## Part I Introduction to Micro-Pulling-Down Method

---

<b>1 Micro-Pulling-Down (<math>\mu</math>-PD) and Related Growth Methods</b>	
<i>Valery I. Chani</i> .....	3
<b>2 Basics of the <math>\mu</math>-PD Method</b>	
<i>Tsuguo Fukuda</i> .....	27
<b>3 Equipment Configuration</b>	
<i>Tsuguo Fukuda</i> .....	47
<b>4 Growth Phenomena and Crystal Chemistry</b>	
<i>Valery I. Chani</i> .....	69

---

## Part II Modification and Evolution of $\mu$ -PD Method

---

<b>5 Flux Growth of Miniature Bulk Crystals by the <math>\mu</math>-PD Method</b>	
<i>Boris M. Epelbaum</i> .....	93
<b>6 Mixed Crystals: <math>\mu</math>-PD vs. Czochralski Method</b>	
<i>Andrey Novoselov</i> .....	101
<b>7 Isothermal Flux Evaporation Diameter Control</b>	
<i>Valery I. Chani, Kheirreddine Lebbou</i> .....	115
<b>8 Eutectic Fibers with Self-Organized Structures</b>	
<i>Dorota A. Pawlak</i> .....	129

---

## Part III Growth and Characterization of Oxide $\mu$ -PD Crystals I: Scintillation and Laser Materials

---

<b>9 Scintillating Bulk Oxide Crystals</b>	
<i>Akira Yoshikawa, Martin Nikl</i> .....	143

<b>10 Scintillating Crystals: <math>\text{Ce}^{3+}:\text{YAlO}_3</math> and <math>\text{Yb}^{3+}:\text{Lu}_3\text{Al}_5\text{O}_{12}</math></b> <i>Mohamed Alshourbagy, Alessandra Toncelli, Mauro Tonelli</i> .....	159
<b>11 YAG:<math>\text{Nd}^{3+}</math>:</b> <b><math>\mu</math>-PD and Czochralski Growth and Properties</b> <i>Kherreddine Lebbou, Didier Perrodin</i> .....	173
<b>12 High-Melting Rare-Earth Sesquioxides:</b> <b><math>\text{Y}_2\text{O}_3</math>, <math>\text{Lu}_2\text{O}_3</math>, and <math>\text{Sc}_2\text{O}_3</math></b> <i>Akira Yoshikawa, Andrey Novoselov</i> .....	187
<b>13 <math>\text{MgAl}_2\text{O}_4</math> Spinel Laser Crystals:</b> <b>Pure and Ti-, Mn-, or Ni-Doped</b> <i>Anis Jouini</i> .....	203
<hr/>	
<b>Part IV Growth and Characterization of Oxide <math>\mu</math>-PD Crystals II: Assorted Materials</b>	
<hr/>	
<b>14 <math>\text{K}_3\text{Li}_2\text{Nb}_5\text{O}_{15}</math> Fiber and Plate Crystals</b> <i>Minoru Imaeda, Katsuhiro Imai</i> .....	219
<b>15 Piezoelectric Langasite-Type Crystals</b> <i>Tsuguo Fukuda, Hiroshi Machida</i> .....	229
<b>16 Shaped Sapphire: Rods, Tubes, and Plates</b> <i>Hiroki Sato</i> .....	239
<b>17 Doped <math>\text{LiNbO}_3</math> Crystals</b> <i>Dae-Ho Yoon</i> .....	251
<b>18 Growth of Olivine and Wüstite Crystals</b> <i>Steffen Ganschow, Detlef Klimm</i> .....	265
<hr/>	
<b>Part V Growth and Characterization of Non-Oxide <math>\mu</math>-PD Crystals</b>	
<hr/>	
<b>19 Silicon Fiber Crystals</b> <i>Mohamed Alshourbagy, Alessandra Toncelli, Mauro Tonelli</i> .....	277
<b>20 <math>\text{LiF}</math>, <math>\text{LiYF}_4</math>, and Nd- and Er-Doped <math>\text{LiYF}_4</math> Fluoride Fibers</b> <i>Ana Maria do Espirito Santo, Sonia Licia Baldochi</i> .....	287
<b>21 Binary Fluorides: <math>(\text{Gd},\text{Y})\text{F}_3</math> and <math>\text{K}(\text{Y},\text{Lu})_3\text{F}_{10}</math></b> <i>Akira Yoshikawa, Tomohiko Satonaga</i> .....	301
<b>22 Shaped Fluorides</b> <i>Tomohiko Satonaga</i> .....	323

**23 Metal Alloy Fibers**

*Akira Yosikawa, Yuji Sutou* ..... 331

**Afterword** ..... 335

**Index** ..... 337
