>	7
1.2 Siderophores	8
1.2.1 Bacterial Siderophores	8
1.2.2 Fungal Siderophores	9
1.3 Functions of Siderophores	26
1.4 Siderophores as Pathogenic Factor	27
1.4.1 Activities	27
1.4.2 Host Response	28
1.4.3 Clinical Applications	28
1.5 Agricultural Interest	29
1.6 Utilization of Siderophores by Nonproducers	29
1.7 Acidification and Mobilization	30
1.8 <i>Piriformospora indica</i> and Siderophore	31
1.9 Methods to Characterize Siderophore	32
1.9.1 Procedure for Detection of Siderophore	32
1.9.2 Isolation of Siderophore	33
1.9.3 Cultivation of <i>Piriformospora indica</i>	34
1.10 Conclusions	34
References	35
2 Siderotyping and Bacterial Taxonomy: A Siderophore Bank for a Rapid Identification at the Species Level of Fluorescent and Non-Fluorescent <i>Pseudomonas</i>	43
<i>Jean-Marie Meyer</i>	
2.1 Introduction	43
2.2 Siderophores of <i>Pseudomonas</i>	44

2.3	Siderotyping Methods	46
2.3.1	Siderotyping Through Isoelectrofocusing	48
2.3.2	Siderotyping Through Siderophore-Mediated Iron Uptake	50
2.4	Siderotyping as a Powerful Tool for the Search of New Siderophores	54
2.5	Siderotyping as a Powerful Tool for <i>Pseudomonas</i> Taxonomy and Phylogeny	54
2.6	Siderotyping and Environmental/Ecological Microbiology	56
2.7	Raising a Pyoverdine Bank Based on IEF Patterns	57
2.8	Conclusions	60
	References	61
3	Siderotyping, a Tool to Characterize, Classify and Identify Fluorescent Pseudomonads	67
	<i>Alain Bultreys</i>	
3.1	Introduction	67
3.2	Siderophore Specificity	68
3.2.1	Specificity of Production	68
3.2.2	Specificity of Utilization and Heterologous Uptake	68
3.3	Siderotyping Methods	69
3.3.1	Siderophore Uptake Experiments	69
3.3.2	Electrophoretic Methods	69
3.3.3	Chromatographic Methods	70
3.3.4	Mass Spectrometry (MS)	70
3.3.5	Use of Modified Indicator Strains	70
3.3.6	Genetic Tests	71
3.4	Siderophores of Fluorescent Pseudomonads	71
3.4.1	Pyochelin and its By-Product Salicylic Acid	71
3.4.2	Pseudomonine	72
3.4.3	Yersiniabactin	73
3.4.4	Pyridine-2,6-bis(monothiocarboxylic acid) (PDTC)	75
3.4.5	Quinolobactin	76
3.4.6	Pyoverdin (Pseudobactin)	76
3.5	Conclusions	81
	References	81
4	Siderophores of Symbiotic Fungi	91
	<i>Kurt Haselwandter and Günther Winkelmann</i>	
4.1	Introduction	91
4.2	Fungi Forming Mutualistic Symbioses with Plants	92
4.2.1	Ectomycorrhizal Fungi	93
4.2.2	Arbuscular Mycorrhizal Fungi	93
4.2.3	Ericoid Mycorrhizal Fungi	94

4.2.4	Orchidaceous Mycorrhizal Fungi	95
4.2.5	Ectendomycorrhizal Fungi	95
4.2.6	Dark Septate Endophytes	96
4.2.7	Mycobionts of Lichens	96
4.3	Outlook	97
	References	100
5	Protein-mediated Siderophore Uptake in Gram-negative Bacteria: A Structural Perspective	105
	<i>José D. Faraldo-Gómez</i>	
5.1	Introduction	105
5.2	Transport Across the Outer Membrane	107
5.2.1	The Outer-Membrane Receptor and Transporter Proteins	107
5.2.2	Energy Transduction and TonB	110
5.3	Transport Across the Periplasm and Cytoplasmic Membrane	111
5.3.1	Periplasmic Binding Proteins	111
5.3.2	The Cytoplasmic-membrane ABC Transporters	114
5.4	Conclusions	117
	References	117
6	Competition for Iron and Induced Systemic Resistance by Siderophores of Plant Growth Promoting Rhizobacteria	121
	<i>Monica Höfte and Peter A.H.M. Bakker</i>	
6.1	Introduction	121
6.2	Role of Siderophores and Iron-Regulated Compounds in ISR	122
6.2.1	<i>Pseudomonas aeruginosa</i> 7NSK2	122
6.2.2	<i>Pseudomonas fluorescens</i> CHA0 and <i>P. fluorescens</i> P3	125
6.2.3	<i>Pseudomonas fluorescens</i> WCS417 and WCS374	126
6.2.4	<i>Pseudomonas putida</i> WCS358	127
6.2.5	<i>Pseudomonas putida</i> BTP1	128
6.2.6	<i>Serratia marcescens</i> 90-166	128
6.3	Conclusions	129
	References	130
