Part I Aspects of Software Product Line Engineering

1	The Product Line Engineering Approach	3
1.1	Motivation	3
1.2	A Brief History of Software Product Line Engineering	5
1.3	Fundamentals of the Software Product Line Engineering Approach	6
1.4	Variability Management	8
1.4.1	Types of Variability	8
1.4.2	Variability Representation	9
1.4.3	Application Engineering and Variability	11
1.5	Business-Centric	12
1.6	Architecture-Centric	14
1.7	Two-Life-Cycle Approach	14
1.8	The BAPO Model	16
1.9	Summary	19
2	Business	21
2.1	Motivation	21
2.2	Product Line Markets	22
2.2.1	Product Definition Strategy	22
2.2.2	Market Strategies	23
2.2.3	The Product Line Life-Cycle	24
2.2.4	The Relation of Strategy and Product Line Engineering	26
2.3	Product Line Economics	27
2.3.1	Economic Results of Product Line Engineering	27
2.3.2	A Simple Model of Product Line Economics	28
2.3.3	Advanced Aspects of Product Line Economics	29
2.4	Product Management and Scoping	31
2.4.1	Product Portfolio Management	31
2.4.2	Domain Potential Analysis	33
2.4.3	Asset Scoping	34
2.5	Summary	35

3	Architecture	37
3.1	Motivation	37
3.2	Architecture Concerns	38
3.2.1	Architecturally Significant Requirements	38
3.2.2	Conceptual Architecture	39
3.2.3	Structure	39
3.2.4	Texture	39
3.3	Product Line Architecting	40
3.3.1	Basic Variability Techniques	40
3.3.2	Concrete Variation Mechanisms	41
3.4	Evaluation	42
3.5	Evolution	43
3.5.1	End of Life	44
3.6	Summary	44
4	Process	47
4.1	Motivation	47
4.2	The Software Product Line Engineering Framework	48
4.3	Domain Engineering	49
4.3.1	Product Management	49
4.3.2	Domain Requirements Engineering	49
4.3.3	Domain Design	51
4.3.4	Domain Realisation	51
4.3.5	Domain Testing	52
4.4	Application Engineering	53
4.4.1	Application Requirements Engineering	53
4.4.2	Application Design	54
4.4.3	Application Realisation	54
4.4.4	Application Testing	54
4.5	Process Maturity: CMMI	55
4.5.1	Maturity Levels	55
4.5.2	Structure of CMMI Models	56
4.6	Summary	57
5	Organisation	59
5.1	Motivation	59
5.2	Roles and Responsibilities	61
5.2.1	Product Manager	61
5.2.2	Domain Requirements Engineer	62
5.2.3	Domain Architect	63
5.2.4	Domain Developer	63
5.2.5	Domain Tester	64
5.2.6	Domain Asset Manager	64
5.2.7	Application Requirements Engineer	64
5.2.8	Application Architect	65

5.2.9	Application Developer	65
5.2.10	Application Tester	65
5.3	Organisational Structures	66
5.3.1	Product-Oriented Organisation	67
5.3.2	Process-Oriented Organisation	69
5.3.3	Matrix Organisation	70
5.3.4	Testing	70
5.3.5	Asset Management	72
5.3.6	Product Management	74
5.4	Geographical Distribution	76
5.5	Collaboration Schemes	77
5.6	Summary	78
6	The Family Evaluation Framework	79
6.1	Motivation	79
6.2	Structure	80
6.3	Business Dimension	82
6.3.1	Level 1: Project-Based	82
6.3.2	Level 2: Aware	83
6.3.3	Level 3: Managed	84
6.3.4	Level 4: Measured	85
6.3.5	Level 5: Optimised	85
6.4	Architecture Dimension	85
6.4.1	Level 1: Independent Development	87
6.4.2	Level 2: Standardised Infrastructure	87
6.4.3	Level 3: Software Platform	87
6.4.4	Level 4: Variant Products	88
6.4.5	Level 5: Configuring	88
6.5	Process Dimension	88
6.5.1	Level 1: Initial	90
6.5.2	Level 2: Managed	90
6.5.3	Level 3: Defined	91
6.5.4	Level 4: Quantitatively Managed	93
6.5.5	Level 5: Optimising	93
6.6	Organisation Dimension	93
6.6.1	Level 1: Project	95
6.6.2	Level 2: Reuse	95
6.6.3	Level 3: Weakly Connected	95
6.6.4	Level 4: Synchronised	96
6.6.5	Level 5: Domain-Oriented	96
6.7	Applying the FEF	97
6.7.1	Complex Organisations	97
6.7.2	Example	100
6.8	Connection to Other Approaches	104
6.9	Summary	105

Part II Experience Reports

7	Experiences in Product Line Engineering	111
7.1	Experimental Software Engineering	112
7.2	Experience Reports on Product Line Development	114
7.3	Case Study Basics	115
7.3.1	Setting Up Case Studies	115
7.3.2	The Case Study Format	116
7.4	Overview of the Case Studies	118
8	AKVAsmart	121
8.1	Introduction	122
8.2	Motivation	122
8.2.1	Case Description	122
8.2.2	Market Drivers	125
8.3	Approach	125
8.4	Architecture	126
8.4.1	The Framework	127
8.4.2	Examples of Plug-ins	128
8.5	Results and Impact Evaluation	129
8.6	Lessons Learned	131
8.7	Outlook	131
9	Bosch Gasoline Systems	133
9.1	Introduction	134
9.2	Motivation	134
9.3	Approach	136
9.3.1	Business Strategy	136
9.3.2	Work Products: Software Architecture	137
9.3.3	Software Components	140
9.3.4	Processes and Methods	141
9.3.5	Tool Environment	143
9.3.6	Organisation	144
9.4	Lessons Learned	144
9.4.1	Management Role	144
9.4.2	Product and Process Excellence – Product Line Engineering and CMMI	146
9.5	Summary	147
10	DNV Software	149
10.1	Introduction	150
10.2	Motivation	151
10.3	Approach	152
10.3.1	First Generation Product Line Engineering	152
10.3.2	Second Generation Product Line Engineering	155

10.4	Results and Impact Evaluation	162
10.5	Lessons Learned	164
10.6	Outlook	165
11	market maker Software AG	167
11.1	Introduction	168
11.2	Motivation	168
11.3	Adoption Process	172
11.3.1	Fast Time to Market	172
11.3.2	New Team	172
11.3.3	Early Focus on Applications	172
11.3.4	No Separation of Domain and Application Engineering Teams	173
11.3.5	Encapsulation of Legacy Systems	173
11.3.6	Simple Architectural Style	173
11.3.7	Effective Communication	174
11.3.8	Immediate and Reliable Decisions	174
11.3.9	Coaching	174
11.3.10	Small Investments	174
11.4	Current Process	175
11.4.1	Business	175
11.4.2	Architecture	175
11.4.3	Process	180
11.4.4	Organisation	184
11.5	Results and Impact Evaluation	186
11.6	Lessons Learned	187
11.7	Summary	189
12	Nokia Mobile Phones	191
12.1	Introduction	192
12.2	Motivation	192
12.3	Approach	193
12.3.1	Typing and Quality Characteristics	195
12.3.2	Traceability	195
12.3.3	The ART Environment	197
12.4	Example: Security	199
12.5	Lessons Learned	204
12.6	Outlook	205
13	Nokia Networks	207
13.1	Introduction	208
13.2	Motivation	208
13.3	Approach	211

13.4	Lessons Learned	214
13.5	Outlook	216
14	Philips Consumer Electronics Software for Televisions	219
14.1	Introduction	220
14.2	Motivation	220
14.3	Approach	223
14.4	Business Aspects	224
14.5	Architecture	224
14.6	Process	227
14.7	Organisation	229
14.8	Results	229
14.9	Lessons Learned	230
15	Philips Medical Systems	233
15.1	Introduction	234
15.2	Motivation	234
15.3	Approach	235
15.3.1	Adoption Approach	235
15.3.2	Current Development Approach	239
15.4	Results and Impact Evaluation	245
15.5	Lessons Learned	246
15.6	Outlook	247
16	Siemens Medical Solutions	249
16.1	Introduction	250
16.2	Motivation	251
16.3	Approach	251
16.3.1	Adoption Process	251
16.3.2	Current Process	252
16.4	Results and Impact Evaluation	261
16.5	Lessons Learned	262
16.6	Summary	263
17	Telvent	265
17.1	Introduction	266
17.2	Motivation	266
17.3	Approach	268
17.3.1	Organisation and Business	269
17.3.2	Using the Abstract Factory Pattern	269
17.3.3	Introducing the Dynamic Abstract Factory Pattern	270
17.3.4	Reusing the Dynamic Abstract Factory Pattern	272
17.4	Lessons Learned	274

Part III Conclusions

18	Analysis	277
18.1	Motivation	277
18.1.1	Complexity	277
18.1.2	Variability and Commonality	278
18.1.3	Efficiency and Costs	279
18.1.4	Reuse and Architecture	279
18.1.5	Quality	279
18.2	Business	280
18.2.1	FEF Evaluations	281
18.3	Architecture	281
18.3.1	FEF Evaluations	282
18.4	Process	283
18.4.1	Evaluations	283
18.5	Organisation	284
18.5.1	FEF Evaluations	284
18.6	Summary	285
18.6.1	How to Do It	285
18.6.2	Guidelines	286
18.6.3	Benefits	287
18.6.4	Concerns	287
18.6.5	Evaluations	288
19	Starting with Software Product Line Engineering	289
19.1	Decide	290
19.1.1	Define Business Strategy and Vision	290
19.1.2	Learn About Software Product Line Engineering	291
19.1.3	Perform a Risk Analysis	291
19.2	Prepare	294
19.2.1	Gain Support	294
19.2.2	Set Concrete Goals	295
19.2.3	Scope the Product Line	296
19.2.4	Evaluate the Organisation	298
19.2.5	Plan the Transition	299
19.3	Transition	300
19.3.1	Roll Out and Institutionalise	300
19.3.2	Evolving the Product Line	302
19.4	Conclusion	303

20 Outlook	305
20.1 Where We Are	305
20.2 Current Shortcomings of Product Line Engineering	306
20.2.1 Methodological Shortcomings	307
20.2.2 Technology and Tools	309
20.3 Going Beyond Product Lines	310
20.4 Product Line Engineering for Practitioners	311
Glossary	313
References	317
About the Authors	327
Index	329
